INCIDENT MANAGEMENT SITUATION REPORT TUESDAY, MAY 16, 2000 - 0530 MDT NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

New large fires were reported in the Southwest and Southern Areas. Initial attack activity increased in the Southern Area. The National Interagency Coordination Center processed orders for helicopters, an air tanker, infrared aircraft, engines, radio equipment, shower units, and miscellaneous overhead. Very high to extreme fire indices were reported in New Mexico, Arizona, Texas, Utah, California, Colorado, and Oklahoma.

On 5/13, Interior Secretary Bruce Babbitt and Agriculture Secretary Dan Glickman announced a 30-day suspension of all federal prescribed fires west of the 100th meridian. For more information, see the U.S. Forest Service Fire web page at www.fs.fed.us/fire/news.shtml.

A fixed wing aircraft working on the Lincoln Zone near Alamogordo, New Mexico crashed yesterday. Both the pilot and the passenger were killed. The entire fire community extends condolences to the family and friends.

SOUTHWEST AREA LARGE FIRES:

CERRO GRANDE, Bandelier National Monument. An Area Command Team (Meuchel) and two Type I Incident Management Teams (Humphrey and Bateman) are assigned. A Type I Incident Management Team (Gage) will begin transitioning with Bateman's team today. The fire is burning near Los Alamos, NM. Crews held and improved fireline on both the north and south sides of the fire. The potential for wind-driven fire growth still exists. Threatened resources include the Baca Ranch, the Santa Clara Indian Reservation, the Santa Clara Ranger Station, watersheds, and endangered species.

SCOTT ABLE, Lincoln National Forest. The fire is located 20 miles south of Cloudcroft, NM. A Type I Incident Management Team (Studebaker) is assigned. The fire's activity inside the perimeter increased due to lower humidities and higher winds. Efforts are underway to establish and secure direct fireline in all critical areas.

OUTLET, Grand Canyon National Park. A Type I Incident Management Team (Frye) is assigned. The fire is burning in designated and proposed wilderness 26 miles south of Jacob Lake, AZ. The fire's activity increased due to strong winds and low relative humidity. Heavy fuels within the fire area have contributed to severe fire behavior, rapid fire spread and difficulty meeting containment objectives.

LANE, Buenos Aires National Wildlife Refuge. The fire is 40 miles southwest of Tucson, AZ. The fire began on 5/14 and was pushed in mesquite and grass by strong southwest winds. Retardant was effective in slowing the head of the fire. A burnout operation was planned for last night.

COON CREEK, Tonto National Forest. The fire is 20 miles north of Globe,

AZ in the Sierra Ancha Wilderness. No significant fire activity occurred. Demobilization of resources has begun.

SOUTHERN AREA LARGE FIRES:

LONG BAY, National Forests of Florida. This fire is in the Apalachicola National Forest, 40 miles southwest of Tallahassee, FL. Airtankers, helicopters and crews worked to contain a spot fire yesterday which grew to approximately 250 acres.

COOK RANCH, Texas State Forest Service. The fire is located 36 miles south of Ft. Stockton, TX. Crews are improving firelines in preparation for today's predicted gusty winds.

CEDAR RIDGE, Blue Ridge Parkway, National Park Service. The fire is near Traphill, NC. Containment was hampered by strong winds and low humidities. The fire was caused by lightning.

PINEY, George Washington and Jefferson National Forests. This lightningcaused fire is five miles southeast of Glasgow, VA. Two more crews will be mobilized today. Current threats include wildlife habitat and the James River Face Wilderness area.

FLOWERS, Florida State Division of Forestry. The fire, which is ten miles north of Port Charlotte, FL, was caused by lightning. Spotting up to 1/4 mile was observed.

OUTLOOK:

*** A RED FLAG WARNING IS POSTED IN ALL OF NEW MEXICO AND WEST TEXAS FOR STRONG SOUTHWEST WINDS AND LOW RELATIVE HUMIDITIES TODAY ***

*** A FIRE WEATHER WATCH IS POSTED IN ALL OF ARIZONA FOR STRONG WINDS AND LOW RELATIVE HUMIDITIES TODAY ***

*** A FIRE WEATHER WATCH IS POSTED IN NORTH AND CENTRAL FLORIDA FOR LOW RELATIVE HUMIDITIES THIS AFTERNOON ***

New Mexico will be partly cloudy and very windy. There is a slight chance of afternoon thunderstorms in the southeast portion of the state. Afternoon winds will be southwest to west at 20 to 35 mph, gusting to 50 mph. High temperatures will be in the 70's in the north to near 100 in the southern deserts. Minimum relative humidities will be 5 to 15 percent.

West Texas will be partly cloudy and windy with isolated afternoon thunderstorms. Winds will be southwest at 10 to 25 mph with gusts to 40 mph. High temperatures will range from the upper 80's in the northern part of the state to near 110 along the Rio Grande River. Minimum relative humidities will be around 10 percent.

Arizona will be partly cloudy and windy. Winds will be southwest at 20 to 40 mph. High temperatures will be in the 60's in the mountains and up to the lower 90's in the southern deserts. Minimum relative humidities will be 7 to 15 percent.

Florida will be mostly sunny with east winds at 5 to 15 mph. High temperatures will be in the 80's. Afternoon relative humidities will be near 25 percent in the north and up to 45 percent elsewhere.

North and South Carolina will be partly cloudy. Winds will be southeast to south at 5 to 10 mph. High temperatures will be in the mid 60's to lower 80's.

Virginia will be partly cloudy with south to southwest winds at 5 to 10 mph. High temperatures will be in the 70's.
