

INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, JUNE 10, 2000 - 0900 MDT
NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

New large fires were reported in Florida and Southern California. Initial attack activity was moderate in Florida and minimal throughout the rest of the country. Higher relative humidities, cooler temperatures and some precipitation have aided containment efforts on all the large fires in the Great Basin and Southwest. The National Interagency Coordination Center mobilized helicopters, an airtanker, infrared equipment, engines, meteorological equipment, and miscellaneous overhead. Very high to extreme fire indices were reported in New Mexico, Arizona, Utah, Idaho, California, Nevada, Colorado, Oklahoma, Texas, Kansas, and Mississippi.

SOUTHWEST AREA LARGE FIRES:

RATTLESNAKE, Coronado National Forest. A Type II Incident Management Team (Leech) is assigned. The fire is in the foothills north of Tucson, AZ. Crews made good progress for the second day in a row, due to favorable weather conditions. Winds have caused some increase in the fire's acreage. Steep and rugged topography are making construction of firelines difficult.

CERRO GRANDE, Bandelier National Park. An Area Command Team (Mann) and two Type II Incident Management Teams (Carr and Smith) are assigned. The fire is near Los Alamos, NM. Crews continue to mop up, patrol and hold existing firelines. Rehabilitation efforts include contour tree falling, construction of log erosion barriers, mulch spreading, and hazardous tree removal.

VIVEASH, Santa Fe National Forest. A Type II Incident Management Team (Bedlion) is assigned. This fire is burning in ponderosa pine and mixed conifer five miles northwest of Pecos, NM. Fire activity was minimal due to higher humidities and some precipitation in the area. Progress on suppression and rehabilitation activities has been slow due to limited access and poor road conditions into the fire area.

OUTLET, Grand Canyon National Park. A Type II Incident Management Team (McElwain) is assigned. The fire is 25 miles south of Jacob Lake, AZ. Higher relative humidities and southwest winds yesterday assisted the suppression efforts. Crews are continuing to construct fireline on the southern perimeter and mop up on the north and west sides of the fire.

CHANCE, Socorro District BLM. A Type II Incident Management Team (Bustamante) is assigned. This lightning caused fire is burning in grass and light fuels 30 miles south of Datil, NM. The fire is burning actively inside containment lines. A burnout operation is underway.

PUMPKIN, Kaibab National Forest. A Type II Incident Management Team (Johnson) is assigned. The fire is 15 miles northwest of Flagstaff, AZ. Winds up to 30 mph caused no containment problems yesterday. The fire has been declared controlled and crews are continuing to mop up.

SOUTHERN AREA LARGE FIRES:

A Type II Incident Management Team (Kearney) is staged in Gainesville, FL.

BEE, Florida State Division of Forestry. This fire is in Glades County, northeast of Fort Myers, FL. Inaccessible terrain and strong winds are hampering containment efforts. A hunting lodge and pine plantations are threatened.

SHIP COMMAND, Florida State Division of Forestry. This fire, which was caused by lightning, is in Hillsborough County. It grew from 25 acres to 625 since the last report.

BUNDY LAKE, Florida State Division of Forestry. The fire is burning in heavy fuels 15 miles northeast of Gainesville, FL. A strike team of engines and a National Guard crew are continuing mop up operations.

LOUISE #3, Florida State Division of Forestry. The fire is located near Gainesville, FL. No new information was reported.

LOUISE #4, Florida State Division of Forestry. This fire is burning in heavy fuels near Gainesville, FL. No new information was reported.

CYPRESS #2, Florida State Division of Forestry. The fire is near Golden Gate, ten miles east of Naples, FL. No new information was reported.

DC COMMAND, Florida State Division of Forestry. The fire is located near Homestead, FL. No new information was reported.

JACKSON HOLE, Florida State Division of Forestry. The fire is burning in hardwood fuels near Cross City, FL. No new information was reported.

COUNTY LINE, Florida State Division of Forestry. This fire is near Okeechobee, FL. No new information was reported.

BRIGHT HOUR, Florida State Division of Forestry. This fire is in Desoto County. No new information was reported.

DANVILLE, Florida State Division of Forestry. The fire is located in Union County. This will be the last report unless new information is

received.

MICROWAVE, Florida State Division of Forestry. This fire is located in Osceola County, FL. Some flare-ups were reported on the fire.

EASTERN GREAT BASIN AREA LARGE FIRES:

UPPER SLIDE, Bridger-Teton National Forest. A Type II Incident Management Team (Saleen) is assigned. The fire is burning in subalpine fir, lodgepole pine and spruce 20 miles northeast of Jackson, WY. The fire received light rain which aided mop up operations and allowed for the use of Minimum Impact Suppression Tactics (MIST) to be utilized.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

CRYSTAL, Inyo National Forest. This lightning-caused fire is burning west of Olanha, Ca. The fire started on 6/5. Steep, rocky terrain and inaccessibility are challenging containment efforts. Air operations on the fire were temporarily suspended due to military aircraft operating close to the fire.

OUTLOOK:

*** A FIRE WEATHER WATCH IS POSTED IN NORTHEAST AND CENTRAL FLORIDA AND THE PANHANDLE FOR LOW RELATIVE HUMIDITIES ***

Florida will be mostly sunny in the north and partly cloudy with scattered showers and thunderstorms in the south. High temperatures will be in the mid 80's to the lower 90's. Winds will be east to southeast at 5 to 15 mph. Minimum relative humidities will be 30 percent in the panhandle and the northeast part of the state, and up to 55 percent in south Florida.

Arizona, New Mexico, southern Utah, southern Colorado, and southern Nevada

will become less windy and more humid as the trough moves east out of the Great Basin. Partly cloudy conditions and isolated wet thunderstorms will occur over the mountains. Arizona and the lower elevation areas will be sunny. Temperatures will range from the 70's in the northern mountains to near 105 in the deserts. Winds will be southwest to northwest at 10 to 20 mph with afternoon gusts to 25 mph. Minimum relative humidities will be 10 to 20 percent.

Montana and Wyoming will be partly cloudy, cooler and locally breezy. There is a chance of afternoon showers and thunderstorms. High temperatures will be in the 60's in the west and at higher elevations, and up to the 80's in the eastern part of both states. Winds will be southwest to west at 15 to 30 mph. The minimum relative humidities will be 20 to 30 percent.
