

INCIDENT MANAGEMENT SITUATION REPORT
 WEDNESDAY, SEPTEMBER 13, 2000 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL IV

CURRENT SITUATION:

One new large fire was reported in the Southwest Area. Crews reached containment goals on three fires, one in the Northern Rockies, one in the Western Great Basin and one in Southern California. Initial attack activity was light throughout the United States. There is a possibility of thunderstorms in California, Oregon and Washington due to subtropical moisture associated with Hurricane Linda. Very high to extreme fire indices were reported in Oregon, California, Idaho, Utah, Arizona, Nevada, Montana, Wyoming, Arizona, Colorado, Kansas, Arkansas, Texas and Oklahoma.

SOUTHERN AREA LARGE FIRES:

3 B FIRE COMMAND, Florida Division of Forestry. This fire is burning near Broward, FL in a State Conservation area. No new information was received.

NORTHERN ROCKIES AREA LARGE FIRES:

VALLEY COMPLEX, Bitterroot National Forest. A Type I Incident Management Team (Stutler) is assigned. These fires are seven miles south of Darby, MT. The complex consists of the Bear, Taylor, Taylor Spot, Hilltop, Razor, Fat and Mink fires. Precipitation and higher relative humidity are keeping the fire activity at a low level. Demobilization of resources continues. Reduction of acres is due to better mapping.

SKALKAHO COMPLEX, Bitterroot National Forest. A Type I Incident Management Team (Rutherford) is assigned and will be transitioning with Type 2 Incident Management Team (Hoff). This group of fires is ten miles southeast of Hamilton, MT. Included in the complex are the Bear and Coyote fires. The fire activity remains light with cooler temperatures and higher relative humidity.

MIDDLE FORK COMPLEX, Beaverhead-Deerlodge National Forest. A Type II Incident Management Team (Swope) is assigned. These fires are 30 miles southwest of Philipsburg, MT. The complex consists of the Falls Creek, Cougar Creek, Coyote Springs, Medicine Lake, Skalkaho Pass, Lick Creek and Cooper Creek fires. Crews continue to build direct fireline, mopup and secure existing containment lines. Rehabilitation has begun in some areas along the fire perimeter.

MUSSIGBROD COMPLEX, Beaverhead-Deerlodge National Forest. A Type II

Incident Management Team (Specht) is assigned. These fires are 12 miles northwest of Wisdom, MT. The complex includes the Mussigbrod and Maynard fires. A few interior hotspots were observed as rehabilitation continued on all divisions.

ALDER CREEK, Lolo National Forest. A Type II Incident Management Team (Davidson) is assigned. This fire is 31 miles southeast of Missoula, MT. Crews continued with direct fireline and mopup. Demobilization is in progress.

EASTERN GREAT BASIN AREA LARGE FIRES:

CLEAR CREEK COMPLEX, Salmon-Challis National Forest. A Type I Incident Management Team (Stam) is assigned. This complex consists of the Clear Creek, Marlin Springs, Full Circle and Sisters fires. The 3rd Battalion, 2nd Marines from Camp Lejeune, North Carolina, commanded by LTC Smith, is committed. A slight increase in fire activity occurred with some heavy interior fuels burning out. Fireline has been completed on the Marlin Springs fire. Rehabilitation of suppression lines is ongoing.

FONTENELLE, Bridger-Teton National Forest. This fire is 20 miles north of Kemmerer, WY. Cloud cover and higher relative humidity have diminished fire behavior.

SCF WILDERNESS, Salmon-Challis National Forest. Eleven wildland fires are currently burning within the Salmon Challis Wilderness Complex: Little Pistol, Indian Creek, Filly, Butts, Papoose, Parker, Packer Meadow, Shell Rock, Wilson Creek, Jackass and Jack Creek. Low intensity fire behavior has been observed. Recreation trails along Camas Creek and the Middle Fork are being reopened.

OUTLOOK:

Southern Texas and the Gulf Coast states can expect abundant moisture and scattered thunderstorms across the region as high pressure will build into the Texas region, and a cold front drops down into the southeast states. High temperatures will be in the 80's to 90's and near 100 in portions of central Texas. Minimum relative humidity will be 35 to 45 percent inland and 60 to 70 percent along the Gulf Coast. Winds will be east to south at 5 to 15 mph.

In the West, a weak cutoff low continues to build off the coast of California. This will help spread subtropical moisture from the remnants of Hurricane Linda northward into California and Oregon, then spreading into Washington later in the night. As a result, isolated showers and thunderstorms are possible across the region. Otherwise warm and dry conditions can be expected across the remainder of the west.

High temperatures in the West will be in the mid 70's to near 90, although much warmer in the southern deserts.

Minimum relative humidity in the west will generally range from 20 to near 40 percent along the coastlines and dropping to near 10 percent in the Southern California deserts.

Winds in the west will mostly be northwest to southwest at 10 to 20 mph.
