Humidity will be in the teens and winds will be north to east at 25 mph . In other parts of the west, a trough of low pressure will dip into the northern and central Rockies, bringing a chance for showers. High temperatures in much of the west will range from the 60's to the mid 80's. In the rest of the west temperatures will range from the 80's to 105.

Minimum humidities will generally be in the upper teens through the 40 's. Winds across the Pacific Northwest will be out of the north to east at 10 to 20 mph . Northwest winds of 15 to 25 mph will prevail in parts of Idaho, Wyoming, Montana, Utah and Colorado. The southwest states will have west to northwest winds under 15 mph .
