INCIDENT MANAGEMENT SITUATION REPORT WEDNESDAY, NOVEMBER 1, 2000 - 0730 MST NATIONAL PREPAREDNESS LEVEL I

CURRENT SITUATION:

The Southern Area reported three new large fires in Georgia, Virginia and Kentucky. Most of the Southern Area experienced moderate to heavy initial attack activity. A high pressure system will remain in place over most of the Southern Area today, causing continued warm temperatures and low relative humidity. Large fire activity is expected to continue. Containment was reached on four large fires, two in the Eastern Area and two in Kentucky. The National Interagency Coordination Center mobilized helicopters, air attack aircraft, radio equipment, meteorological equipment, crews and overhead resources to the Southern Area. Very high to extreme fire indices were reported in Georgia, Kentucky and North Carolina.

SOUTHERN AREA LARGE FIRES:

BRUSHY RIDGE, National Forests in North Carolina. A Type I Incident Management Team (Melton) is assigned. This fire is burning in the Linville Gorge Wilderness in steep terrain 20 miles north of Marion, NC. The fire continues to exhibit active behavior. Crews are working to contain a slopover on the southern edge of the fire. Low relative humidity is challenging containment efforts.

SANDERS, Daniel Boone National Forest. This fire is burning in hardwoods and leaf litter six miles west of Williamsburg, KY. Short range spotting was reported and heavy smoke is contributing to poor visibility in the area. Ten residences in the area are threatened.

PINNACLES, Shenandoah National Park. A Type I Incident Management Team (Stutler) is assigned. The fire is burning in rough terrain five miles southeast of Luray, VA. The fire has jumped Skyline Drive and is moving east and north toward the park boundary and private residences. Pinnacles Research Station and other historic structures within the park are threatened. Gusty winds are causing difficulties towards containment.

OLD RAG, Shenandoah National Park. This fire is ten miles southeast of Luray, VA. Winds are driving the fire east and south in rough terrain. Current threats are to private residences east of the park boundary.

PANTHER CREEK, Chattahoochee-Oconee National Forest. This fire was ignited by lightning on 10/26 in the Cohutta Wilderness near Chatsworth, GA. Inaccessibility and steep terrain are hampering containment efforts.

HONEY BEE, Daniel Boone National Forest. A Type II Incident Management Team (Kearney) is assigned. This fire is at the north end of Cumberland State Park. No other information was reported.

OUTLOOK:

- *** A RED FLAG WARNING IS POSTED IN EASTERN KENTUCKY FOR LOW AFTERNOON RELATIVE HUMIDITY ***
- *** A RED FLAG WARNING IS POSTED IN THE MOUNTAINS, FOOTHILLS AND PIEDMONT AREAS OF NORTH CAROLINA FOR LOW RELATIVE HUMIDITY ***
- *** A FIRE WEATHER WATCH IS POSTED IN THE EASTERN PORTION OF SOUTH CAROLINA FOR LOW RELATIVE HUMIDITY ***

High pressure will slowly move along the eastern seaboard by late this afternoon. This will continue to bring warm and dry conditions to the majority of the east coast.

The Carolinas will have mostly sunny skies with high temperatures in the mid 60's to upper 70's. Minimum afternoon humidity will range from 15 to 30 percent. Winds will be north to northeast at 10 to 15 mph.

Partly cloudy skies are expected in Kentucky with afternoon temperatures in the 70's and 80's. Relative humidity will be between 20 and 30 percent in the eastern part of the state and from 35 to 55 percent in the west. Winds will be out of the south to southeast at 5 to 15 mph.
