INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, NOVEMBER 8, 2000 - 0730 MST
NATIONAL PREPAREDNESS LEVEL II

## CURRENT SITUATION:

The Southern Area reported two new large fires, one each in Kentucky and Tennessee. Containment objectives were reached on four Southern Area large fires, two in Kentucky and one each in North Carolina and Tennessee. Initial attack activity was moderate in the south. A good chance of precipitation is predicted in the Appalachian states today, which will assist suppression efforts. The National Interagency Coordination Center processed orders for radio equipment and overhead resources to the Southern Area. Very high to extreme fire indices were reported in North Carolina, Virginia and California.

## SOUTHERN AREA LARGE FIRES:

NOLICHUCKY, Cherokee National Forest. A Type I Incident Management Team (Gage) is assigned. This complex consists of the Horsehitch and Rocky Top fires in Greene County, TN. Three structures have been confirmed destroyed on the Horsehitch fire. Protection of threatened structures is the priority.

SHENANDOAH COMPLEX, Shenandoah National Park. A Type I Incident Management Team (Stutler) is assigned. This complex consists of the Pinnacles and the Old Rag fires, which are five miles southeast of Luray, VA. The fire received light scattered rain. Fireline construction and burnout operations are occurring on the east flank of the fire. Rehabilitation plans are being developed.

SOUTHEAST DISTRICT COMPLEX, Kentucky State Division of Forestry. A Type I Incident Management Team (Frye) is assigned. These fires are burning in hardwoods intermixed with pine and brush in several counties surrounding Pineville, KY. Favorable weather conditions and the arrival of additional resources are allowing firefighters to make significant progress toward containment in all divisions.

BRUSHY RIDGE COMPLEX, National Forests in North Carolina. A Type I Incident Management Team (Melton) is assigned. The Brushy Ridge and Chimney fires are burning in the Linville Gorge Wilderness 20 miles north of Marion, NC. The complex did receive some precipitation and good progress is being made on mopup and fireline construction. Highway 1238 remains closed to public travel.

BLEVINS, Cherokee National Forest. The fire is five miles west of Roan Mountain, TN. No other information was received.

JENNINGS BRANCH, George Washington and Jefferson National Forests. This fire is ten miles northwest of Staunton, VA. Volunteer fire department engines are assisting in the suppression effort.

THOUSANDSTICKS, Daniel Boone National Forest. This fire, which started on 10/30, is two miles northeast of Hyden, KY. No new information was
reported. This will be the last report unless new information is received.

OUTLOOK:

A moist southwest flow will bring a good chance of rain showers from the Appalachians westward, and slight chance of rain to the east. High temperatures in the Appalachian region will be in the 50's and 60's in the west and in the 70's to the east. Winds will be northeast to southeast at five to 15 mph in most areas, except in the northwest portion of the region, where winds will be north at five to 10 mph . Minimum relative humidity will be 50 to 60 percent in eastern areas and between 70 and 85 percent in the west.

In southern California, winds will weaken as the upper trough moves east. Skies will be sunny with high temperatures in the upper 40's and 50's in the mountains, in the 60's along the coast and in the 70's to around 80 in the deserts. Winds will be northwest to northeast at 10 to 20 mph with gusts to 25 mph , and will decrease throughout the day. Minimum relative humidity will be 10 to 20 percent in the driest areas.
