OUTLOOK:

A low pressure system will exit the east coast Friday as another broad trough enters the Pacific Northwest. This trough will move across the northern plains and will carve a deep area of low pressure across the western Great Lakes by Sunday bringing a mix of precipitation to the region. The low pressure will move into the Southeast by Monday.

A ridge of high pressure is expected to push across the west by Saturday. Another fast moving system will enter the Pacific Northwest Monday, spreading rain and snow across the north through the remainder of the week.
