

INCIDENT MANAGEMENT SITUATION REPORT
 SATURDAY, MAY 5, 2001 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL 1

CURRENT SITUATION:

No new large fires were reported. Initial attack activity was moderate in the Eastern and Southern Areas and light elsewhere. Very high to extreme fire danger was reported in North Dakota, Arizona, New Mexico, Texas and Minnesota. High pressure remains settled over Florida bringing continued dry conditions to the state. A slow moving low pressure system over the Four Corners area of the Southwest will bring scattered rain showers and accumulating snow, mainly to the northern half. Heavy coastal fog and cooler temperatures are expected for northern California as a system approaches the Pacific Northwest.

SOUTHERN AREA LARGE FIRES:

JOE'S CREEK, National Forests in Mississippi. This fire is located near Beaumont, MS. Crews continue to burnout and secure firelines. Dry, windy conditions and low relative humidity are hampering containment efforts.

JOE'S CREEK	MS	MNF	232	90	5/5	29	0	1	0	0		35K
COUNTY LINE	FL	FNF	750	100	---	21	0	0	0	0		NR

FNF = National Forests in Florida

NORTHERN CALIFORNIA AREA LARGE FIRES:

M9, Mendocino National Forest. A Type 2 Management Team (Szczepanik) is assigned. This fire is located 20 miles south of Paskenta. Crews continue to mopup and improve containment firelines.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC	LOSS	\$\$\$ C-T-D
M9	CA	MNF	435	95	5/5	318	14	13	2	0		150K

OUTLOOK:

Dry conditions will continue in Florida due to a high pressure system that has settled off the eastern coast. High temperatures will be 80 to 90 degrees and winds will be from the northeast at 10 to 20 mph. Minimum relative humidity will range from 30 to 45 percent in the northern portion

of the state, and 50 to 60 percent elsewhere.

A weak trough is approaching the Oregon coast bringing cloudy and cooler conditions to northern California. High temperatures will range from the mid 60's on the coast, and the low 70's to low 80's inland. Wind will be west to northwest at 5 to 15 mph.

Accumulating snow and rain showers are forecasted for the northern portion of the Southwest due to a low pressure system. West winds are expected to increase by the afternoon at 15 to 30 mph, with locally higher gusts. High temperatures will be in the 40's and 50's in the mountains to the 70's and 80's across the central and southern areas. Minimum relative humidity will range from 10 to 25 percent in the south and 35 to 60 percent north.
