

INCIDENT MANAGEMENT SITUATION REPORT
 SUNDAY, JUNE 24, 2001 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Five new large fires were reported, two in California, one in Nevada and two in Utah. Four large fires were contained, two in Southern Area and two in the Eastern Great Basin. Moderate initial attack activity was reported in California, Eastern Great Basin, Southwest and Rocky Mountain Areas. Initial attack activity was light elsewhere. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Nevada, New Mexico, Oklahoma, Oregon, Utah and Wyoming.

NORTHERN CALIFORNIA AREA LARGE FIRES:

MARTIS, Nevada-Yuba-Placer Ranger Unit, California Department of Forestry. A Unified Command with a California Department of Forestry Type 1 Incident Management Team (Posten) and a National Type 1 Incident Management Team (Gelobeter) is in place. This fire is east of Truckee, CA and has burned into the Mt. Rose Wilderness Area. Contingency plans continue for an anticipated wind event this weekend.

RIDGE, Mendocino Ranger Unit, California Department of Forestry. This fire is west of Covelo, CA. High winds are causing the fire to spread quickly.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC	\$\$\$ LOSS	C-T-D

SOUTHWEST AREA LARGE FIRES:

WHITETAIL, Gila National Forest. This lightning caused fire is 60 miles northwest of Truth or Consequences, NM and is being managed to meet resource objectives. This will be the last report unless significant

activity occurs.

OUTLOOK:

*** A RED FLAG WARNING HAS BEEN POSTED IN SOUTHEAST IDAHO FOR STRONG WINDS ***

*** A FIRE WEATHER WATCH HAS BEEN POSTED IN THE WESTERN UTAH DESERTS FOR STRONG WINDS AND LOW RELATIVE HUMIDITY ***

*** A FIRE WEATHER WATCH HAS BEEN POSTED IN THE FLORIDA PANHANDLE FOR LOW RELATIVE HUMIDITY ***

The trough moving inland from the Pacific will bring strong winds to southeast Idaho. High temperatures will be 75 to 85 degrees and minimum relative humidity will range from 14 to 24 percent. Winds will be southwest at 25 to 35 mph with gusts around 40 mph.

The approach of the Pacific trough has dried out much of western Utah,

creating mostly sunny skies and windy conditions. High temperatures will be from 85 to 89 degrees, with minimum relative humidity ranging from 7 to 17 percent. Winds will be west to southwest at 20 to 30 mph with gusts around 40 mph.

A dry airmass has moved into northern Florida in the wake of a cold front, while southern Florida remains under a moist airmass. Skies will be partly to mostly cloudy with isolated showers and thunderstorms to the north and scattered in the south. High temperatures will be 85 to 90, with minimum relative humidity around 35 percent in the panhandle, and 50 to 55 percent elsewhere. Winds will be north to northwest at 5 to 10 mph.

The Pacific trough will be over California and Nevada bringing mostly sunny to partly cloudy skies. High temperatures will be no warmer than 90, except for 105 to 110 in the southern Nevada deserts. Minimum relative humidity will be 10 to 20 percent. Winds will be southwest at 10 to 20 mph in California, and 15 to 30 mph in Nevada.

High pressure will continue over the core of mainland Alaska, with warmer temperatures and winds remaining light. High temperatures will be 75 to 85, with minimum relative humidity at 25 percent. Winds will be variable at 5 mph.

Moisture flowing around high pressure will continue to bring some afternoon showers and thunderstorms to Arizona and New Mexico. High temperatures throughout the area will be in the 80's and 90's, and 100 to 105 in the deserts. Minimum relative humidity will be 15 to 20 percent. Winds will be south to southwest at 10 to 20 mph, with afternoon gusts around 30 mph in western Arizona.
