

INCIDENT MANAGEMENT SITUATION REPORT
 WEDNESDAY, JULY 11, 2001 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Seven new large fires were reported, two in Rocky Mountain, four in the Northwest and one in the Northern Rockies Area. One large fire reached containment in Colorado. Initial attack activity was heavy in northern California and the Northwest, moderate in the Rocky Mountain Area, and light elsewhere. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Minnesota, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

A Idaho Department of Lands contract single engine air tanker working a fire in Lewis County, Idaho crashed yesterday fatally injuring the pilot. A Type 2 crew working the Thirty Mile #103 fire on the Okanogan National Forest deployed fire shelters during blowup conditions. One crew person has been transported to a Seattle burn unit and four others were treated at local medical facilities. Four crew members remain unaccounted for at this time.

NORTHWEST AREA LARGE FIRES:

THIRTY MILE #103, Okanogan National Forest. A Type 1 Incident Management Team (Stutler) is assigned.

LIBBY SOUTH, Northeast Washington State. A Unified Command with a Washington State Department of Natural Resources Type 2 Team (Dunton) and a National Type 2 Incident Management Team (Halloway) is in place. This human caused fire is 15 miles south of Twisp, WA. Low relative humidity will continue to allow for active burning.

LOST CREEK, Burns District, BLM. This fire burning in heavy juniper and sage is in Harney County, OR. Strong winds and low relative humidity continue to hamper containment efforts. Historic buildings in the area are threatened.

HORSE SPRING, Burns District, BLM. This fire burning in ponderosa pine, juniper, bitterbrush and sagebrush is in Harney County, OR. One hundred foot flame lengths were observed. Crews are working to keep the fire east of County Road 47 and out of the old Pine Springs Basin burn.

DAM TOWER, Colville Agency, BIA. This fire is less than a mile northeast of the Coulee Dam, WA. The fire made significant runs in light fuels with spotting ahead of the fire.

EASTERN GREAT BASIN AREA LARGE FIRES:

GREYS RIVER COMPLEX, Bridger-Teton National Forest. A Type 2 Incident Management Team (Broyles) is assigned. This lightning caused complex, comprised of the Deer, Fawn, Murphy Creek, and Blind Bull fires, is 14 miles southeast of Alpine, WY. While the fires received precipitation very little reached the ground due to thick canopy cover. Crews are currently gridding through heavy fuels for hot spots.

GREYS RIVER COM	WY	BTF	233	95	7/11	305	11	7	2	0	704K

ROCKY MOUNTAIN AREA LARGE FIRES:

KELLOG, Craig District, BLM. This lightning caused fire is 12 miles northwest of Meeker, CO is within the Black Mountain Wilderness Study Area. The fire is in monitor status.

ILES MOUNTAIN, Craig District, BLM. This lightning caused fire is 15 miles southwest of Craig, CO. Heavy thunderstorm activity limited aircraft use.

MAD CREEK, Routt National Forest. This fire is in the Mt. Zirkel Wilderness Area, 11 miles north of Steamboat Springs, CO. Burnout operations are taking place.

GMF = Grand Mesa-Uncompahgre-Gunnison National Forest

NORTHERN ROCKIES AREA LARGE FIRES:

LIBBY CREEK, Kootenai National Forest. A Type 2 Incident Management Team (Swope) is assigned. This fire is seven miles south of Libby, MT. Low relative humidity and high temperatures are impacting containment efforts. Dry conditions are causing spot fires to start readily.

OUTLOOK:

A southerly flow of air aloft will continue to spread and unstable air into the Pacific Northwest bringing partly cloudy skies with scattered showers and mostly wet thunderstorms. High temperatures will be 85 to 90 east of the Cascade Range and 80 to 85 in western Washington and northwest Oregon. Minimum relative humidity will range from 15 to 25 percent east and above 35 percent west. Winds will be southwest to northwest at 3 to 8 mph and 10 to 12 mph on peaks and ridges. There will be wind gusts up to 35 mph near stronger thunderstorms.

High pressure centered east of the Rocky Mountain and Great Basin region will continue to pump monsoonal moisture into much of the area. This will bring scattered afternoon thunderstorms, with brief heavy rain possible with these storms. Southwest Idaho will be partly cloudy and dry. High temperatures will be 80 to 95, except for 95 to 110 across southern Nevada. Minimum relative humidity will range from 20 to 30 percent. Winds will be variable at 5 to 15 mph, except for Nevada which will be southwest to west at 10 to 15 mph.
