

INCIDENT MANAGEMENT SITUATION REPORT
 WEDNESDAY, JULY 18, 2001 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Four new large fires were reported, one each in Colorado, Oklahoma, New Mexico and Idaho. One large fire reached containment in Oklahoma. Initial attack activity was moderate in the Southern Area, and light elsewhere. Very high to extreme fire indices were reported in Arizona, California, Colorado, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

BALD PETER, Warm Springs Agency, BIA. A Type 2 Incident Management Team (Jackson) is assigned. This fire is burning in thick stands of beetle killed lodgepole pine 12 miles northwest of Camp Sherman, OR. Crews continue to strengthen and improve containment lines. Mopup has begun on portions of the fire. Steep slopes and snags continue to be a major concern.

THIRTY MILE #103, Okanagan National Forest. A Type 1 Incident Management Team (Stutler) is assigned. This human-caused fire is burning in logging slash and continuous stands of timber 20 miles north of Winthrop, WA. Significant rainfall limited air operations, slowed fireline construction and improvement of the containment line. Wilderness containment strategy continues to be implemented.

DOG CREEK, Wenatchee National Forest. A Type 2 Incident Management Team (Johnson) is assigned. This fire is 11 miles southwest of Clifdell, WA. Crews continue cold trailing and mopup along the north and west boundaries. The fire is continuing an easterly spread through steep terrain. Heavy fuels are impeding containment efforts.

EASTERN GREAT BASIN AREA LARGE FIRES:

BEEF HOLLOW, Northwest State, Utah State. This fire is south of Bluffdale, UT. The fire made significant runs to the north due to strong winds and low relative humidity. Extreme fire behavior was experienced in the northwest corner which threatened containment lines. During the night, major northerly runs towards a subdivision were experienced.

NORTH SLATER, Lower Snake River District, BLM. The fire is burning in

light fuels seven miles southeast of Boise, ID. The fire grew to more than a thousand acres in less than two hours. Local roads were closed for a period of time.

FORT RANCH, Northwest State, Utah State. This fire is north of Promontory Mountain, UT. Strong winds and low relative humidity continue to impede containment. Three slopovers occurred and were quickly contained.

KEG MOUNTAIN, Richfield Field Office, BLM. This fire, burning in cheatgrass, pinyon pine and juniper, is 35 miles northwest of Delta, UT. Strong winds continued to push the fire. High winds and low relative humidity continue to hamper containment efforts.

SANDY, Northwest State, Utah State. This fire is west of the North Promontory Mountains, UT. Gusty winds, steep terrain and low relative humidity are hampering containment efforts.

ROCKY MOUNTAIN AREA LARGE FIRES:

ECKLAND, Little Snake Field Office, BLM. This fire is burning in the Diamond Breaks Wilderness Area and Dinosaur National Park, 50 miles east of Vernal, UT. High rates of spread and extreme fire behavior were seen due to single digit relative humidity, high temperatures and high winds. Resources threatened are historic cabins, private land, ranches and secondary residences. Engines are in place for structure protection.

SOUTHWEST AREA LARGE FIRES:

CAPULIN, Santa Fe National Forest. This fire is 23 miles northwest of Las Vegas, NM. The fire is in a confine strategy with no significant events occurring. Light precipitation was received on the fire.

SOUTHERN AREA LARGE FIRES:

QUARTZ MOUNTAIN, Oklahoma Division of Forestry. This fire is three miles southeast of Mangum, OK. The fire is running and torching in live oak brush, cedar and tall grasses. Rocky terrain is making line construction difficult.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOSS	\$\$\$ C-T-D

EASTERN AREA LARGE INCIDENTS:

NEW RIVER FLOOD, New River Gorge National River. A National Park Service All-Risk Incident Management Team (Panko) is assigned. Maintenance staff have completed work using heavy equipment to help the National Guard remove massive amounts of debris from the neighboring community of Minden, WV. Restoration work for the Fayette Station boat access facility has commenced using heavy equipment.

OUTLOOK:

An upper level trough continues over the Pacific Northwest resulting in a dry southwest flow at the surface and aloft. This will bring mostly sunny skies and a slight chance of afternoon, mainly dry thunderstorms to Utah, with partly sunny conditions to southern Idaho. High temperatures will be 75 to 85 in the mountains, and 90 to 100 in the lower elevations of Utah. Idaho's high temperatures will be 65 to 75 in the mountains, and 75 to 85 at lower elevations. Minimum relative humidity will range from 5 to 15 percent in Utah, and 15 to 25 percent at lower elevations of Idaho and 20 to 32 percent in the mountains. Winds will be south to southwest in Utah at 15 to 25 mph, with 25 to 35 mph gusts mainly in the afternoon. Idaho will have southwest winds at 5 to 15 mph with higher gusts over the ridges.

A relatively dry southwest flow will continue over the Rocky Mountain

region. This will bring partly sunny skies with isolated afternoon thunderstorms producing dry lightning and gusty winds. These storms will be most numerous over northern Wyoming and southeast Colorado. High temperatures will be in the 70's to lower 80's in the mountains, and 85 to 95 at lower elevations. Minimum relative humidity in Colorado will range from 15 to 25 percent, except for 10 to 20 percent on the western slope. Wyoming will be 15 to 25 percent south and 25 to 40 percent north. Winds will be southwest at 15 to 30 mph in Colorado. In Wyoming, winds will be southwest at 5 to 20 mph.

A trough of low pressure continues over the Pacific Northwest bringing mostly cloudy skies west of the Cascades with a few light showers. The eastside will have partly cloudy skies north to sunny south. High temperatures will be in the mid 60's to 70's in western Washington and northwest Oregon. Eastern Oregon and Washington will be near 80, except for higher elevations which will be in the upper 60's and 70's. Minimum relative humidity will be above 50 percent west of the Cascades, otherwise it will range from 25 to 35 percent in the valleys east of the Cascade range. Winds will be west to northwest less than 10 mph, with some gusts up to 20 mph on the ridge tops of the Cascades and Columbia River Gorge.
