

INCIDENT MANAGEMENT SITUATION REPORT
 THURSDAY, JULY 19, 2001 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

One new large fire was reported in New Mexico which was contained. Two large fires reached containment in Idaho and Utah. Initial attack activity was moderate in the Southern Area, and light elsewhere. Very high to extreme fire indices were reported in Arizona, California, Colorado, Nevada, Oregon, Texas, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

BALD PETER, Warm Springs Agency, BIA. A Type 2 Incident Management Team (Jackson) is assigned. This fire is burning in thick stands of beetle killed lodgepole pine 12 miles northwest of Camp Sherman, OR. The fire received a small amount of precipitation, resulting in difficult footing. As a result of the precipitation, progress in mopping up has been slowed. Unburned islands of heavy fuel adjacent to the fire perimeter continue to be a containment threat.

THIRTY MILE #103, Okanagan National Forest. A Type 1 Incident Management Team (Stutler) is assigned. This human-caused fire is burning in logging slash and continuous stands of timber 20 miles north of Winthrop, WA. The wilderness containment strategy has been implemented.

DOG CREEK, Wenatchee National Forest. A Type 2 Incident Management Team (Johnson) is assigned. This fire is 11 miles southwest of Clifdell, WA. Crews continue to mopup and cold trailing along the west and southwest perimeter. Acreage change is due to better mapping.

DOG CREEK	WA	WEF	550	30	7/23	385	13	2	4	0	0	1.1M

EASTERN GREAT BASIN AREA LARGE FIRES:

FORT RANCH, Northwest State, Utah State. This fire is north of Promontory Mountain, UT. A large burnout operation was conducted and fireline construction occurred on the south perimeter. Strong gusty winds, low relative humidity, smoke, high temperatures, and steep terrain are impeding containment efforts.

KEG MOUNTAIN, Richfield Field Office, BLM. This fire, burning in cheatgrass, pinyon pine and juniper 35 miles northwest of Delta, UT. Good progress was accomplished overnight. A Type III Alaska Incident Management

Team is assisting in the suppression effort.

MEADOW 2, Richfield Field Office, BLM. Most of this incident is located on the Fishlake National Forest. Use of dozers and airtankers were used successfully in the suppression effort.

SANDY, Northwest State, Utah State. This fire is west of the North Promontory Mountains, UT. Numerous hot spots were discovered under the junipers. Strong gusty winds, high temperatures, low relative humidity and steep terrain are hampering containment efforts

ROCKY MOUNTAIN AREA LARGE FIRES:

ECKLUND COMPLEX, Little Snake Field Office, BLM. A Fire Use Management Team (Cook) has been ordered. This complex of lightning caused Wildland Fire Use fires are burning in the Diamond Breaks Wilderness Area and Dinosaur National Park, 50 miles east of Vernal, UT. The complex consists of the Ecklund and the Davis Draw fires. Engines are in place for structure protection. The rate of spread has been slowed due to lower wind speeds and the fire running into last year's Buster Flats Fire.

OUTLOOK:

*** A FIRE WEATHER WATCH HAS BEEN POSTED FOR PARTS OF SOUTHERN WYOMING FOR DRY FUELS, STRONG WINDS, AND A DRY UNSTABLE AIRMASS.

A relatively dry southwest flow will continue over the Rocky Mountain region. This will bring widely scattered to scattered dry thunderstorms to northern Wyoming and south-central Colorado, with isolated dry afternoon thunderstorms elsewhere. High temperatures will be in the 70's in the mountains, and upper 70's to lower 90's at lower elevations. Minimum relative humidity will range from 15 to 25 percent across Colorado, 10 to 20 percent along the western slope and southern Wyoming, and 15 to 30 percent in the mountains. Colorado will have southwest winds at 10 to 20 mph, and 15 to 30 mph across mountain ridges. Winds in Wyoming will be southwest at 15 to 30 mph south and 10 to 15 mph north.

An upper level trough continues over the Pacific Northwest sending and upper level disturbance across Idaho for an increasing chance of thunderstorms. A southwest flow over Utah will continue with dry and windy conditions except for a chance of thunderstorms south. This will bring partly sunny skies with widely scattered afternoon thunderstorms to southern Utah and Idaho, and isolated thunderstorms elsewhere. High temperatures in Utah will be 75 to 85 in the mountains, and 85 to 95 at

lower elevations. Idaho will have high temperatures from 65 to 75 in the mountains, and 75 to 85 at lower elevations. Minimum relative humidity will range from 5 to 15 percent in Utah, and 15 to 30 percent in Idaho. Winds will be south to southwest at 15 to 25 mph with 25 to 35 mph gusts in Utah. Winds in Idaho will be southwest at 10 to 15 mph.

A trough of low pressure continues over the Pacific Northwest bringing mostly cloudy skies west of the Cascades with a few light showers. The eastside will have partly cloudy skies with a threat of wet thundershowers over southeast Oregon. High temperatures will be in the 60's to mid 70's in western Washington and Oregon to near 80 in southwest Oregon. Eastern Oregon and Washington will be 75 to 82 in the lower elevations. Minimum relative humidity will be above 50 percent west of the Cascades, with 25 to 35 percent in the valleys east of the Cascade range and near 15 percent in southeast Oregon deserts. Southeast Oregon will experience wind gusts up to 30 mph. Else where winds will be west to northwest under 10 mph except for 10 to 15 mph along ridge tops.
