

INCIDENT MANAGEMENT SITUATION REPORT
 TUESDAY, JULY 24, 2001 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Two new large fires were reported, one each in California and Utah. Six large fires were contained, three in Utah, two in Washington, and one in California. Initial attack activity was moderate in Northwest, Southwest, Northern California, and Southern California Areas, and light elsewhere. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Nevada, New Mexico, Oregon, Texas, Utah, and Wyoming.

EASTERN GREAT BASIN AREA LARGE FIRES:

GREEN KNOLL, Bridger-Teton National Forest. A Type 1 Incident Management Team (Carvalho) is assigned. This fire is six miles southwest of Jackson, WY. Approximately 175 primary residences continue to be threatened. Vigorous fire behavior was observed; spotting occurred one half mile ahead of the fire, and 1000 hour fuels readily ignited from firebrands.

Y MOUNTAIN, Unita National Forest. This human-caused fire is two miles east of Provo, UT. Steep, rocky terrain and heavy fuel loading are impeding containment efforts.

JACKSON WASH, Cedar City Field Office, BLM. This human-caused fire is 33 miles northwest of Cedar City, UT. Crews and engines have made significant progress in containment efforts.

NWS = Northwest State, Utah State
 SCS - South Central State, Utah State

ROCKY MOUNTAIN AREA LARGE FIRES:

ECKLUND COMPLEX, Little Snake Field Office, BLM. A Fire Use Management Team (Cook) has been assigned. This complex of lightning caused Wildland Fire Use fires is in the Diamond Breaks Wilderness Study Area, 50 miles east of Vernal, UT. Crews completed fireline along the north side of the complex, near the Green River.

OUTLOOK:

A southwest flow over the Great Basin will bring sunny, dry, and warm conditions to Utah and southern Nevada, with partly cloudy skies elsewhere. Isolated, dry thunderstorms are expected in the north and central portions of Nevada, with a slight chance of thunderstorms forecast for the east and central mountains of Idaho. High temperatures will be in

the low 80's to mid 90's in the lower elevations, 70 to 80 in the mountains, and near 100 to 110 in the southern deserts. Minimum relative humidity will range from 20 to 30 percent in the mountains and 10 to 20 percent in the lower elevations, except in Utah and eastern Nevada which will be 5 to 15 percent. Over the southern half of the Great Basin, winds will be south to southwest at 10 to 20 mph, gusting to 30 mph in central and southwest Utah and variable at 5 to 15 mph elsewhere.

A southwest flow will bring monsoonal moisture to the Rocky Mountain Area. Partly cloudy skies and isolated to scattered afternoon and evening thundershowers are expected; those over northwest Colorado producing little rainfall. High temperatures will be 80 to 90 in the lower elevations and 70 to 80 in the mountains. Minimum relative humidity will range from 15 to 25 percent, except 10 to 15 percent in west-central and northwest Colorado. Winds will be south to southwest at 5 to 15 mph in Wyoming, west to southwest at 10 to 20 mph in western Colorado, and variable at 5 to 15 mph elsewhere.

High pressure building over the Pacific Northwest will bring sunny skies with a warming and drying trend. High temperatures will be in the mid 70's to near 90 over most of the area and in the 90's to near 100 in southern Oregon. Minimum relative humidity will range from 15 to 25 percent inland and 20 to 30 percent in the mountains. Winds will be northwest at 5 to 10 mph, gusting to 25 mph in southeast Oregon and in the Columbia River Gorge.

High pressure over California will bring sunny skies to the area with isolated thundershowers in the Sierra Nevada Mountains. High temperatures will be in the 60's and 70's along the coast, mid 80's to mid 90's inland, and 100 to 110 in the southern deserts and northern inland areas. Minimum relative humidity will range from 8 to 18 percent inland, and winds will be westerly at 5 to 15 mph.
