

INCIDENT MANAGEMENT SITUATION REPORT
 SATURDAY, JULY 28, 2001 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Six new large fires were reported, two in Idaho, two in Oregon, one in Nevada and one in southern California. Two large fires was contained in northern California and one in Idaho. Initial attack activity was light nationwide. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

OWYHEE RIVER, Vale District, BLM. This lightning caused fire is located 15 miles northeast of Burns Junction, OR. It is burning in a Wilderness Study Area in light to medium fuels in a remote area. Shifting winds are hampering containment efforts.

EASTERN GREAT BASIN AREA LARGE FIRES:

GREEN KNOLL, Bridger-Teton National Forest. A Type 1 Incident Management Team (Carvelho) is assigned. This fire is located along Mosquito Creek, southwest of Wilson and approximately 6 miles southwest of Jackson, WY. A unified command with Teton County Fire Department has been established. A major effort was made to keep the fire from spreading into the housing subdivisions. Strong wind gusts caused some spotting and the fire burned actively most of the night.

SNOWSHOE, Salmon-Challis National Forest. A Type 2 Incident Management Team (Saleen) is assigned. This fire is 25 miles northwest of Stanley, ID. Crews continue to improve line and extinguish hot spots along the west and south flanks of the fire. Afternoon winds caused the fire to make runs and spotting in sub alpine fir was observed. A spike camp has been established on Pistol Creek Ridge.

FLEMING CREEK, Lower Snake River District, BLM. This human caused fire is located 8 miles north of Horseshoe Bend, ID. The fire is burning in steep and rugged terrain. No threats to nearby residences are anticipated.

DOE FLAT, Lower Snake River District, BLM. This human caused fire is located 11 miles north of Three Creek. The fire is burning in fine fuels

in a remote area. Engines are making good progress towards containment.

NORTHERN CALIFORNIA AREA LARGE FIRES:

STREAM, Plumas National Forest. A Type 2 Incident Management Team (Szczepanic) is assigned. A Type 1 Incident Management Team (Raley) has been ordered to assume management of the fire. The teams will begin transition on Sunday. This fire is 25 miles northeast of Quincy, CA. Current threat is to developed campgrounds, a Forest Service work center, summer residences, a bald eagle nesting area, a historical cabin in the vicinity of Antelope Lake and the Thompson Peak semi-primitive area. On 7/26 a mandatory evacuation of Antelope Lake recreation area took place and a forest closure was issued for a three mile radius of the Antelope Lake area. Numerous structures remain threatened.

WESTERN GREAT BASIN AREA LARGE FIRES:

TABOR CREEK, Elko Field Office, BLM. A Type 2 Incident Management Team (Murphy) is assigned. This fire, burning in grass and sagebrush, is 13 miles north of Metropolis, NV. Crews will continue to construct and hold fireline and begin mopup.

IBAPAH, Eastern Nevada Agency, BIA. This lightning caused fire is 50 miles south of Wendover, NV on the Goshute Indian Reservation. Engine crews are making good progress towards containment and some demobilization was anticipated last night.

OLD WELL, Ely Field Office, BLM. This lightning caused fire is 30 miles northeast of Ely, NV. Fuels are grass, sage and pinon/ juniper. Fire behavior observed included running, torching and spotting. Current threats are to livestock grazing and wildlife habitat.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

BRICEBURG, Sierra National Forest. A Unified Command with California Department of Forestry (Hodson) and a Geographic area Type 2 Incident Management Team (Rios) has been established. This fire is located 15 miles east of Mariposa, CA. Aviation resources are assisting with line construction due to the remote location. Secondary dozer line construction is now complete. A burn action plan is complete for a firing operation near Sweetwater drainage. Direct line construction utilizing Type I Helicopters is a top priority today.

SHELBY, San Bernardino National Forest. The fire is located northwest of Devore, CA. A Type II Incident Management Team has been ordered and will arrive later today.

ROCKY MOUNTAIN AREA LARGE FIRES:

MAD CREEK, Routt National Forest. This fire is in the Mount Zirkel Wilderness Area, 11 miles north of Steamboat Springs, CO. Numerous spot fires located along the southern perimeter are showing up as a result of fuels drying out. A burnout operation utilizing a helitorch is planned for 7/29.

ECKLUND COMPLEX, Little Snake Field Office, BLM. A Fire Use Management Team (Cook) is assigned. This complex of lightning caused Wildland Fire Use fires is in the Diamond Breaks Wilderness Study Area, 50 miles east of Vernal, UT. A slow rate of spread was observed on the Ecklund fire and blackline was established to prepare for a burnout. Observed activity on the Davis Draw fire was minimal yesterday.

SOUTHWEST AREA LARGE FIRES

VISTA, Grand Canyon National Park. A Fire Use Management Team (Zimmerman) is assigned. This lightning caused Wildland Fire Use fire, which started on 7/15, is five miles east of the North Rim of the park. The fire burned more actively with the increase of temperatures. Helicopters were used to check the spread at the canyon rim on the north side. The Cape Royal Road from the Point Imperial Junction to Cape Royal remains closed to visitor use.

PINE, Prescott National Forest. This lightning caused fire, which started on 7/2, is in the Pine Mountain and Cedar Bench Wilderness Areas, 18 miles southeast of Camp Verde, AZ. The fire has made runs into the basin north of Skeleton Ridge and east of Little Mesa below Verde Rim. Structure protection was put into place at Mt. Ranch.

OUTLOOK:

*** A RED FLAG WARNING HAS BEEN POSTED IN WESTERN AND CENTRAL WYOMING FOR WINDS, A DRY AND UNSTABLE AIRMASS, DRY FUELS AND WARM TEMPERATURES ***

*** A FIRE WEATHER WATCH HAS BEEN POSTED IN SOUTHEAST OREGON FOR STRONG WINDS AND LOW HUMIDITY ***

*** A FIRE WEATHER WATCH HAS BEEN POSTED IN SOUTHERN IDAHO FOR WINDS, DRY UNSTABLE AIRMASS, DRY FUELS AND WARM TEMPERATURES ***

A strong high pressure aloft will bring warmer and drier weather across the Rockies. A Pacific front will move through Montana and northern Wyoming bringing an increase in westerly winds. Colorado will be mostly sunny with increasing winds. There will be a chance of isolated afternoon thunderstorms in the southern Colorado mountains. High temperatures will be in the 70's to the mid 80's in the mountains, and in the 80's and lower 90's for the lower elevations. Minimum relative humidity will range from 5 to 12 percent in western Wyoming, and 15 to 30 percent elsewhere. Winds will be west to southwest at 15 to 30 mph with gusts to 50 mph in western Wyoming. Colorado will have westerly winds at 10 to 20 mph.

A trough over the Pacific Northwest will bring cooler temperatures and an increase in westerly winds across north and central portions of the Great Basin. A ridge of high pressure will maintain warm temperatures, low humidity and light winds over the southern portions of the area. It will be mostly sunny with isolated afternoon thunderstorms predicted for portions of Utah. Central and southern Idaho will be sunny with mainly dry thunderstorms over the mountains. High temperatures will be mid 70's to

lower 80's in the mountains, and 80's to lower 90's at lower elevations. Minimum relative humidity will range from 8 to 18 percent at lower elevations of Utah, and 15 to 25 percent in the mountains. Winds will be southwesterly at 15 to 25 mph with higher gusts. Idaho will have minimum relative humidity ranging from 5 to 15 percent, except 15 to 25 percent in the southwest. Minimum relative humidity will range from 10 to 20 percent, with winds at 15 to 35 mph with gusts to 45 mph . Nevada will be mostly sunny. High temperatures will be 80 to 95, except 105 to 115 in southern part of the state. Minimum relative humidity will range from 10 to 20 percent in the northwest and 6 to 12 percent elsewhere. Winds will be southwest to west at 15 to 25 mph in the north and central portions and 5 to 15 mph across the south.

As the upper level trough moves into the Pacific Northwest westerly winds will increase. Some light rain is expected in western Washington and northwest Oregon. Scattered showers and possible isolated thunderstorms are forecasted in eastern Washington and northeast Oregon. High temperatures will be in the 60's to 70's in the north, and lower 80's in the south. Relative humidity will increase except in southern Oregon where it will be around 15 percent. Winds will be from the west at 15 to 25 mph with local gusts to 35 mph across eastern Washington and Oregon.

Northern California will be mostly sunny and a little cooler with morning fog along the coast. High temperatures will be in the 60's and 70's near the coast and 80's to near 100 inland. Minimum relative humidity will range from 50 to 60 percent along the coast and 10 to 20 percent inland. Winds will be west to southwest at 8 to 18 mph with gusts from 20 to 30 mph over the mountains. Southern California will be mostly sunny with morning coastal fog and low clouds. High temperatures will be in the 60's and 70's along the coast, 80's and 90's inland, 105 to 114 in the lower deserts and near 120 in Death Valley. Minimum relative humidity will range from 8 to 15 percent inland and 25 to 40 percent in the inland coastal area. Winds will be south to southwest 5 to 15 mph.
