

INCIDENT MANAGEMENT SITUATION REPORT  
 MONDAY, AUGUST 6, 2001 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Two new large fires were reported, one in Eastern Area and one in Western Great Basin. One large fire was contained in Eastern Great Basin. Initial attack activity was light nationwide. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

ROCKY MOUNTAIN AREA LARGE FIRES:

ELK MOUNTAIN COMPLEX, Black Hills National Forest. A Type 1 Incident Management Team (Hart) is assigned. This complex of fires consisting of Elk Mountain 2 and Rogers Shack, is ten miles southeast of Newcastle, WY. Crews made significant progress on fireline construction and mopup is beginning. Evacuated homeowners along the Pass Creek road were allowed to return to their residences.

MAD CREEK, Routt National Forest. A Fire Use Management Team (Cook) will transition with the current team on 8/6. This fire is in the Mount Zirkel Wilderness Area, 11 miles north of Steamboat Springs, CO. The reduction in acreage is due to more accurate mapping. Two small spot fires were located and quickly contained prior to a wind event from a passing thunderstorm.

DINWOODY, Shoshone National Forest. This fire is located in the Fitzpatrick Wilderness Area 22 miles south of Dubois, WY and is burning in rocky terrain with scattered pockets of timber.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC	\$\$\$ LOSS	C-T-D
ELK MOUNTAIN CO	SD	BKF	26770	80	8/6	1030	22	99	12	6	3.7M

DINWOODY	WY	SHF	500	0	9/20	9	0	0	0	0	6K	

NORTHERN ROCKIES AREA LARGE FIRES:

ARTHUR, Yellowstone National Park. A Type 1 Incident Management Team (Frye) is assigned. This fire is 55 miles west of Cody, WY. High relative humidity kept fire activity down, although isolated interior torching was observed. Evacuation of the east entrance remains in place, and the East Entrance road remains closed at the Yellowstone National Park boundary. Structure protection preparation continues along Highway 20 from the East Entrance to Fishhawk Creek.

WEIGIEN, Southern Land Office, Montana Department of Natural Resources and Conservation. This fire, burning in shrub pinyon juniper, ponderosa pine, grass and sagebrush, is 14 miles north of Greycliff, MT. Active torching,

spotting and running were observed. Adjacent residences have been alerted to evacuation potential.

HOPPE, Gallatin National Forest. A Type 2 Incident Management Team (Hoff) is assigned. This fire is 15 miles northwest of Gardiner, MT. Crews continued to make good progress on handline construction. The fire is active on the east perimeter with occasional single tree torching observed. Steep terrain, shifting winds and inaccessible areas continue to impede containment efforts.

WESTERN GREAT BASIN AREA LARGE FIRES:

STAG, Elko Field Office, BLM. A Type 2 Incident Management Team (Burdick) is assigned. This lightning caused fire is located 35 miles northeast of Elko, NV. Resources threatened are mule deer winter range, sage grouse habitat, elk and antelope habitat and livestock grazing allotments.

DELANO, Elko Field Office, BLM. A Type 2 Incident Management Team (Broyles) has been ordered. This fire is burning in pinyon juniper, grass and sagebrush 20 miles southeast of Jackpot, NV. The fire continued running, torching, crowning and spotting. Significant runs to the west, east and north were observed.

MM367, Elko Field Office, BLM. This fire, burning in sagebrush and pinyon juniper, is 17 miles southeast of Wells, NV. Steep rocky terrain, low relative humidity and high temperatures are slowing containment efforts.

WATER CANYON, Ely Field Office, BLM. This fire, burning in pinyon juniper and sagebrush, is 45 miles northeast of Eureka, NV. The fire continued to torch within the interior. Crews were able to contain all spot fires and hold the perimeter.

SID = Upper Snake River District, South-Central Idaho Area, BLM

OUTLOOK:

High pressure centered over eastern Wyoming and western South Dakota continues to transport some monsoonal moisture into Colorado. Wyoming and western South Dakota will be hot and dry with mostly sunny skies. Colorado will have isolated to scattered afternoon and evening thunderstorms, with

otherwise partly cloudy conditions. High temperatures will be 70 to 80 in the mountains, and 85 to 100 at lower elevations. Minimum relative humidity will range from 15 to 25 percent. Winds will be south to southeast at 5 to 15 mph in Wyoming and South Dakota, and southwest at 5 to 15 mph in western Wyoming. Colorado will have variable winds at 5 to 15 mph.

The high pressure centered over eastern Wyoming and western South Dakota will transport monsoonal moisture into Utah and southern Idaho. Utah will have partly cloudy skies with scattered thunderstorms developing over the eastern portions of the state, and isolated dry thunderstorms over the west. Idaho will have mostly sunny, hot and dry conditions. High temperatures will be in the 80's in the mountains, and 90 to 105 at lower elevations. Winds will be variable at 5 to 15 mph.

A southeast flow around a strong high pressure will bring isolated mountain thunderstorms to north and central Nevada, and a few thunderstorms south. High temperatures will be 78 to 102 in the north and central portions of the state, and 108 to 113 south. Minimum relative humidity will range from 5 to 18 percent, and 22 to 27 percent south. Winds will be south to southwest at 10 to 20 mph.

A strong warm and dry high pressure is building northward into the Northern Rockies area bring sunny skies. High temperatures will be 85 to 95, with minimum relative humidity ranging from 15 to 25 percent. Winds will be southwest at 5 to 15 mph, to near 25 mph on exposed ridges.
