INCIDENT MANAGEMENT SITUATION REPORT TUESDAY, SEPTEMBER 4, 2001 - 0530 MDT NATIONAL PREPAREDNESS LEVEL 4

CURRENT SITUATION:

Five new large fires were reported, three in Northern Rockies, one each in Eastern Great Basin and Western Great Basin. Three large fires reached containment in the Northern Rockies Area. Initial attack activity was light nationwide. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington and Wyoming.

On September 3, a firefighter was struck by a falling snag and fatally injured while working the Labor fire on the Bitterroot National Forest, near Hamilton, Montana. The firefighting community extends condolences to family and friends of the deceased.

NORTHERN ROCKIES AREA LARGE FIRES:

Geographic Area priorities are being established by the Northern Rockies Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. Bozeman Area Command (Williams-Rhodes) is assigned to manage the Fridley, Little Joe and Monument fires on the Gallatin National Forest.

MOOSE, Flathead National Forest. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is 13 miles north of Whitefish, MT. Due to extreme fire activity, the North Fork Road was closed. Burnout operations to protect structures near Home Ranch Bottoms were successfully completed.

FRIDLEY, Gallatin National Forest. A Type 1 Incident Management Team (Frye) is assigned. This fire is 15 miles southwest of Livingston, MT. Crews continue to make excellent progress in mopup operations. Gusty southwest winds limited tactical air operations on the west perimeter and crews were pulled from that division to safety zones as a precaution.

BARNUM CREEK, Northwestern Land Office, Montana Department of Natural Resources. A Type 2 Incident Management Team (Specht) is assigned. This fire is five miles north of Happy's Inn, MT. Crews continued to hold all constructed fireline and aggressively attacked emerging spot fires outside the perimeter. Air operations were shut down due to afternoon high winds.

BERGSICKER WFU COMPLEX, Flathead National Forest. A Fire Use Management Team (Rath) is assigned. This complex of lightning caused Wildland Fire Use (WFU) fires, which began on 8/2, is 29 miles east of Bigfork, MT. This complex includes the Bergsicker, Long, Cannon and Toboggan fires. The Long fire spotted across the Middle Fork of the Flathead River.

SPISTOLS, Northern Cheyenne Agency, BIA. This fire is 11 miles south of Lame Deer, MT. Crews continue to work on containment efforts on the

southwest and west flanks.

MONARCH, Lewis and Clark National Forest. This fire is east of Highway 89 and the town of Monarch, MT. No further information was received.

LOST FORK, Lewis and Clark National Forest. A Type 1 Incident Management Team (Bennett) is assigned. This fire is five miles southeast of Showdown Ski Area, MT.

FLAT TIRE, Southern Land Office, Montana Department of Natural Resources and Conservation. Air tanker operations were effective in assisting with containment efforts.

EASTERN GREAT BASIN LARGE FIRES:

ELK CREEK, Payette National Forest. This fire is 15 miles east of Warren, ID. Steep terrain, gusty winds, low humidity and high temperatures continue to hinder containment efforts on the slopover along the southwest perimeter.

SNOWSHOE, Salmon-Challis National Forest. This fire, which began on 7/20, is seven miles east of Landmark, ID. The Lucky Lad, Cougar and Franklin D cabins were lost. Structure protection is beginning on historic sites on the Middle Fork of the Salmon River.

IRON CREEK, Bridger-Teton National Forest. This lightning caused Wildland Fire Use fire is southeast of Pinedale, WY in the Bridger Wilderness. Burnout operations are being conducted along the north perimeter to create a large buffer zone to prevent the fire from spreading toward the wilderness boundary. Fire personnel are posted along the Fremont Trail adjacent to the burn to ensure public safety and education during fire activity.

WILLOW CREEK, Upper Snake River District, South-Central Idaho Area, BLM. This fire is ten miles northeast of Fairfield, ID. The fire has burned on the east and west aspects of the Willow Creek drainage. One historical

homestead, and a bridge were lost.

NORTHERN CALIFORNIA AREA LARGE FIRES:

HYAMPOM, Shasta-Trinity National Forest. A Type 2 Incident Management Team (Szczepanik) is assigned. This fire is two miles northwest of Hayfork, CA. Burnout operations and containment lines held with the support of aircraft.

STAR, Eldorado National Forest. A Type 1 Incident Management Team (Vail) is assigned. This fire is 55 miles northeast of Georgetown, CA. Protection measures are still in place for Sierra Sequoia Grove and structures in the Red Star Ridge area. Additional preparations for burnout operations have been accomplished.

ROCKY MOUNTAIN AREA LARGE FIRES:

SUTHERLAND SCHOOL, Black Hills National Forest. This fire is seven miles south of Pringle, SD. Reduction in acreage is due to better mapping. Crews made good progress in mopup operations and containment efforts.

LEROY, Wyoming State Forestry. A Type 2 Incident Management Team (Sisk) is assigned. This fire is burning in Ponderosa pine and grass, is 12 miles northwest of Wheatland, WY. Air tankers and helicopters assisted crews with containment efforts.

OUTLOOK

*** A FIRE WEATHER WATCH HAS BEEN POSTED IN NORTHEAST WYOMING AND WESTERN SOUTH DAKOTA FOR ISOLATED DRY LIGHTNING, LOW RELATIVE HUMIDITY, HIGH TEMPERATURES AND HIGH HAINES INDEX ***

An upper level disturbance and associated moisture from an old tropical storm will push over the high pressure ridge into Wyoming and western South Dakota. This will bring isolated to widely scattered thunderstorms over the Black Hills region, otherwise hot and dry conditions will prevail over the Rocky Mountain region. High temperatures will be in the mid 70's to lower 80's in the mountains, 85 to 95 at lower elevations and near 100 in the Black Hills region. Minimum relative humidity will range from 8 to 23 percent. Winds will be variable at 5 to 15 mph, except for southerly winds at 10 to 20 mph over eastern Wyoming and western South Dakota.

High pressure will remain over most of the Northern Rockies with partly cloudy skies and isolated late thunderstorms over southwest and south central Montana. High temperatures will be 80 to 95, with minimum relative humidity ranging from 12 to 22 percent. Winds will be southwest to west at 10 to 20 mph.

A weak cold front will stall across western Washington and northwestern Oregon and a dry southwesterly flow will cover eastern Washington and most of Oregon. This will bring mostly sunny conditions except for morning clouds over western Washington and northwestern Oregon. High temperatures will be 65 to 80 west of the Cascades, and 78 to 93 east. Minimum relative humidity will range from 25 to 50 percent west of the Cascades, and 8 to 25 percent east. Winds will be southwest to west at 10 to 20 mph east of the Cascades.

A dry southwest flow will move over northern California bringing sunny skies. High temperatures will be in mid 80's to upper 90's inland. Minimum relative humidity will range from 14 to 22 percent, and winds will be southwest to northwest at 10 to 20 mph across the higher elevations, and 5 to 15 mph at lower elevations.
