

INCIDENT MANAGEMENT SITUATION REPORT
 THURSDAY, SEPTEMBER 6, 2001 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL 4

CURRENT SITUATION:

Two new large fires were reported in the Rocky Mountain area. Eight large fires reached containment; one in Northern Rockies, one in Eastern Great Basin, four in Rocky Mountain, one in Northwest, and one in Western Great Basin. Initial attack activity was light nationwide.

NORTHERN ROCKIES AREA LARGE FIRES:

Geographic Area priorities are being established by the Northern Rockies Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. Bozeman Area Command (Williams-Rhodes) is assigned to manage the Fridley, Little Joe and Monument fires on the Gallatin National Forest.

LOST FORK/MONARCH, Lewis and Clark National Forest. A Type 1 Incident Management Team (Bennett) is assigned, and is working in conjunction with the Cascade County in a Unified Command. This complex of fires is 30 miles north of White Sulfur Springs, MT. Active fire behavior, including torching, was observed. Resources made significant progress constructing fireline. The structure protection plan was completed by the Cascade County Department of Emergency Services.

MOOSE, Flathead National Forest. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is 13 miles north of Whitefish, MT. Structure protection continues in Home Ranch Bottoms and the north end of McDonald Lake. Precipitation was received on the fire, allowing more detailed aerial reconnaissance previously unobtainable because of extreme fire behavior and heavy smoke.

FRIDLEY, Gallatin National Forest. A Type 1 Incident Management Team (Frye) is assigned. This fire is 15 miles southwest of Livingston, MT. High winds suspended air operations. Line improvement and mopup continued on the north, east, and south portions of the fire. Fireline construction continues along the Gallatin Crest.

BERGSICKER WFU COMPLEX, Flathead National Forest. A Fire Use Management Team (Rath) is assigned. This complex of lightning caused Wildland Fire Use (WFU) fires, which began on 8/2, is 29 miles east of Bigfork, MT. This complex includes the Bergsicker, Long, Cannon and Toboggan fires. Structure protection is being provided for Granite Cabin. Trail closures are in effect for all trails within the fire area.

EASTERN GREAT BASIN LARGE FIRES:

WILLOW CREEK, Upper Snake River District, South-Central Idaho Area, BLM. A Type 2 Incident Management Team (Broyles) is assigned. This fire is ten miles northeast of Fairfield, ID. Fireline construction progressed significantly.

SNOWSHOE, Salmon-Challis National Forest. A Type 2 Incident Management Team (Shell) is assigned. This fire, which began on 7/20, is seven miles east of Landmark, ID. Structure protection continues on the Joe Bump, Powerhouse, Washboard, and Bill Bochman Cabins.

ELK CREEK, Payette National Forest. This fire is 15 miles east of Warren, ID. Due to forecast high winds, personnel and crews were pulled from the fireline.

IRON CREEK, Bridger-Teton National Forest. This lightning caused Wildland Fire Use (WFU) fire is southeast of Pinedale, WY in the Bridger Wilderness. Fire personnel are posted along the Fremont Trail adjacent to the burn to ensure public safety and education during fire activity.

NORTHWEST AREA LARGE FIRES:

REX CREEK COMPLEX, Wenatchee National Forest. This complex, comprised of the Rex Creek, Glory Mountain and four other fires, is 34 miles northwest of Lake Chelan, WA in the Sawtooth Wilderness Area. Steep terrain and lack of access have necessitated placing most of the east side of the fire into monitor status. Difficult access still hampers mopup and backhaul of equipment.

OUTLOOK

*** A FIRE WEATHER WATCH HAS BEEN POSTED IN NORTHWEST COLORADO FOR WINDS, WARM TEMPERATURES, A DRY UNSTABLE AIR MASS, AND POSSIBLE DRY LIGHTNING ***

A strong frontal system moved across the Rocky Mountain Region yesterday bringing increasing moisture and much colder temperatures. There will be numerous showers with possible snow in the higher elevations over Wyoming. In Colorado, showers will increase in the north-central to northeast areas, with a chance of isolated mainly dry afternoon thunderstorms over the remainder of the state. High temperatures will be in the mid 50's to mid 60's over the lower elevations of Wyoming, with 40's in the mountains. Colorado and southeast Wyoming will have high temperatures in the mid 80's to lower 90's in the lower elevations, and 70's in the mountains. Minimum relative humidity will be 45 to 60 percent in northern Wyoming and western South Dakota, and 25 to 40 percent in southern Wyoming. Colorado's minimum relative humidity will be at 12 to 25 percent, increasing somewhat late in the day. Wyoming will have winds from the north at 15 to 25 mph, and over Colorado they will be southwest at 15 to 25 mph.

Much colder air will cover the Northern Rockies today in the wake of a strong cold frontal passage. Scattered showers and isolated thunderstorms will occur across southern sections of the region today then will taper off this afternoon. Strong gusty north winds are expected as well. High temperatures will be in the 60's to low 70's with 55 to 65 across southeast Montana. Minimum relative humidity will be from 45 to 55 percent, with winds at 15 to 30 mph.

In the Eastern Great Basin, a cold front continues to move through the region. There will be isolated showers and thunderstorms in southern Utah. Showers will be likely over northern Utah and southern Idaho. In northern Utah, snow levels will drop to 9000 feet. High temperatures in Utah will be 65 to 75, with 45 to 55 in the mountains. In Idaho, the high temperatures will be in the mid 50's to mid 60's, with 45 to 55 in the mountains. Minimum relative humidity will be 15 to 25 percent in southern Utah, 30 to 40 percent in northern Utah, and 40 to 50 percent in Idaho. Winds will be northwest at 15 to 25 mph with gusts to 50 mph over Utah.
