

INCIDENT MANAGEMENT SITUATION REPORT  
 FRIDAY, SEPTEMBER 14, 2001 - 0530 MDT  
 NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

No new large fires were reported nationwide. One large fire reached containment in the Northern California Area. Initial attack activity was light nationwide. Very high to extreme indices were reported in Arizona, California, Colorado, Idaho, Montana, Nevada, Oregon, Texas, Utah and Wyoming.

EASTERN AREA SUPPORT:

NEW YORK CITY SUPPORT, Federal Emergency Management Agency. A Type 1 Incident Management Team (Bateman) is assigned. The incident command post is located at Jacob Javits Convention Center in lower Manhattan, New York City, NY. The primary objective of the team is to support New York City urban rescue efforts.

SOUTHERN AREA SUPPORT:

PENTAGON SUPPORT, Federal Emergency Management Agency. A Type 1 Incident Management Team (Gage) is assigned. The incident command post is located in Arlington, VA. The primary objective of the team is to support Pentagon rescue operations.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

DARBY, Tuolumne-Calaveras Unit, California Department of Forestry and Fire Protection. A CDF Type 1 Incident Command Team (Sappok) is assigned. This fire is 2 miles south of Hathaway Pines, CA.

ENF = Eldorado National Forest

NORTHERN ROCKIES AREA LARGE FIRES:

EARTHQUAKE, Nez Perce National Forest. A Type 2 Incident Management Team (Kechter) is assigned. This fire is seven miles southeast of Grangeville, ID., and is burning in steep, rocky terrain. Traffic on Highway 14 has been delayed several times due to hazards from rolling rocks and debris. A spot fire occurred near the Old Castle Creek workcenter and was held with helicopter bucket work.

MOOSE, Flathead National Forest. A Type 2 Incident Management Team (Swope) is assigned. This fire is 13 miles north of Whitefish, MT. Continuing to build handline in priority areas.

OUTLOOK

A weak low pressure system in northern California will bring a slight chance of isolated showers to northwestern California. Temperatures will be in the 60s along the coast and 80s to 90s inland. Minimum relative humidity will be 22 to 40 percent with winds variable at 15 mph.

A weak high pressure system with subtropical moisture located over Southern California, will bring a chance of scattered afternoon showers and thunderstorms to the region. Temperatures will be in the 70s along the coast, 80s to 90s inland, and 100 to 105 in the desert areas. Minimum relative humidity will be 15 to 35 percent with winds southeast to southwest at 8 to 18 mph.

An upper level low pressure system and associated Pacific frontal system will be moving out of the Eastern Great Basin area, bringing a drying

trend to the region. Temperatures will be 70 to 80 in the lower elevations and 60s in the mountains. Minimum relative humidity will be 13 to 28 percent with winds westerly at 10 to 20 mph.

A weak ridge of high pressure will move into Western Great Basin, bringing partly cloudy skies and dry conditions. Temperatures will be in the mid 70's to mid 80's in the north and central areas, and mid 80's to 105 in the south. Minimum relative humidity will be 20 to 30 percent in the northeast, and 10 to 20 percent elsewhere. Winds will be southwest at 10 to 20 mph.

Northern Rockies will have scattered showers and thunderstorms over the region, with partly cloudy skies and dry conditions west of the divide. High temperatures will be 75 to 85 west of the divide, 85 to 95 in the Idaho valleys, and in the 50's elsewhere. Minimum relative humidity will be 15 to 25 percent in Idaho valleys, 35 to 45 percent west of the divide, and above 60 percent in the east. Winds will be north at 5 to 10 mph west of the divide, and north to east at 10 to 25 mph elsewhere.
