

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, OCTOBER 1, 2001- 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationwide. No new large fires were reported. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Montana, Nevada, Utah, Oregon, Texas, Washington and Wyoming.

EASTERN AREA SUPPORT:

NEW YORK CITY SUPPORT, Federal Emergency Management Agency. Two Type 1 Incident Management Teams (Bateman and Lohrey) are assigned. The incident command post is at the Jacob Javits Convention Center in lower Manhattan, New York City, NY. The teams are operating a mobilization, receiving and distribution center from a warehouse adjacent to the convention center. Coordination with the Federal Emergency Management Agency, the New York City Fire Department and the New York Office of Emergency Management for geographic information system needs continues. The logistics sections of the teams are providing radio equipment, transportation, food, laundry and shower services to incident personnel.

NORTHERN ROCKIES AREA LARGE FIRES:

PURDY CREEK, Gallatin National Forest. A Type 1 Incident Management Team (Frye) is assigned. This fire is 12 miles southwest of Bozeman, MT. Burnout operations between West Fork of Wilson Creek and the head of the fire were successful.

MOOSE, Flathead National Forest. A Type 2 Incident Management Team (Stanich) is assigned. This fire is 13 miles north of Whitefish, MT. No new information was received.

CABIN CREEK, Lolo National Forest. A Type 2 Incident Management Team (Specht) is assigned. This fire is 27 miles east of Seeley Lake, MT. The fire is burning within the Canyon Creek Fire area. Crews continue to clear hazard trees along the primary access trail.

MCKENZIE, Miles City Field Office, BLM. A Type 3 County Assist Team from eastern Montana is in place. This fire is ten miles north of Buffalo, SD. Reduction in acreage is due to better mapping. Mopup and rehabilitation activities are continuing.

SULPHUR, Yellowstone National Park. A Fire Use Management Team (Adams) is assigned. This lightning-caused Wildland Fire Use fire, which began on 8/15, is ten miles southeast of Canyon Village in Yellowstone National Park. No new information was received.

OUTLOOK:

*** A RED FLAG WARNING HAS BEEN ISSUED FOR DRY LIGHTNING THROUGH THE AFTERNOON HOURS FOR THE INYO MOUNTAINS IN THE SOUTHERN CALIFORNIA AREA ***

*** A FIRE WEATHER WATCH HAS BEEN ISSUED FOR NORTHWEST WYOMING FOR STRONG, GUSTY WINDS ***

Remains of tropical storm Juliette will continue to move into the Southern California Area and the Sierra's bringing a chance of thunderstorms to the region. Temperatures will be in the 80s to mid 90s in the mountains, 97 to 105 in the southern and eastern deserts and 95 to 105 in the valleys and northern deserts. Minimum relative humidity will be 20 to 30 percent in the valleys and 10 to 20 percent in the mountains and deserts, with winds northeast to southeast at 10 to 20 mph.

Upper level high pressure remains over the Rocky Mountain Area, resulting

in more warm and dry weather. However, an approaching cold front will increase the pressure gradients over northwest Wyoming, resulting in strong gusty winds. Temperatures will be in the 60s and 70s in the mountains and Colorado Front Range and 80s in the lower elevations. Minimum relative humidity in the region will be 15 to 25 percent except 10 percent in Western Colorado. Winds will be west to southwest 15 to 25 mph in northwest Wyoming, south to southwest at 10 to 20 in the remainder of Wyoming into the Black Hills and Badlands and variable 5 to 15 mph in Colorado.

High pressure will weaken a little as a weak upper level disturbance approaches the Northern Rockies Area. The main affect of this system will be to bring stronger west to northwest winds to the region. Temperatures will be in the 70s and lows 80s with minimum relative humidity at 15 to 25 percent. Winds will be west to northwest at 20 to 35 mph on the ridges and 10 to 20 mph in the lower elevations.

High pressure continues to hold over the Northern California Area, bringing mostly sunny and warm conditions to the region. Temperatures will be in the mid 80s to upper 90s with minimum relative humidity at 12 to 19 percent. Winds will be northeast to southeast at 2 to 6 mph early in the day, then increasing to 3 to 10 mph in the afternoon.
