OUTLOOK:

A weakening cold front will bring only a small chance of precipitation to the southeast United States today. A few showers are forecast for the coast, with dry and mild conditions expected elsewhere. Temperatures will

be in the 60's and 70's behind the front, and in the 80's ahead of the front. Minimum relative humidities will be 40 to 50 percent behind the front, and 50 to 60 percent ahead of it. Lower relative humidities are expected to spread over the area by Sunday as the front moves offshore. Winds will be southwest at 10 to 15 mph, shifting to the north as the front passes.

A weak ridge of high pressure will bring warming and drying conditions to the Southern California Area. Morning low clouds and fog can be expected along the coast, with some high clouds elsewhere. Temperatures will be in the 60s and 70s in the mountains, and 70s and 80s in the valleys. Minimum relative humidity will be 20 to 30 percent, with winds southeast to southwest at 10 to 18 mph over the mountains.
