Southern California Area will have mostly sunny skies, except along the coast where morning low clouds and fog can be expected. High temperatures will be in the 60's along the coast, 70's in the mountains, 70's to mid 80's inland, and in the upper 80's to 90's in the deserts. High temperatures will be in the mid 70's to mid 80's, except in areas of Florida where they will climb into the 90's. Minimum relative humidity will range from 25 to 45 percent for most of Southern Area, except Oklahoma, where relative humidity will dip to 20 percent. Winds will be east to southeast at 10 to 15 mph.

Mostly sunny skies can be expected over the Southwest Area with a west to east drying trend. Temperatures will be in the 60's to 70's in the mountains and 80's to 90's across the lowlands. Minimum relative humidity will be 5 to 20 percent across most of the area, with the driest readings in Arizona and the higher readings in the far eastern portion of the area.

HELICOPTER LANDING AREA SAFETY

The following points should be considered when operating around an unimproved landing site:

Always wear your personal protective equipment (PPE) when working around an operating helicopter.

Always get the approval of a flight crewmember or the pilot before approaching a starting or operating helicopter.

Only approach and depart a helicopter as directed, in a slightly crouched position, and in full view of a crewmember.

When approaching or departing an operating helicopter, never approach or depart uphill and do not hold equipment overhead.

Always approach and depart an operating helicopter on the downhill side.

Remove or secure loose articles when working around an operating helicopter.

Be aware of the dust abatement conditions of the landing area, as blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous.
