

**INCIDENT MANAGEMENT SITUATION REPORT  
WEDNESDAY, MAY 22, 2002- 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was moderate in the Rocky Mountain Area and light elsewhere. Five new large fires were reported, two in the Rocky Mountain Area and one each in the Eastern Great Basin, Southwest and Southern Areas. Two large fires were contained, one each in the Northern Rockies and Southern Areas. Very high to extreme fire indices were reported in Arizona, Colorado, Kansas, Minnesota, Nevada, New Mexico, Texas and Utah.

**ROCKY MOUNTAIN AREA LARGE FIRES:**

SCHOONOVER, Pike-San Isabel National Forest. A Type 1 Incident Management Team (Hart) will assume command of the fire today. This fire is burning three miles southwest of Deckers, CO in ponderosa pine, Douglas fir and grass. The fire has spotted across the south fork of the South Platte River. Extreme fire behavior was observed including spotting up to ½ mile ahead of the front, crowning and torching. Steep, rugged terrain, inaccessibility and low fuel moisture are hampering containment efforts. Shady Brooke Camp and Wigwam Campground have been evacuated. Twenty nine additional structures are threatened but have not been evacuated.

BUCKTAIL COMPLEX, Grand Mesa-Uncompahgre-Gunnison National Forest. A Type 2 Incident Management Team (Sisk) is assigned. This complex, comprised of the Bucktail, 47, Dry Park and Horsefly fires, is five miles northeast of Nucla, CO. The fires are burning in ponderosa and pinon pine, juniper, sagebrush and oakbrush on the Uncompahgre Plateau. Inaccessibility, rugged terrain and flashy fuels are hampering containment efforts. Smouldering and creeping were observed on the Bucktail fire and crews are constructing direct fireline. The 47 fire exhibited active fire behavior and crews are conducting reconnaissance.

COW CAMP, Bureau of Indian Affairs, Southern Ute Agency. A Type 2 Incident Management Team (Hartman) is assigned. This fire, burning in pinon pine, juniper and oakbrush, is eight miles southeast of Mancos, CO. High winds, dry fuels, steep terrain, low relative humidity and poor access are hampering containment efforts. Crews are constructing and holding fireline.

DEEP CANYON, Bureau of Land Management, Royal Gorge Field Office. This wind driven fire is southwest of Gardner, CO. Burning in Douglas fir, pinon pine, juniper and grass, the fire made significant runs in canyons at right angles to the wind. High winds and rough terrain are hampering containment efforts.

#### SOUTHWEST AREA LARGE FIRES:

BULLOCK, Coronado National Forest. A Type 2 Incident Management Team (Kvale) will assume command of the fire today at 0600 MST. This fire is burning 15 miles northeast of Tuscon, AZ in grass, oak woodland and chaparral. Rapid rates of fire spread driven by high winds were observed.

TRAM, Coconino National Forest. A Type 2 Incident Management Team (Waldrip) is assigned. This fire, burning in pine and mixed conifer forest, is six miles west of Clints Well, AZ. Crews are patrolling and mopping up.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

#### EASTERN GREAT BASIN AREA LARGE FIRES:

ANDERSON/DANSKIN, Boise National Forest. This fire is five miles northeast of Garden Valley, ID. Crews are scouting and gridding for long range spots and constructing fireline as needed. Some precipitation was received.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
ANDERSON/DANSKIN	ID	BOF	540	10	5/24	66	3	0	0	0	18K

#### SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command has been established between an interagency Fire Use Management Team (Adams), the Georgia Forestry Commission and the Florida Division of Forestry. This lightning caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. Water levels in the swamp have stabilized. A dozen smokes are showing on the complex, half of which are individual snags well within the black. No surface spread was observed. Personnel continue to monitor the complex and maintain roads in the area.

### OUTLOOK:

**\*\*\*A RED FLAG WARNING HAS BEEN POSTED IN MUCH OF NORTHERN INTERIOR ALASKA FOR RELATIVE HUMIDITY IN THE TEENS AND LOWER 20 PERCENT RANGE AND NORTHEAST WINDS GUSTING TO 20 MPH\*\*\***

**\*\*\*A RED FLAG WARNING HAS BEEN POSTED IN THE OKEFENOKEE NATIONAL WILDLIFE REFUGE FOR MINIMUM RELATIVE HUMIDITY NEAR 32 PERCENT AND DISPERSION INDICES GREATER THAN 75\*\*\***

**\*\*\*A FIRE WEATHER WATCH HAS BEEN ISSUED IN EASTERN NEW MEXICO AND PORTIONS OF WEST TEXAS FOR STRONG SOUTHWEST WINDS, LOW RELATIVE HUMIDITY AND HIGH FIRE DANGER\*\*\***

**\*\*\*A FIRE WEATHER WATCH HAS BEEN ISSUED IN NORTH AND CENTRAL FLORIDA FOR MINIMUM RELATIVE HUMIDITY RANGING FROM 30 TO 35 PERCENT AND DISPERSION INDICES GREATER THAN 75\*\*\***

A strong upper level low pressure system over the Rocky Mountain Area will bring partly cloudy skies in the north and mostly sunny skies in the south. Scattered showers and thunderstorms are forecast in Wyoming and South Dakota and a chance of isolated showers and thunderstorms are expected in northwestern Colorado. High temperatures in Wyoming and South Dakota will be in the 40's in the mountains and 50 to 60 at lower elevations. In Colorado, high temperatures will be 55 to 65 in the mountains and 65 to 75 across the lower elevations. Minimum relative humidity will range from 15 to 25 percent in Colorado and 35 to 45 percent in the north. Winds will be west to southwest at 15 to 30 mph in Colorado and 20 to 40 mph in Wyoming and South Dakota.

A strong cold front exiting the Southwest Area will bring mostly sunny skies. High temperatures will be in the 60's and 70's in the mountains and near 90 at lower elevations. Minimum relative humidity will range from 8 to 18 percent. Winds will be southwest at 20 to 30 mph and gusty across eastern New Mexico and west Texas, and west at 10 to 20 mph elsewhere.

High pressure over the Southern Area will bring fair skies with a chance of isolated showers in southern Florida. High temperatures will be in the 70's in Oklahoma and Arkansas and in the 80's in Texas, the Gulf Coast states and Florida. Minimum relative humidity will be in the mid 20 percent range in the Appalachian Mountains and 30 to 40 percent elsewhere. Winds will be south to southeast at 10 to 25 mph in Oklahoma and Texas, and east to northeast at 10 to 20 mph in the remainder of the area.

## **UNBURNED FUEL BETWEEN YOU AND THE FIRE**

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical to direct attack a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

Can you see the fire? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?

Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?

Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.

Is your line anchored? Discuss how you anchor indirect line.

Are your escape routes and safety zones adequate? What is adequate?

To reduce the risks:

· Post lookouts

· Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.
