

**INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, JUNE 1, 2002- 0800 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was moderate in Rocky Mountain Area and light elsewhere. Eleven new large fires were reported, five in Rocky Mountain Area, three in Eastern Area, and one each in Southern California, Eastern Great Basin and Southern areas. Three large fires were contained, one each in Southwest, Northern Rockies and Southern areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Kansas, Minnesota, Nevada, New Mexico, Oklahoma, Texas, Utah and Wisconsin.

SOUTHWEST AREA LARGE FIRES:

BULLOCK, Coronado National Forest. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is 15 miles northeast of Tucson, AZ and is burning in grass, oak woodland and chaparral. Moderate fire behavior was observed. Burn out operations are under way along Mount Lemmon Highway and crews are patrolling, holding and mopping up existing fireline.

BORREGO, Santa Fe National Forest. A transfer of command from Bateman's Type 1 Incident Management Team to Garcia's Type 2 Incident Management Team will occur today. The fire is burning in pinyon pine, juniper and mixed conifer forest two miles southeast of Cordova, NM. Isolated torching of interior islands was observed. Crews are improving fireline, mopping up and rehabilitating fireline.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
BULLOCK	AZ	CNF	23,300	60	UNK	1,158	38	65	10	0	9.4M
BORREGO	NM	SNF	12,850	90	6/2	519	15	9	8	1	5.7M
WITCH	AZ	A3S	1,600	100	—	116	3	3	0	0	50K

A3S = Arizona State Land Department, Tucson District

ROCKY MOUNTAIN AREA LARGE FIRES:

LINCOLN COUNTY COMPLEX, Pueblo Dispatch Center Counties. This complex is comprised of numerous fires within Lincoln County, CO. Extreme fire behavior driven by gusty winds in grass, sagebrush and pinyon pine was observed. Aerial resources assisted with structure protection in urban interface settings. Ten residences are threatened; two residences and 15 outbuildings were lost.

PUEBLO/LAS ANIMAS COUNTY COMPLEX, Pueblo Dispatch Center Counties. This complex is comprised of numerous fires all within Las Animas and Pueblo counties, CO. Extreme fire behavior in grass, sagebrush and pinyon pine was observed. Personnel are wet lining the fire,

constructing fireline and mopping up. One residence and three outbuildings were lost, and sixty structures are threatened.

EL PASO COUNTY COMPLEX, Pueblo Dispatch Center Counties. This complex is comprised of numerous fires burning in grass, sage and pinyon pine all within El Paso County, CO. Extreme fire behavior, high temperatures and gusty winds are hampering containment efforts. Engines are mopping up and patrolling for new fires. Numerous outbuildings are threatened and four outbuildings were lost.

CHEYENNE COUNTY COMPLEX, Pueblo Dispatch Center Counties. This complex is comprised of 12 fires, all within Cheyenne County, CO. Extreme fire behavior in grass and brush was observed. High temperatures, gusty winds and lightning are impeding containment efforts. Livestock, numerous residences and outbuildings are threatened; structure protection is in place.

KIT CARSON COUNTY COMPLEX, Pueblo Dispatch Center Counties. This complex is comprised of numerous fires all within Kit Carson County, CO. Gusty downdrafts and drought conditions are hampering containment efforts. Structure protection is in place for the five residences and associated outbuildings that are threatened.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

ARROWHEAD, San Bernardino National Forest. A Type 2 Incident Management Team (Conrad) is assigned. This fire is one mile north of San Bernardino, CA. Extreme fire behavior in chamise and timber was observed. Several significant archeological resources are threatened and five commercial structures were lost. Highway 18 is closed to traffic.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
ARROWHEAD	CA	BDF	2,500	5	6/7	872	21	78	9	5	NR

EASTERN AREA LARGE FIRES:

BY PASS, Minnesota State Forestry. A Type 2 Incident Management Team (Hoff) has been ordered. This fire is three miles south of Baxter, MN. Extreme fire behavior was observed in jack pine and grass. The fire is burning east toward Highway 25 and has jumped Highway 371, which has been closed. Strong winds, low relative humidity and high temperatures are hampering containment efforts. Numerous subdivisions and rural residences have been evacuated. Four residences and associated outbuildings were lost.

BALSAM, Superior National Forest. This fire is ten miles north of Finland, MN. No further information was reported.

DR. B, Minnesota State Forestry. This fire is burning one-half mile west of Nickerson, MN in mixed hardwood and conifer forest. Crowning and individual torching were observed. Personnel are holding the fire on the west side of Highway 23 and several spot fires were successfully suppressed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

ALASKA AREA LARGE FIRES:

VINASALE, Alaska State Division of Forestry. A Type 2 Incident Management Team (Ketcher) is assigned. Burning in black spruce, taiga and hardwoods, this fire is 15 miles south of McGrath, AK. Extreme fire behavior driven by strong winds and spotting up to one-half mile ahead of the front were observed. The fire was active along the entire perimeter and is burning toward the Kuskokwim River. Crews are protecting structures east of McGrath along Noir Hill Road and have successfully completed a burn out on the northwest flank. The west flank is threatening McGrath, and a protection and evacuation plan has been completed.

WEST FORK CHENA, Alaska State Division of Forestry. A Type 2 Incident Management Team (Jandt) is assigned. This fire is 50 miles east of Fairbanks, AK. Very active fire behavior in black spruce stands, torching and spotting were observed. Aerial resources supported crews with fireline construction. Chena Hot Springs Road is closed at Granite Tors. Several residences, commercial properties and recreational cabins are threatened.

MP 78 ELLIOTT HIGHWAY, Bureau of Land Management, Tanana Zone. A Type 2 Incident Management Team (Johnson) is assigned. This fire is burning seven miles southwest of Livengood, AK in black spruce, hardwoods, brush and litter. Running, crowning and torching were observed. Air tankers successfully held the west flank when it bumped Elliott Highway between mileposts 73 and 90, and the highway has been reopened. Cabin protection is in place.

SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command between an interagency Fire Use Management Team (Cook), the Georgia Forestry Commission and the Florida Division of Forestry is in place. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. Very active fire behavior in brush was observed along the southeast flank. Tractor plows are disking a fire break along the southern perimeter of the fire. Personnel are monitoring fire activity, weather, and fuel conditions.

CHALK CANYON, Texas State Forest Service. This fire, burning in grass and juniper, is ten miles southwest of Marathon, TX. No further information was reported.

OUTLOOK:

*****A RED FLAG WARNING HAS BEEN POSTED IN NORTH AND CENTRAL ARIZONA FOR GUSTY SOUTHWEST WINDS, VERY LOW RELATIVE HUMIDITY AND EXTREME FIRE DANGER*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN SOUTHWESTERN WYOMING AND WESTERN COLORADO FOR STRONG SOUTHWEST WINDS, LOW RELATIVE HUMIDITY, VERY WARM TEMPERATURES AND ISOLATED DRY THUNDERSTORMS*****

Mostly sunny skies are expected in the Southwest Area. However, a weak weather system moving northeast into the Great Basin will bring isolated dry thunderstorms to portions of central and western New Mexico. High temperatures will be upper 70's to upper 80's in the mountains and in the 90's to near 105 at lower elevations. Minimum relative humidity will range from 5 to 15 percent in Arizona and New Mexico, and 15 to 30 percent in west Texas. Winds will be south to southwest at 10 to 25 mph with stronger gusts in the Red Flag Warning areas.

An upper level trough approaching the Rocky Mountain Area will interact with moist, unstable air bringing isolated, mainly dry thunderstorms to the mountains of Colorado and southern Wyoming. In Colorado, high temperatures will be upper 80's to mid 90's at lower elevations and mid 70's to mid 80's in the mountains. Minimum relative humidity in Colorado will range from 7 to 16 percent over lower elevations, and 10 to 20 percent in the mountains. Winds will be southwest, gusting to 40 mph in northwestern Colorado and southwestern Wyoming, and to 25 mph elsewhere.

Alaska Area can expect scattered afternoon thunderstorms over the eastern interior. High temperatures will be upper 50's and 60's. Minimum relative humidity will be in the upper 20 and 30 percent range in the northern interior, and higher south of the Alaska Range and in the west. Winds will be west to 10 mph in the northern interior, south to 15 mph south of the Alaska Range and gusting to 35 mph in the Anchorage area.

Southern California Area can expect partly cloudy skies with a chance of showers and thunderstorms in the mountains. High temperatures will be in the 60's to low 70's along the coast and in the mountains, mid 70's to mid 80's in the valleys, and in the 80's to near 100 in the deserts. Minimum relative humidity will range from 10 to 25 percent in the deserts, 30 to 45 percent in the mountains and inland, and above 50 percent along the coast. Winds will be southwest to northwest at 15 to 25 mph over the mountains and deserts, and west to southwest at 7 to 15 mph along the coast and in the valleys.

Eastern Area can expect mostly sunny skies. A lingering warm, dry airmass will elevate fire danger indices in the northern third of Minnesota until cooler air and lighter winds materialize during the afternoon hours. Warm humid air interacting with a frontal boundary over the mid Mississippi Valley will bring a chance of scattered showers and thunderstorms. A cool front moving through southeast Canada will bring strong west to northwest winds to the New England states.

High pressure over Southern Area, in association with an upper level disturbance in the Gulf of Mexico, will bring partly cloudy skies with scattered showers and thundershowers to the Atlantic Coast states, and the Gulf Coast states and Florida. High temperatures will be in the 80's and 90's. Minimum relative humidity will be above 35 percent and winds will be variable at 5 to 15 mph.

BACKFIRING OR BURNOUT OPERATIONS

Backfiring or burn out operations are often critical operations in the fire management job. If planned and executed correctly, they can speed control of a fire and greatly reduce suppression costs. Conversely, if done incorrectly, they can endanger personnel, extend control time and increase cost. Safety considerations must always be given first priority. No backfiring or burn out action, regardless of strategic importance or other critical factors, is worth risking one human life!

Backfiring or burn out operations must not jeopardize the safety of personnel or equipment or compromise suppression actions on adjacent portions of the fireline. One qualified individual must be responsible for controlling and directing the firing operation.

Before beginning backfiring or burn out operations, assure that:

- Lookouts are posted.
- Communications are established with both firing and holding teams.
- Escape routes and safety zones are established, known to all resources, and will not be compromised by the firing operations.

If it is necessary, and time allows, concentrations of fuel adjacent to and inside the control line should be removed. Fuel outside the control line may be removed; concentrations of fuel may be scattered, covered with foam or wet down, or treated by ground or aerial retardant applications. Critical points such as hooks in the fireline, saddles or canyons may require extra holding forces.
