

**INCIDENT MANAGEMENT SITUATION REPORT  
MONDAY, JUNE 3, 2002- 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was heavy in Rocky Mountain Area, moderate in Southwest, Southern California, and Eastern Great Basin Areas, and light elsewhere. Eight new large fires were reported, three in Rocky Mountain, two in Southern California, and one each in Eastern Great Basin, Southwest and Eastern Areas. Two large fires were contained, one each in Eastern and Rocky Mountain Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Florida, Kansas, Minnesota, Nevada, New Mexico, Oklahoma, Texas, and Utah.

**ROCKY MOUNTAIN AREA LARGE FIRES:**

An Area Command Team (Chesley) has been ordered to manage large fires in southern Colorado.

IRON MOUNTAIN, Bureau of Land Management, Royal Gorge Field Office. A Type 2 Incident Management Team (Hartman) is assigned. A Type 1 Incident Management Team (Martin) has been ordered. This fire is 12 miles north of Westcliffe, CO. Extreme fire behavior, running, crowning and spotting up to ½ mile ahead of the front were observed in gambel oak, juniper, pinyon pine and Douglas fir. High temperatures, low relative humidity, low fuel moisture and gusty winds are impeding containment efforts. Several subdivisions are threatened. Twenty residences, one commercial property and ten outbuildings were lost.

SPRINGER, Colorado State Forest Service, Pueblo Dispatch Center Counties. A Type 1 Incident Management Team (Wood) has been ordered. This fire, which started in New Mexico, is seven miles west of Trinidad, CO. The fire is burning in oak, white fir, pinyon pine, juniper and ponderosa pine. Extreme fire behavior with a two mile run in heavy timber was observed. Steep, rugged terrain, high winds, heavy fuels, low relative humidity and long term drought are hampering containment efforts. Engines are wet lining the west flank. Approximately 300 methane gas wells are threatened and the settlement of Lorencito has been given an evacuation warning.

FISHER, Colorado State Forest Service, Pueblo Dispatch Center Counties. This fire is burning in grass, pinyon and ponderosa pine, juniper and white fir 12 miles east of Trinidad, CO. Extreme fire behavior, crowning and spotting up to ½ mile ahead of the front were observed. Very high winds, low fuel moisture, high temperatures and drought conditions are hampering containment efforts. Dozers and engines are constructing direct attack fireline. Several ranches have been evacuated. One residence and seven outbuildings were lost.

### SOUTHERN CALIFORNIA AREA LARGE FIRES:

ARROWHEAD, San Bernardino National Forest. A Type 2 Incident Management Team (Conrad) is assigned. This fire is one mile north of San Bernardino, CA. Minimal fire behavior in chamise and timber were observed. Crews are constructing and improving fireline along the north flank. Very steep terrain, limited access, heavy fuels and low fuel moisture are hampering containment efforts. During the initial phases of the fire, one residence, two commercial properties and four outbuildings were lost.

WOLF, Los Padres National Forest. A Type 2 Incident Management Team (Smith) is assigned. A Type 1 Incident Management Team (Gelobter) is on order. This fire is burning nine miles north of Ojai, CA in decadent chaparral, pinyon pine and juniper. The fire is spreading south with two distinct heads, one on each side of Highway 33. Extreme fire behavior, running and continuous spotting were observed. Crews are constructing direct attack handline in extremely rugged terrain. Pine Mountain Camp has been evacuated and Highway 33 is closed. Several outbuildings were lost.

ROCKY, Sequoia National Forest. A Type 2 Incident Management Team (Rios) is assigned. This fire is in the Kern Valley Canyon, 12 miles northeast of Bakersfield, CA. The fire is burning in grass and brush along Highway 178. High winds and low relative humidity have contributed to increased fire behavior. Several recreation sites are threatened.

BEE, San Bernardino National Forest. Burning in grass and chamise, this fire is five miles east of Hemet, CA. Moderate to rapid rates of spread were observed, and Idyllwild is threatened.

BEE	CA	BDF	432	50	6/3	175	5	2	4	0	NR

### SOUTHWEST AREA LARGE FIRES:

BULLOCK, Coronado National Forest. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is 15 miles northeast of Tucson, AZ, and is burning in grass, oak woodland and chaparral. Extreme fire behavior was observed in the Straton Ridge area with rapid fire spread and flame lengths exceeding 30 feet. High winds, extremely rugged terrain and dry fuels are impeding containment efforts. Aerial resources are supporting crews with fireline construction.

SPRING, New Mexico State Forestry Office, Cimmaron District. This fire is burning on the Colorado-New Mexico border and is being reported by Rocky Mountain Area as the Springer fire. Acreage reported is for New Mexico only. Running, spotting and torching were observed in mixed

conifer forest, ponderosa pine and scrub oak.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

### EASTERN GREAT BASIN AREA LARGE FIRES:

NIZHONI, Manti-LaSal National Forest. A Type 2 Incident Management Team (Burdick) is assigned. This fire is ten miles west of Blanding, UT. The fire is burning in gambel oak, ponderosa and pinyon pine, juniper and chaparral. A 1500 acre run was observed with crowning, torching, and spotting up to ½ mile ahead of the front. Heavy fuel loading is impeding containment efforts. Crews have anchored in and are flanking the fire. Several structures and electronic sites are threatened

SCRABBLE, Dixie National Forest. This fire is 25 miles northwest of St. George, UT, and is burning in scrub oak and manzanita. The fire made several significant runs yesterday morning, however afternoon cloud cover and higher relative humidity resulted in minimal fire growth as the afternoon progressed. Crews are cold trailing and mopping up.

ELK SPRING, Bureau of Land Management, Cedar City Field Office. This fire is 37 miles northwest of Cedar City, UT. The fire is burning in pinyon pine, juniper and sagebrush. Significantly reduced fire behavior was observed due to favorable weather conditions. Crews are constructing line along the north flank.

SCARECROW, Bureau of Indian Affairs, Paiute Agency. This fire is burning 15 miles northwest of St. George, UT in grass, sagebrush, pinyon pine and juniper. Moderate fire behavior was observed. Crews are patrolling and mopping up. Aerial resources are assisting containment efforts.

MUD, Bureau of Land Management, Arizona Strip Field Office. This fire is 28 miles south of St. George, UT. The fire is burning in grass, sagebrush, pinyon pine and juniper. Isolated flare-ups were observed. Crews made excellent progress with fireline construction and are hot spotting, patrolling and mopping up.

SANFORD, Dixie National Forest. This fire, burning in mixed conifer and aspen forest, is 20 miles east of Panguitch, UT. Higher relative humidity, lower temperatures and light winds aided suppression efforts. Crews are holding and mopping up the northeast flank.

### **EASTERN AREA LARGE FIRES:**

JACKS BRANCH, New Jersey State Forestry. Burning in pinebarrens, this wind driven fire is in the Berkeley and Beachwood Townships near Pinewald, NJ. Neighborhoods and subdivisions in the Pinewald area have been evacuated and one residence was lost. Garden State Parkway is closed.

BY PASS, Minnesota State Forestry. A Minnesota Type 2 Interagency Incident Management Team (Sterr) is assigned. This fire, burning in jack pine and grass, is three miles south of Brainerd, MN. Favorable weather conditions assisted containment efforts. Crews are holding and mopping up. One additional residence was confirmed lost.

NORTH SHORE COMPLEX, Superior National Forest. A Type 2 Incident Management Team (Hoff) is assigned. This complex consists of the Balsam Lake, Lookout, Sugarloft and Cross River fires. The fires are burning in swamp, spruce and red pine ten miles north of Finland, MN. Cool, cloudy weather aided containment efforts. Fire lookout and communication tower is threatened.

CAMELBACK BRIDGE, Minnesota State Forestry. Burning in swamp grass and brush, this fire is 14 miles north of Greenbrush, MN. Active fire behavior was observed. Peat soil is hampering containment efforts.

JUNE-JUNEBERRY. Minnesota State Forestry. This fire is burning in swamp grass and brush 13 miles northwest of Greenbrush, MN. Peat soil is impeding containment efforts. Engine is wet lining the fire.

### **ALASKA AREA LARGE FIRES:**

VINASALE, Alaska State Division of Forestry. A Type 2 Incident Management Team (Ketcher) is assigned. Burning in black spruce, taiga and hardwoods, this fire is 15 miles south of McGrath, AK. Moderate fire behavior was observed on the east and south flanks. Dozers reinforced line along the west flank and crews are making good progress mopping up.

WEST FORK CHENA, Alaska State Division of Forestry. A Type 2 Incident Management Team (Jandt) is assigned. This fire is burning 50 miles east of Fairbanks, AK in black spruce and hardwoods. Fire intensity decreased due to heavy thundershowers and higher relative humidity. Crews are constructing direct attack fireline along the north flank. Chena Hot Springs Road is closed at Angel Creek Lodge.

MP 78 ELLIOTT HIGHWAY, Bureau of Land Management, Tanana Zone. A Type 2 Incident Management Team (Johnson) is assigned. This fire is burning seven miles southwest of Livengood, AK in black spruce, hardwoods, brush and litter. Fire behavior moderated due to higher relative humidity, fog and drizzle. Crews are constructing fireline along the west and northwest flanks.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
VINASALE	AK	AKS	80,000	0	UNK	235	8	0	2	0	NR

MP 78 ELLIOTT HIGHWAY	AK	TAD	94,970	20	UNK	292	13	2	4	0	1.3M

**SOUTHERN AREA LARGE FIRES:**

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command between an interagency Fire Use Management Team (Cook), the Georgia Forestry Commission and the Florida Division of Forestry is in place. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. Tractor plow work on the southern perimeter has been completed. Crews are monitoring fire activity, weather, and fuel conditions.

CHALK CANYON, Texas State Forest Service. This fire, burning in grass and juniper, is ten miles southwest of Marathon, TX. No new information was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
BLACKJACK BAY COMPLEX	GA	OKR	120,405	3	UNK	175	1	15	3	0	3.6M
CHALK CANYON	TX	TXS	175	50	—	7	0	2	0	0	NR

**WESTERN GREAT BASIN AREA LARGE FIRES:**

PARSNIP, Bureau of Land Management, Ely Field Office. This fire is 30 miles east of Panaca, NV. The fire is burning in sagebrush, pinyon pine and juniper. Erratic winds associated with thunderstorm activity contributed to extreme fire behavior. Crews are building handline utilizing Minimum Impact Suppression Tactics within a Wildlife Study Area and dozers are constructing fireline along the east flank. One structure was lost.

NORTH PAHROC, Bureau of Land Management, Ely Field Office. This fire, burning in grass, sagebrush, pinyon pine and juniper is 35 miles northwest of Caliente, NV. Smouldering, creeping and occasional torching were observed. Limited road access is hampering containment efforts.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
PARSNIP	NV	ELD	700	0	6/7	65	2	6	1	1	NR
NORTH PAHROC	NV	ELD	2,500	85	6/3	127	9	0	0	0	20K

### NORTHERN CALIFORNIA AREA LARGE FIRES:

KUPUKUPU, Hawaii Volcanos National Park. Lava flows from Kilauea ignited this fire on the southern edge of Hawaii in the Hawaiian Islands. Active fire behavior was observed due to hot, dry and windy conditions. Very deep duff layers are contributing to strong reburn potential and continuously moving lava has made portions of the fire too dangerous for crews. Personnel are scouting the perimeter for escape routes and safety zones.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
KUPUKUPU	HI	HVP	2,588	0	UNK	50	2	0	6	0	NR

### NORTHERN ROCKIES AREA LARGE FIRES:

SIOUX COMPLEX, Custer National Forest. A County Assist Team (Williams) is assigned. This complex, comprised of the Lee, North Cave and Aspen fires, is 30 miles southeast of Ekalaka, MT. These wind driven fires are burning in slash, grass and timber. Minimal fire activity was observed. Crews are patrolling and mopping up.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
SIOUX COMPLEX	MT	CNF	352	50	6/3	123	3	20	1	0	NR

## OUTLOOK:

### **\*\*\*A FIRE WEATHER WATCH HAS BEEN ISSUED IN EASTERN ARIZONA AND NORTHERN NEW MEXICO FOR GUSTY AFTERNOON WINDS, LOW RELATIVE HUMIDITY AND EXTREME FIRE DANGER\*\*\***

A cold front moving into Rocky Mountain Area will bring scattered showers and wet thunderstorms. Moisture from an upper level flow will bring isolated dry thunderstorms to southern and central Colorado. High temperatures will be 45 to 55 at higher elevations in northern Colorado and 55 to 65 at lower elevations. In southern and western Colorado, high temperatures will be 75 to 80 at lower elevations and in the 60's to low 70's in the mountains. Minimum relative humidity will range from 10 to 20 percent in southern Colorado and 40 to 50 percent to the north. Winds will be westerly, gusting to 25 mph in southern Colorado and north to northwest at 10 to 20 mph elsewhere.

Southern California Area can expect mostly sunny skies with low clouds and fog along the coast. High temperatures will be in the 60's to mid 70's in coastal areas, 70's to low 80's in the mountains, mid 70's to mid 80's in the valleys, and in the 80's to near 105 in the deserts. Minimum relative humidity will range from 5 to 15 percent in the deserts, 45 to 60 percent near the coast and 15 to 25 percent in the mountains and inland. Winds will be southwest to west at 6 to 12 mph in the coastal areas and valleys and west to northwest at 10 to 25 mph over the mountains and desert. Northerly Sundowner winds at 20 to 30 mph with higher gusts in the evening are expected along the Santa Barbara Coast.

Isolated dry thunderstorms are forecast for New Mexico as a cold front moves into Southwest Area. Partly to mostly sunny skies are expected in the remainder of the area. High temperatures will be in the 70's and 80's in the mountains and in the 90's at lower elevations. Minimum relative humidity will range from 5 to 15 percent across Arizona and 10 to 25 percent in New Mexico. Winds will be northeast at 10 to 20 mph.

A weakening upper level trough will bring scattered showers to the mountains and eastern portions of Eastern Great Basin Area. High temperatures will be 70 to 85 in the valleys and 55 to 70 in the mountains. Minimum relative humidity will be 12 to 20 percent in the valleys and 18 to 40 percent in the mountains. Winds will be west to north at 10 to 20 mph.

A frontal system south of Minnesota and high pressure building over New Jersey will bring partly cloudy skies to Eastern Area. High temperatures will be in the 50's and 60's in Minnesota and in the 70's in New Jersey. Minimum relative humidity will be 35 to 45 percent in northern Minnesota and above 50 percent in the south, and winds will be easterly at 5 to 15 mph. In New Jersey, minimum relative humidity will be near 35 percent and winds will be light.

A very moist unstable airmass over Alaska Area will bring partly to mostly cloudy skies with widespread showers and wet thunderstorms. High temperatures will be upper 60's to low 70's. Winds in the interior will be variable to 10 mph.

High pressure over Southern Area will bring mostly sunny skies and a chance of thunderstorms to Georgia and Florida. High temperatures will be in the 80's and 90's and minimum relative humidity will range from 35 to 45 percent. Winds will be 15 to 25 mph in east Texas and light elsewhere.

### **WORKING WITH HELICOPTER DROPS**

Consider the following questions when you have a helicopter with a bucket working in your area:

Do you have good communications?

Does the pilot have a clear understanding of the target?

Are trees and snags in the drop zone?

Are ground crews clear of the area?

What are the winds doing?

Are other aircraft in the area?

Are people on the ground aware of the effects of the helicopter's rotor wash?

Will terrain and obstructions allow the helicopter to attain the proper drop height?

Be aware that helicopters reach their maximum performance capabilities as temperature and altitude increases.

---
