**INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, JUNE 8, 2002- 0800 MDT
NATIONAL PREPAREDNESS LEVEL 3**

CURRENT SITUATION:

Initial attack activity was moderate in Rocky Mountain and Southwest Areas and light elsewhere. One new large fire was reported in Southwest Area. Five large fires were contained, two each in Southern California and Rocky Mountain Areas and one in Western Great Basin Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Kansas, Minnesota, Nevada, New Mexico, North Dakota, Oklahoma, Texas, Utah and Wyoming.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

COPPER, Angeles National Forest. A Unified Command between a Type 1 Incident Management Team (Raley) and the Los Angeles County Fire Department is in place. This fire started within the city limits of Saugus, CA and is burning north and northeast in decadent chaparral. Extreme fire behavior and sustained runs with 40 foot flame lengths were observed. Crews are constructing fireline on the north and west flanks. Residences in Drinkwater Canyon, Green Valley and Warm Springs Camp have been evacuated. The communities of Lake Hughes, Lake Elizabeth and Leona Valley, and high voltage power lines serving the Los Angeles basin are threatened. Structure protection is in place. Two residences and three outbuildings were lost yesterday, and a damage assessment team has been ordered.

WOLF, Los Padres National Forest. A Type 1 Incident Management team (Gelobter) is assigned. This fire is burning nine miles north of Ojai, CA in decadent chaparral, pinyon pine and juniper. Very active fire behavior was observed on the north and east flanks as the fire moved toward Horse Thief Canyon, Sespe drainage and Pine Mountain Ridge. Crews are constructing fireline along the north, northwest and south flanks in steep, rugged terrain. Structure protection is in place for numerous structures and improvements that are threatened in the Howard Creek, Mutau Flat, Rose Valley and Thatcher Cabin areas. The Sespe, Matilija and Dick Smith Wilderness Areas are threatened.

BDF = San Bernardino National Forest

SOUTHWEST AREA LARGE FIRES:

MIDDLE PONIL COMPLEX, New Mexico State Forestry Office, Cimmaron District. A transfer of command from Van Bruggen's Type 2 Incident Management Team to Lohrey's Type 1 Incident Management Team occurred at 0600 MDT today. This complex, comprised of the Office, Middle Ponil, Turkey and Metcalf fires, is burning ten miles west of Cimmaron, NM in ponderosa pine. Several runs on the north and west flanks, spotting and torching were observed due to rapidly drying fuels and strong southwest winds. The town of Ute Park, Philmont Boy Scout Camp, power lines, numerous gas wells and several historic structures are threatened.

BULLOCK, Coronado National Forest. A Type 2 Incident Management Team (Joki) is assigned. This fire is 15 miles northeast of Tucson, AZ, and is burning in grass, oak woodland and chaparral. Crews are patrolling, mopping up and rehabilitating fireline.

CHERRY, El Malpais National Park. This fire, burning in grass and ponderosa pine, is 26 miles southwest of Grants, NM. High winds contributed to extreme fire behavior. Crews are constructing fireline and burning out.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
MIDDLE PONIL COMPLEX	NM	N2S	90,000	10	UNK	752	26	13	3	0	450K

CHERRY	NM	EMP	1,200	10	6/10	72	3	1	0	0	NR

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Chesley) is assigned to manage large fires in southeast Colorado.

TRINIDAD COMPLEX, Colorado State Forest Service, Pueblo Dispatch Center Counties. A Type 1 Incident Management Team (Wood) is assigned. This complex, comprised of the Spring and Fisher fires, is eight miles south of Stonewall, CO. The fires are burning in grass, pinyon pine, juniper and ponderosa pine. Winds increased fire behavior with active flame in unburned areas and isolated torching observed. Crews are constructing direct attack handline, burning out and mopping up.

IRON MOUNTAIN	CO	RGD	4,439	100	---	237	4	7	1	201	1.5M

RGF = Rio Grande National Forest

EASTERN GREAT BASIN AREA LARGE FIRES:

BIG WASH, Bureau of Land Management, Cedar City Field Office. A Type 2 Incident Management Team (Broyles) is assigned. The fire is burning 21 miles southeast of Cedar City, UT in bug killed spruce and fir. Steep, rugged terrain, high winds, dry fuels, and limited access are hampering containment efforts. Dozers are constructing a contingency line on the northeast flank to protect the numerous threatened structures.

NIZHONI, Manti-LaSal National Forest. A Type 2 Incident Management Team (Burdick) is assigned. This fire is ten miles west of Blanding, UT. The fire is burning in gambel oak, ponderosa pine, pinyon pine, juniper and chaparral. Aerial resources supported crews building fireline on the northeast flank. A communication site and several structures are threatened.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
BIG WASH	UT	CCD	1,500	15	6/12	282	11	1	3	0	827K
NIZHONI	UT	MLF	2,354	75	6/8	368	13	5	3	0	1.1M

ALASKA AREA LARGE FIRES:

VINASALE, Alaska State Division of Forestry. A Type 2 Incident Management Team (Ketcher) is assigned. Burning in black spruce, taiga and hardwoods, this fire is 15 miles south of McGrath, AK. Active fire behavior was observed on the east flank. Aerial resources are aiding dozers and crews building fireline on the eastern portion of the fire.

MP 78 ELLIOTT HIGHWAY, Bureau of Land Management, Tanana Zone. A Type 2 Incident Management Team (Johnson) is assigned. This fire is burning seven miles southwest of Livengood, AK in black spruce, hardwoods, brush and litter. Smouldering and creeping were observed due to precipitation and higher relative humidity. Dozer line has been completed and crews are mopping up.

WEST FORK CHENA, Alaska State Division of Forestry. This fire is burning 50 miles east of Fairbanks, AK in black spruce and hardwoods. Low fire intensity was observed. Crews made good progress securing the north flank near the west fork of the Chena River. Crews continue mopping up and rehabilitating fireline.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
VINASALE	AK	AKS	100,000	5	UNK	228	10	1	2	0	2.1M
MP 78 ELLIOTT HIGHWAY	AK	TAD	95,626	31	UNK	248	10	1	6	0	2.1M
WEST FORK CHENA	AK	AKS	22,092	70	UNK	93	4	0	2	4	2.9M

SOUTHERN AREA LARGE FIRES:

DEAD END COMPLEX, National Forests in Florida. A Florida State Type 2 Incident Management Team (Green) is assigned. This complex, consisting of nine fires, is burning in southern rough near Olustee, FL. Seven of the fires have been contained. Active fire behavior was observed in unburned pockets on the Dead End and Bee Pen fires. Crews are patrolling and mopping up.

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command between an interagency Fire Use Management Team (Cook), the Georgia Forestry Commission and the Florida Division of Forestry is in place. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The southern flank experienced significant growth due to lack of precipitation. A preexisting permanent fuel break that surrounds the Refuge is being successfully utilized to hold the fire.

MARBLEYARD COMPLEX, George Washington and Jefferson National Forests. This complex, comprised of several fires, is burning three miles south of Glasgow, VA in standing dead timber, hardwoods and rhododendron. Rain showers reduced fire intensity. Crews are completing handline construction and burn out operations.

SIMMONS POND, Florida Division of Forestry. This fire is four miles north of Fort McCoy, FL. The fire is burning on Ocala Lumber Company land with swamp both to the north and south. No new information was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
DEAD END COMPLEX	FL	FNF	233	80	UNK	156	4	9	1	0	458K

SIMMONS POND FIRE	FL	FLS	369	80	UNK	17	0	4	1	0	NR

NORTHERN CALIFORNIA AREA LARGE FIRES:

KUPUKUPU, Hawaii Volcanos National Park. Lava flows from Kilauea ignited this fire on the southern edge of Hawaii in the Hawaiian Islands. Very deep duff layers are contributing to strong reburn potential, and continuously moving lava has made portions of the fire too dangerous for crews. Two UH-60 Blackhawk helicopters from the U.S. Army 25th Light Infantry Division based at Schofield Barracks on Oahu are assisting suppression efforts. Aerial resources are being utilized to hold the fire on the north flank, protecting native Hawaiian rainforest. Crews are hot spotting and mopping up the southern flank.

OUTLOOK:

*****A RED FLAG WARNING HAS BEEN POSTED IN NORTHERN ARIZONA FOR STRONG SOUTHWEST WINDS, VERY LOW RELATIVE HUMIDITY AND EXTREME FIRE DANGER*****

*****A RED FLAG WARNING HAS BEEN POSTED IN COLORADO FOR STRONG WINDS, LOW RELATIVE HUMIDITY AND ISOLATED DRY THUNDERSTORMS*****

*****A RED FLAG WARNING HAS BEEN POSTED IN CALIFORNIA FOR THE BAY AREA, THE SACRAMENTO AND NORTHERN SAN JOAQUIN VALLEYS, AND THE SURROUNDING FOOTHILLS BELOW 3000 FEET FOR STRONG NORTH WINDS AND LOW RELATIVE HUMIDITY*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN SOUTHERN ARIZONA AND NORTHERN NEW MEXICO FOR INCREASING SOUTHWEST WINDS, VERY LOW RELATIVE HUMIDITY AND EXTREME FIRE DANGER*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN SOUTHWESTERN WYOMING FOR STRONG WINDS, LOW RELATIVE HUMIDITY AND ISOLATED DRY THUNDERSTORMS*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN SOUTHERN AND CENTRAL UTAH AND THE ARIZONA STRIP FOR STRONG SOUTHWEST WINDS, LOW RELATIVE HUMIDITY AND HIGH HAINES INDEX*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED ON THE NORTH SLOPE OF THE ALASKA RANGE FOR STRONG SOUTHWEST WINDS AND LOW RELATIVE HUMIDITY*****

Southern California Area can expect mostly sunny skies with morning low clouds and fog in the coastal basins. High temperatures will be in the 60's in coastal areas, in the 70's in the mountains and inland, 85 to 90 across the high deserts, and 100 to 108 over the low deserts. Minimum relative humidity will range from 10 to 20 percent in the deserts, 30 to 45 percent in the mountains, 30 to 50 percent inland, and above 60 percent near the coast. Winds will be northwest to southwest at 15 to 30 mph over higher elevations and onshore at 8 to 18 mph along the coast.

Southwest Area can expect mostly sunny to partly cloudy skies with isolated, mainly dry thunderstorms across the mountains of New Mexico. High temperatures will be in the 70's and 80's in the mountains and in the 90's to near 105 at lower elevations. Minimum relative humidity will range from 5 to 20 percent. Winds will be south to southwest at 10 to 25 mph, gusting to near 40 mph in the Red Flag and Fire Weather Watch areas.

An upper level trough moving east into Rocky Mountain Area will bring increasing clouds with a chance of isolated dry thunderstorms in Colorado and central and southern Wyoming. High temperatures will be 65 to 85 in the mountains and 75 to 90 at lower elevations in Colorado and southern Wyoming. Minimum relative humidity will range from 7 to 17 percent in the south and 25 to 35 percent in the north. Winds will be southwest at 20 to 35 mph, gusting to 45 mph at higher elevations.

Eastern Great Basin Area can expect mostly sunny skies in the south and partly cloudy skies with scattered showers in the north. High temperatures will be 75 to 95 in Utah and 55 to 75 in southern Idaho. Minimum relative humidity will range from 5 to 15 percent in the south and 20 to 30 percent in the north. Winds will be northwest to southwest at 20 to 35 mph.

A stabilizing airmass over Alaska Area will bring mostly sunny skies to the central interior and partly cloudy skies with scattered showers and isolated wet thunderstorms to the northern and eastern interior. High temperatures will be in the 60's and 70's. Minimum relative humidity will be above 20 percent in the drier areas of the interior. Winds will be southerly, gusting to 30 mph along the north slopes of the Alaska Range, and variable at 10 to 15 mph elsewhere.

A slow moving cold front will stall over Florida and the Gulf Coast states, bringing scattered showers and thunderstorms to Southern Area. High temperatures will be in the mid 80's and mid 90's. Minimum relative humidity will be above 45 percent and winds will be east to southeast at 5 to 15 mph.

decisively to the changing situation.

Discuss the following indicators of extreme fire behavior:

- Relative humidity less than 15%
- 1-hour fuel moisture less than 5%
- Trees crowning inside the fireline
- Smoldering fires that exist in the early part of the day are beginning to burn very actively as the day progresses.
- Approaching thunderstorms with dark clouds beneath
- Presence of dust devils indicating an unstable atmosphere
- Increased spotting
- Sudden calm
- High clouds moving fast in direction different from surface wind
- Predicted Haines Index of 5 and 6 in those areas where this level is a good indicator of atmospheric instability
