## (Converted From .wpd On 2/26/04)

# INCIDENT MANAGEMENT SITUATION REPORT WEDNESDAY, JUNE 12, 2002 0530 MDT NATIONAL PREPAREDNESS LEVEL 4

#### **CURRENT SITUATION:**

Initial attack activity was light across the nation. Two new large fires were reported, one in the Southern Area and one in the Rocky Mountain Area. Five large fires were contained, one each in the Eastern Area, Western Great Basin, Northern California, Southern California, and Southern Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Nevada, New Mexico, Oklahoma, Texas, and Utah.

## **ROCKY MOUNTAIN AREA LARGE FIRES:**

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Chesley) is assigned to manage large fires in southeast Colorado.

HAYMAN, Pike-San Isabel National Forest. Two Type 1 Incident Management Teams (Martin and Raley) are assigned. This fire is burning six miles northwest of Lake George, CO in ponderosa pine and mixed conifer forest. Very active runs to the southeast and southwest were observed. Crews are anchoring and constructing handline. Several camps, ranches, recreation areas and towns are threatened. A mandatory evacuation is in place for 6,000 homes.

MIRACLE COMPLEX, Bureau of Land Management, Grand Junction District. A Type 2 Incident Management Team (Hartman) is assigned. This complex consists of the Long Canyon and Dierich Creek fires and is near Grand Junction, CO. The fires are burning in brush, pinyon pine and juniper. Fire activity was minimal. Steep terrain, inaccessibility, high winds and low relative humidity are hampering containment efforts. A mandatory evacuation is in effect for 230 homes, and structure protection is in place.

COAL SEAM, Grand Junction Dispatch Center Area Counties. A Type 1 Incident Management Team (Hart) is assigned. Burning in heavy oakbrush, this fire is four miles west of Glenwood Springs, CO. Short upslope runs, torching and spotting were observed. Crews are constructing handline and engines are patrolling and mopping up. The mandatory evacuation has been lifted and residents are returning to their homes.

MISSIONARY RIDGE, San Juan National Forest. A Type 2 Incident Management Team (Solarz) is assigned. This fire is ten miles north of Durango, CO and is burning in oakbrush, ponderosa pine and mixed conifer forest. Sustained crowning and torching with spotting 1/4 mile ahead of the front were observed. Aerial resources are assisting suppression efforts. Several commercial properties and 305 residences are threatened. The Elkhorn subdivision is closed and several homes are evacuated above Lemon Dam.

TRINIDAD COMPLEX, Colorado State Forest Service, Pueblo Dispatch Center Counties. A Type 2 Incident Management Team (Swope) is assigned. This complex, comprised of the Spring and Fisher fires, is eight miles south of Stonewall, CO. The fires are burning in grass, pinyon pine, juniper and ponderosa pine. The Spring fire was very active with torching and spotting observed. A total of 250 residences are threatened along with several commercial properties.

HENSEL, Medicine Bow National Forest, Douglas Ranger District. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Extreme fire behavior was observed with torching, crowning and running. Limited access, difficult terrain and snags are hampering containment efforts.

LYTLE, Department of Defense. This fire is 12 miles south of Colorado Springs, CO on the Fort Carson Military Reservation. The fire is burning in pinyon pine, juniper and oakbrush. No new information was reported.

### **SOUTHWEST AREA LARGE FIRES:**

PONIL, New Mexico State Forestry Office, Cimmaron District. A Type 1 Incident Management Team (Lohrey) is assigned. The fire is burning ten miles west of Cimmaron, NM in ponderosa pine. The fire made several small upcanyon runs and was very active on the west flank. Crews are constructing handline on the north and west flanks and burning out on the south and east flanks. The town of Ute Park, Philmont Boy Scout Camp, Vermego Park Complex, power lines, numerous gas wells and several historic structures are threatened.

CHERRY, El Malpais National Park. A Type 2 Incident Management Team (Gardner) is assigned. This fire, burning in grass and ponderosa pine, is 26 miles southwest of Grants, NM. Active fire behavior was limited to isolated flare-ups. Crews are constructing handline and burning out. Aerial resources are assisting containment efforts. An evacuation plan and structure protection is in place for several residences. A voluntary evacuation has been recommended for the El Calderon area and the Frank Lloyd Wright House. Highway 117 is closed nightly due to residual smoke.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

CHERRY	NM	EMP	13,200	50	6/13	557	20	16	3	0	1.9M

#### **EASTERN GREAT BASIN AREA LARGE FIRES:**

BIG WASH, Bureau of Land Management, Cedar City Field Office. A Type 1 Incident Management Team (Hefner) is assigned. The fire is burning 21 miles southeast of Cedar City, UT in bug kill spruce and fir. Torching, crowning and small runs were observed. Crews and dozers are constructing fireline and aerial resources are assisting suppression efforts. Several residences, a communication site and historic structures are threatened. Numerous structures on the ridge above Deep Creek have been evacuated and structure protection is in place. The Cedar Breaks National Monument is closed.

SANFORD, Dixie National Forest. This fire is being managed under a least cost alternative Wildland Fire Situation Analysis (WFSA) confine/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. A Fire Use Management Team (Cones) will assume command at 0700 MDT. The fire is 20 miles northeast of Panguitch, UT and is burning in aspen, pinyon pine, juniper and mixed conifer forest. Active fire behavior in the interior was observed. Rough terrain and limited access are hampering containment efforts. Structure protection is in place for the Sanford Ranch.

FERRON MOUNTAIN, Manti-La Sal National Forest. This fire is burning in brush, pinyon pine and juniper two miles southwest of Ferron, UT. Winter range habitat and a municipal watershed are threatened. This will be the last report unless significant activity occurs.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
BIG WASH	UT	CCD	5,100	55	6/17	704	23	8	6	0	2.0M

FERRON MOUNTAIN	UT	MLF	500	70	6/12	0	0	0	0	0	85K

#### **SOUTHERN CALIFORNIA AREA LARGE FIRES:**

WOLF, Los Padres National Forest. A Type 1 Incident Management team (Gelobter) is assigned. This fire is burning ten miles north of Ojai, CA in decadent chaparral, pinyon pine and juniper. Crews are constructing handline along Pine Mountain Ridge and Sespe Creek. Two Blackhawk helitankers from the California National Guard are assisting suppression efforts. Structure protection is in place for numerous structures and improvements that are threatened in the Howard Creek, Mutau Flats and Rose Valley areas. Matilija Canyon Road is closed to non local traffic. The Sespe, Matilija and Dick Smith Wilderness Areas are threatened.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
WOLF	CA	LPF	21,278	85	6/14	1,210	38	13	15	6	13.2M
COPPER	CA	ANF	23,407	100		566	11	4	3	26	8.1M

ANF = Angeles National Forest

#### **NORTHERN CALIFORNIA AREA LARGE FIRES:**

FORKS, Klamath National Forest. A Type 2 Incident Management Team (McElwain) is assigned. This fire is three miles down stream from Forks of the Salmon, CA and is burning in continuous hardwood and mixed conifer forest. Steep terrain and limited access is hampering containment efforts.

KUPUKUPU, Hawaii Volcanos National Park. Lava flows from Kilauea ignited this fire on the southern edge of Hawaii in the Hawaiian Islands. Very deep duff layers are contributing to strong reburn potential and continuously moving lava has made portions of the fire too dangerous for crews. Crews are constructing fireline on the north flank and aerial resources are assisting containment efforts.

### **SOUTHERN AREA LARGE FIRES:**

MARBLEYARD COMPLEX, George Washington and Jefferson National Forests. This complex, comprised of several fires, is burning three miles south of Glasgow, VA in standing dead timber, hardwoods and rhododendron. Very active fire behavior was observed due to low relative humidity and increasing temperatures. Crews are constructing line and mopping up. The James River Face Wilderness and several structures are threatened.

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command between an interagency Fire Use Management Team (Cook), the Georgia Forestry Commission and the Florida Division of Forestry is in place. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The south flank is smoldering and creeping. A preexisting permanent fuel break that surrounds the Refuge is being successfully utilized to hold the fire.

DEAD END COMPLEX, National Forests in Florida. A Florida State Type 2 Incident Management Team (Greene) is assigned. This complex, consisting of nine fires, is burning in southern rough near Olustee, FL. Smoldering and creeping were observed.

### **ALASKA AREA LARGE FIRES:**

MP 78 ELLIOTT HIGHWAY, Bureau of Land Management, Tanana Zone. An Alaska Type 2 Incident Management Team (McKnight) is assigned. This fire is burning seven miles southwest of Livengood, AK in black spruce, hardwoods, brush and litter. Isolated torching and creeping were observed. Crews are performing burn out operations.

## **OUTLOOK:**

A cool front moving into the Rocky Mountain Area will bring widely scattered thunderstorms. High temperatures in the north will be in the mid 60's to lower 70's at lower elevations and in the 50's to lower 60's in the mountains. The lower elevations of Colorado can expect high temperatures from 78 to 88 and in the 70's to near 80 in the mountains. Minimum relative humidity in Colorado will range from 8 to 13 percent and 15 to 25 percent in southern Wyoming. Winds in Colorado will be from the west at 10 to 20 mph with higher gusts over the mountains and 15 to 30 mph in the north.

The Southwest Area can expect mostly sunny skies with isolated thunderstorms in eastern Arizona, southern New Mexico and west Texas. High temperatures will be in the mid 70's to 80's in the mountains and 90 to 103 at lower elevations. Minimum relative humidity will range from 5 to 20 percent across Arizona and New Mexico and 20 to 35 percent in west Texas. Winds will be south to west at 10 to 20 mph with gusts near thunderstorms.

High pressure will bring mostly sunny skies to the Eastern Great Basin Area. High temperatures will be in the 70's and 80s in the north and around 100 in the south. Minimum relative humidity will range from 5 to 20 percent. Winds will be northwest to west at 10 to 20 mph.

The Southern California Area can expect mostly sunny skies. High temperatures will be in the upper 60's to mid 70's in coastal areas, mid 70's to mid 80's in the mountains and inland, mid 80's to mid 90's across the high deserts, and in the upper 90's to 110 over the low deserts. Minimum relative humidity will range from 5 to 15 percent in the deserts, 10 to 40 percent in the valleys and mountains, and 50 to 65 percent near the coast. Winds will be southeast to southwest at 10 to 20 mph over the mountains and high deserts and onshore winds will be at 6 to 12 mph.

The Northern California Area can expect mostly sunny skies. High temperatures will be in the mid 50's and 60's along the coast and in the 80's to 90's inland. Minimum relative humidity will range from 12 to 28 percent and winds will be southwest to northwest at 5 to 12 mph becoming southerly at 10 to 20 mph.

The Alaska Area will be mostly cloudy with scattered showers and isolated thunderstorms in the interior. High temperatures will be in the upper 50's and 60's and minimum relative humidity will range from 30 to 50 percent. Winds will be south at 15 mph from the Alaska Range southward and variable at 10 mph elsewhere.

# **ENTRAPMENT AVOIDANCE (cont...)**

Avoiding situations where firefighters become entrapped is the first concern when devising strategy and tactics. The following discussion points are among the things that should be considered. Discuss the three types of safety zones and describe examples. The burn Natural features Constructed sites <u>Discuss the guidelines for distance separation to avoid radiant heat injury.</u> Four times the maximum flame height (20 feet-flame height x = 80 feet radius from firefighters) Discuss heat impact factors that will affect the guidelines for distance separation. Convection heat from wind and terrain features Location relative to fire spread Reburn potential of fuel in safety zone Discuss that firefighters have a right to know the location of their escape routes and safety zones at all times. Discuss that firefighter have a right to ask for clarification when faced with unclear instructions or fear of the unknown. Describe a basic procedure for identification of effective escape routes and safety zones. Observe
