

**INCIDENT MANAGEMENT SITUATION REPORT  
SATURDAY, JUNE 15, 2002 0800 MDT  
NATIONAL PREPAREDNESS LEVEL 4**

**CURRENT SITUATION:**

Initial attack activity was light across the nation. Nationally, 171 new fires were reported yesterday, three of which became large fires, two in Southern Area and one in Southwest Area. Three large fires were contained, one each in Southern California, Rocky Mountain and Southwest Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Minnesota, Nevada, New Mexico, Texas, and Utah.

**ROCKY MOUNTAIN AREA LARGE FIRES:**

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Chesley) is assigned to manage the Hayman fire.

HAYMAN, Pike-San Isabel National Forest. Two Type 1 Incident Management Teams (Martin and Raley) are assigned. A transfer of command from Martin's Type 1 Incident Management Team to Frye's Type 1 Incident Management Team will occur today. This fire is burning six miles northwest of Lake George, CO in ponderosa pine, gambel oak and mixed conifer forest. Higher relative humidity moderated fire behavior; creeping, torching and short intense runs were observed. Crews successfully burned out around Lake George and dozers made good progress building fireline in the Bell Rock and Turkey Rock areas. Crews have initiated direct attack handline construction on several divisions. Approximately 10,000 residences are threatened and a mandatory evacuation is in place for 5,430 residents. Evacuation centers are open in Park, Douglas, Teller and Jefferson Counties. The Sheriff's Departments for the four counties are conducting an inventory of lost structures. An additional three residences, one commercial property and 13 outbuildings were confirmed lost. Highway 67 is closed.

MISSIONARY RIDGE, San Juan National Forest. A transfer of command from Solarz' Type 2 Incident Management Team to Melton's Type 1 Incident Management Team will occur at 0500 MDT on 6/16. This fire is ten miles north of Durango, CO and is burning in oakbrush, ponderosa pine and mixed conifer forest. Extreme fire behavior, a major run and rapid rates of spread were observed as the fire moved south toward several suburbs of Durango and east into the Florida drainage. Crews are constructing direct and indirect fireline. Three subdivisions were evacuated and numerous structures are threatened southwest of the fire. Structure protection is in place.

COAL SEAM, Grand Junction Dispatch Center Area Counties. A Type 1 Incident Management Team (Hart) is assigned. This fire is burning four miles west of Glenwood Springs, CO in gambel oak, pinyon pine, juniper and decadent spruce. Short runs on the northwest flank and torching were observed as the fire moved toward the Flat Top Wilderness Area. Heavy fuel loading with dead and downed fir on the northern perimeter is limiting the success of direct and indirect containment tactics. Personnel are scouting the area for anchor points, safety zones and spike camp locations. Crews have nearly completed handline construction above Glenwood Springs on

the south flank.

MIRACLE COMPLEX, Bureau of Land Management, Grand Junction District. A Type 2 Incident Management Team (Hartman) is assigned. This complex, consisting of the Long Canyon and Dierich Creek fires, is near Grand Junction, CO. The fires are burning in sagebrush, pinyon pine and juniper. Smouldering and torching were observed. Crews are constructing fireline, patrolling and mopping up.

HENSEL, Medicine Bow National Forest, Douglas Ranger District. A Type 2 Incident Management Team (Rios) is assigned. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Strong southeast winds increased fire behavior, pushing the fire southwest toward Laramie Peak. Crews are building handline in steep, rugged terrain with the support of aerial resources. Several ranches in the north Cottonwood Creek area are threatened.

### SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

WALKER, Coronado National Forest. A Unified Command between a Type 2 Incident Management Team (Kvale) and the government of Nogales, Sonora Mexico is in place. This fire is in Walker Canyon northwest of Nogales, AZ and is burning in chaparral, oak woodland and grass. Incident Management staff met with Nogales Fire Department of Sonora and the Mexican Army to plan suppression strategy and tactics. Extreme fire behavior with rapid rates of spread to the southeast and east were observed. Crews are constructing indirect attack handline in preparation for a burn out operation. Dry, flashy fuels, drought conditions, and steep terrain are impeding containment efforts. Numerous residences are threatened.

MONTOYA, Carson National Forest. A Type 2 Incident Management Team (Sears) is assigned. This fire is burning in ponderosa and pinyon pine east of Canjilon, NM. Light rainfall contributed to moderate fire behavior. Crews and dozers made good progress constructing direct attack fireline. The threat to residences has been significantly reduced.

ROYBAL, Sante Fe National Forest. A Type 1 Incident Management Team (Bateman) is assigned. This fire is four miles northeast of Pecos, NM and is burning in ponderosa pine and logging slash.

Significantly higher relative humidity moderated fire behavior. Crews made good progress constructing and holding containment lines. The evacuation order was lifted last night and power to the area has been restored.

PONIL, New Mexico State Forestry Office, Cimarron District. A Type 1 Incident Management Team (Lohrey) is assigned. This fire is burning ten miles west of Cimarron, NM in ponderosa pine. Crews are constructing indirect fireline on the west flank in preparation for a burn out operation. The town of Ute Park, Philmont Boy Scout Camp, Vermego Park Complex, and El Paso Natural Gas Company transfer station and wells are threatened.

WEST DOME, Arizona State Land Department. This fire is burning five miles northwest of Huachuca City, AZ in grass, mesquite and juniper. Extreme fire behavior was observed due to erratic winds. Crews are building handline and protecting Tucson Power and Electric utility poles.

EMP = El Malpais National Park

### EASTERN GREAT BASIN AREA LARGE FIRES:

BIG WASH, Bureau of Land Management, Cedar City Field Office. A Type 1 Incident Management Team (Hefner) is assigned. The fire is burning 21 miles southeast of Cedar City, UT in bug kill spruce and fir. Torching, backing and short interior runs were observed. Crews are constructing fireline on the west flank, burning out on the northwest perimeter, and mopping up on the south and east flanks. Several residences, a communication site and historic structures are threatened. US Highway 14 will be reopened today allowing Cedar Breaks National Monument to resume normal operation.

SANFORD, Dixie National Forest. A Fire Use Management Team (Cones) is assigned. This fire is being managed by the most meaningful, most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. The fire is 20 miles northeast of Panguitch, UT and is burning in aspen, pinyon pine, juniper and mixed conifer forest. Crowning and torching were observed in the Sanford and Deer Creek areas. Crews are constructing handline on the north flank in Willow Creek. Structure protection is in place for Sanford Ranch.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
BIG WASH	UT	CCD	5,284	95	6/17	755	26	13	5	0	3.5M
SANFORD	UT	DIF	54,000	15	UNK	184	7	3	2	0	425K

## NORTHERN CALIFORNIA AREA LARGE FIRES:

**FORKS**, Klamath National Forest. A Type 2 Incident Management Team (McElwain) is assigned. This fire is three miles downstream from Forks of the Salmon, CA and is burning in continuous hardwood and mixed conifer forest. Crews are protecting structures, mopping up and holding. Salmon River Road is closed to non-local traffic.

**KUPUKUPU**, Hawaii Volcanos National Park. Lava flows from Kilauea ignited this fire on the southern edge of Hawaii in the Hawaiian Islands. Very deep duff layers are contributing to strong reburn potential and continuously moving lava has made portions of the fire too dangerous for crews. Crews are constructing fireline on the north flank and burning out on the coastal perimeter.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
FORKS	CA	KNF	1,275	90	6/15	726	17	7	6	0	1.1M
KUPUKUPU	HI	HVP	3,660	80	6/15	104	3	0	5	0	960K

## SOUTHERN AREA LARGE FIRES:

**MARBLEYARD COMPLEX**, George Washington and Jefferson National Forests. A Type 2 Incident Management Team (Kearney) is assigned. This complex, comprised of several fires, is burning three miles south of Glasgow, VA in standing dead timber, hardwoods and rhododendron. No new information was reported.

**BLACKJACK BAY COMPLEX**, Okefenokee National Wildlife Refuge. A Unified Command between an interagency Fire Use Management Team (Zimmerman), the Georgia Forestry Commission and the Florida Division of Forestry is in place. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. A ten mile section of preexisting permanent fuel break that surrounds the Refuge has been successfully utilized to hold the fires. Personnel are monitoring fire activity, fuels and weather conditions.

**CAPE FEAR COMPLEX**, North Carolina Division of Forest Resources. This complex, comprised of the Thorp Road and Plantation Road fires, is in New Hanover and Burnwick Counties, north of Murrayville and west of Henrytown, NC. The fires are burning in pine with smouldering, creeping and occasional flare-ups observed. Tractor plows are constructing fireline and structure protection is in place for a threatened housing development.

**EGLIN COMPLEX**, Eglin Air Force Base. This complex, consisting of the Grassy Point, Roberts Point and Range Road 747 fires, is near Fort Walton Beach, FL. The fires are burning in southern rough. Personnel are monitoring smoke dispersion on State Road 87, Interstate 10 and in the Pensacola area.

### ALASKA AREA LARGE FIRES:

MP 78 ELLIOTT HIGHWAY, Bureau of Land Management, Tanana Zone. An Alaska Type 2 Interagency Incident Management Team (McKnight) is assigned. This fire is burning seven miles southwest of Livengood, AK in black spruce, hardwoods and tussock tundra. Precipitation contributed to minimal fire intensity. Crews are improving existing contingency lines for a planned burn out and mopping up. This will be the last report unless significant activity occurs.

## OUTLOOK:

### **\*\*\*A RED FLAG WARNING HAS BEEN POSTED IN NORTHERN AND CENTRAL ARIZONA FOR GUSTY WEST WINDS, VERY LOW RELATIVE HUMIDITY AND EXTREME FIRE DANGER\*\*\***

Weak upper level disturbances moving across Rocky Mountain Area will bring partly to mostly sunny skies with a chance of scattered thunderstorms in mountainous areas. High temperatures will be in the 60's to near 80 in the mountains and 75 to 92 at lower elevations. Minimum relative humidity will range from 10 to 23 percent in the mountains, 5 to 12 percent across the western lowlands, and 20 to 33 percent over the eastern lowlands. Winds will be west at 10 to 20 mph with gusts to 30 mph in west of the Continental Divide, and east at 10 to 18 mph east of the Divide.

Southwest Area can expect mostly sunny to partly cloudy skies with a chance of thunderstorms in eastern New Mexico and west Texas. High temperatures will be in the 70's and 80's in the mountains and west Texas, and in the 90's to 110 at lower elevations. Minimum relative humidity will range from 20 to 35 percent in eastern New Mexico and west Texas, and 5 to 15 percent in the remainder of the area. Winds will be south to west at 10 to 20 mph in New Mexico and west Texas. In Arizona, winds will be west at 15 to 25 mph and gusty.

High pressure over Eastern Great Basin Area will bring mostly sunny skies. High temperatures will be in the 90's to 105 in the valleys and mid 70's to mid 80's in the mountains. Minimum relative humidity will range from 3 to 15 percent in the valleys and 7 to 20 percent at higher elevations. Winds will be west to northwest at 5 to 15 mph and gusty in the southern half of the area.

High pressure over Northern California Area will bring mostly sunny skies with morning low clouds and fog along the coast. High temperatures will be 58 to 75 near the coast and 76 to 94 inland. Minimum relative humidity will range from 12 to 25 percent inland. Winds will be south to 15 mph in the Sacramento Valley and southwest to northwest at 5 to 20 mph elsewhere.

Southern Area can expect mostly sunny skies with showers and thunderstorms in southern Florida. High temperatures will be in the 70's, 80's and 90's. Minimum relative humidity will be above 40 percent in most areas and winds will be generally west to northwest at 5 to 15 mph.

Alaska Area can expect mostly sunny skies with high temperatures in the 60's and mid 70's. Minimum relative humidity will be in the upper 20 and 30 percent range. Winds will be variable to 10 mph.

Southern California Area can expect mostly sunny skies with morning low clouds and fog along the coast. High temperatures will be upper 60's and 70's in coastal areas, in the 80's to mid 90's inland, in the 80's in the mountains, and in the 90's to 110 across the deserts. Minimum relative humidity will range from 8 to 15 percent in the deserts, 10 to 20 percent in the mountains, 20 to 35 percent in the valleys, and above 50 percent near the coast. Winds will be southwest to northwest at 8 to 18 mph over the mountains and deserts, and onshore at 8 to 16 mph near the coast.

## LOOKOUTS

Lookouts are often better situated to notice the cumulative changes of fire behavior. Fire Order #8 says, "Establish lookouts in potentially hazardous situations."

Should you utilize lookouts at all times?

Lookouts should be posted at all times.

What are you looking for when you are selecting a lookout location?

Choose a good vantage point, preferably with a good overview of the entire area where firefighters are located, including escape routes and safety zones.

Utilize aircraft, but have an alternative on the ground.

What are the desired qualities, capabilities, knowledge, and responsibilities of a lookout person?

Experienced firefighter.

Solid knowledge of fire behavior and ability to recognize and monitor other environmental hazards.

Good communicator--keeps the crew advised of fire behavior changes, tracks weather trends and relays the information, informs crew of work progress and updates from the latest strategy and tactical briefings.

Monitors and accounts for all individuals within his/her assigned area at all times, and will notify others if breaks are needed.

What is the necessary equipment for a lookout?

Personal Protective Equipment (PPE), radio with extra batteries, compass, binoculars, belt weather kit, Incident Action Plan (IAP), map, food, and water.
