

**INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, JUNE 17, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4**

CURRENT SITUATION:

Initial attack activity was heavy in Southern California and light elsewhere. Nationally, 80 new fires were reported yesterday. Two of these became large fires, one each in Southwest and Southern California Areas. One large fire was contained in Southwest Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Kansas, Minnesota, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah and Washington.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage the Hayman fire.

MISSIONARY RIDGE, San Juan National Forest. A Unified Command between a Type 1 Incident Management Team (Melton) and La Plata County Emergency Management is in place. This fire is 15 miles northeast of Durango, CO and is burning in gambel oak, ponderosa pine and mixed conifer forest. Extreme fire behavior, short crown runs, torching and long range spotting were observed as the fire moved southeast and southwest. Crews are constructing direct and indirect attack fireline in steep, rugged terrain. Several subdivisions south of Lemon and Vallecito Reservoirs remain evacuated. Additional evacuations are underway south of both Reservoirs as well and on the north side of Vallecito Reservoir. An evacuation center is open in Bayfield, CO. Structure protection is in place for the 1,711 residences that are threatened.

HAYMAN, Pike-San Isabel National Forest. Two Type 1 Incident Management Teams (Frye and Raley) are assigned. This fire is burning six miles northwest of Lake George, CO in ponderosa pine, gambel oak and mixed conifer forest. Torching and short crown runs were observed on portions of the fire due to dry, heavy fuel loading, steep terrain and strong local winds. Crews made good progress constructing direct and indirect attack handline on all divisions with the support of aerial resources. Approximately 10,000 residences are threatened and a mandatory evacuation remains in place for 3,000 residents. Evacuation centers are open in Park, Douglas, Teller and Jefferson Counties. The Sheriff's Departments for the four counties are conducting an inventory of lost structures. Highway 67 remains closed.

COAL SEAM, Grand Junction Dispatch Center Area Counties. A Type 1 Incident Management Team (Hart) is assigned. This fire is burning four miles west of Glenwood Springs, CO in gambel oak, pinyon pine, juniper and decadent spruce. Isolated torching was observed on the northwest perimeter. Heavy dead and downed fir on the northern perimeter limits the success of direct or indirect containment tactics. A confinement assessment plan addressing suppression strategy for this portion of the fire is underway. Crews have spiked out and are constructing handline on the east flank.

HENSEL, Medicine Bow National Forest, Douglas Ranger District. A Type 2 Incident Management Team (Rios) is assigned. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. A significant increase in fire behavior on the east flank occurred due to strong west winds. Isolated runs were observed on the southwest flank as the fire moved up Laramie Peak. Crews are building handline in steep, rugged terrain with the support of aerial resources. Several ranches, Harris Park and a Boy Scout camp are threatened.

MIRACLE COMPLEX, Bureau of Land Management, Grand Junction District. A Type 2 Incident Management Team (Hartman) is assigned. This complex, consisting of the Long Canyon and Dierich Creek fires, is near Grand Junction, CO. The fires are burning in sagebrush, pinyon pine and juniper. Smouldering and torching were observed. Crews are patrolling and mopping up.

SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

ROYBAL/TRAMPAS, Sante Fe National Forest. A Type 1 Incident Management Team (Bateman) is assigned. The Roybal fire is four miles northeast of Pecos, NM and the Trampas fire is in the Pecos Wilderness Area eight miles west of Rociada, NM. The fires are burning in ponderosa pine and mixed conifer forest. Running and torching were observed on Trampas. Crews are constructing fireline on the south flank in steep terrain with limited access. Structure protection is in place for Rociada and improvements in Denton Canyon.

WEST DOME, Arizona State Land Department. This fire is burning five miles northwest of Huachuca City, AZ in grass, mesquite and juniper. Backing and isolated flare-ups were observed. Crews are building handline in steep, rugged terrain. Structure protection is in place for three residences.

WALKER, Coronado National Forest. A Unified Command between a Type 2 Incident Management Team (Kvale) and the government of Nogales, Sonora Mexico is in place. This fire is in Walker Canyon northwest of Nogales, AZ and is burning in chaparral, oak woodland and grass. Smouldering and creeping were observed. Burn out operations were successful along the north and east flanks in US territory. US crews are building fireline along the west flank and Mexican crews are constructing direct attack fireline along the south and east flanks. Aerial resources are supporting suppression efforts on both sides of the border. Numerous residences remain

threatened.

PONIL, New Mexico State Forestry Office, Cimarron District. A Type 1 Incident Management Team (Lohrey) is assigned. This fire is burning two miles northwest of Ute Park, NM in ponderosa pine. The fire is backing southwest into the Middle Ponil and Greenwater drainages. Moderate fire behavior has allowed crews to construct direct attack handline on the west flank. The town of Ute Park, historic mining structures, a Boy Scout camp and several ranches are threatened.

GARFIELD, New Mexico State Forestry Office, Socorro District. This fire is burning in salt cedar 24 miles south of Truth or Consequences, NM. Extreme fire behavior and spotting were observed. Erratic winds and extremely dry fuels are hampering containment efforts.

WESTERN GREAT BASIN AREA FIRES:

CANNON, Humboldt-Toiyabe National Forest. A Type 2 Incident Management Team (Murphy) is assigned. A Type 1 Incident Management Team (Stutler) has been ordered. This fire is 25 miles northwest of Bridgeport, CA in a Marine Winter Warfare Training Area. The fire is burning in sagebrush, ponderosa pine and mixed conifer forest. The fire has three fronts on the north, east and west perimeters. Extreme fire behavior was observed. Gusty, erratic winds, low relative humidity, steep terrain, limited access and unexploded ordnance in the Training Area are impeding containment efforts. All ground personnel are constructing fireline and creating defensible space around Walker. The town remains evacuated and fire camp has been moved to the Douglas County Fairgrounds. A preliminary evacuation plan for Coleville has been prepared by the Mono County Sheriff's Department. The town of Topaz, Topaz Guard Station, Topaz Resort, a Marine guard station and the Carson-Iceberg Wilderness Area are threatened. Highway 395 is closed. One residence and three outbuildings were lost in Walker.

CANNON	NV	HTF	5,000	7	6/20	387	9	12	4	4	75K

SOUTHERN CALIFORNIA AREA LARGE FIRES:

SUDDEN RANCH, Vandenberg Air Force Base. A California Department of Forestry and Fire Protection Type 1 Incident Command Team (Maner) is assigned. This fire is burning in heavy brush six miles west of Lompoc, CA. Strong onshore winds contributed to very active fire behavior with several slopovers on the southeast flank. Crews are building and improving fireline. Several ranches, two military facilities, a flight tracking station and Jalama County Beach day use area are threatened.

BLUECUT, San Bernardino National Forest. A Type 2 Incident Management Team (Walker) is assigned. This fire is one mile north of the Interstate 15 and Interstate 215 junction near the community of Oak Hills, CA. Extreme fire behavior was observed in heavy chaparral. Interstate 15 was closed briefly yesterday. Approximately 1,000 structures are threatened.

BOREL, Sequoia National Forest. A Unified Command between a Type 2 Incident Management Team (Dietrich) and Kern County is in place. This fire is burning in grass, brush and oak one mile northwest of Bodfish, CA. Active fire behavior was observed. Hot temperatures, low relative humidity and low fuel moisture are hampering containment efforts. Residents from Bodfish, Lake Isabella and Keyesville have been allowed to return to their homes. Six residences and eight outbuildings were lost during the initial phases of the fire.

EASTERN GREAT BASIN AREA LARGE FIRES:

BIG WASH, Bureau of Land Management, Cedar City Field Office. A Type 1 Incident Management Team (Hefner) is assigned. The fire is burning 21 miles southeast of Cedar City, UT in bug kill spruce and fir. Minimal fire behavior was observed. Crews are mopping up on the northwest and northeast flanks and rehabilitating fireline on the east flank. Operational resources are supporting the Sanford fire today.

SANFORD, Dixie National Forest. A transfer of command from Cones' Fire Use Management Team to Hefner's Type 1 Incident Management Team will occur today. The fire is being managed by the most meaningful, most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. The fire is 20 miles northeast of Panguitch, UT and is burning in aspen, pinyon pine, juniper and mixed conifer forest. Crowning and torching were observed in Deer Creek. Crews are constructing handline in Sanford Creek and on the north flank in Willow Creek. Structure protection is in place for Sanford Ranch.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
BIG WASH	UT	CCD	5,253	98	6/17	670	21	16	6	0	4.4M
SANFORD	UT	DIF	54,000	30	UNK	219	7	3	5	0	850K

SOUTHERN AREA LARGE FIRES:

MARBLEYARD COMPLEX, George Washington and Jefferson National Forests. A Type 2 Incident Management Team (Kearney) is assigned. This complex, comprised of several fires, is burning three miles south of Glasgow, VA in standing dead timber, hardwoods and rhododendron. The Marbleyard fire made a significant run to the top of Gunter Ridge and is backing into Hellgate Creek in the James River Face Wilderness Area. Crews are building handline and burning out in very steep terrain with heavy fuel loading. The Appalachian Trail is closed.

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command between an interagency Fire Use Management Team (Zimmerman), the Georgia Forestry Commission and the Florida Division of Forestry is in place. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Receding water levels in the swamp have increased fire behavior and the potential for reburn. A ten mile section of preexisting permanent fuel break that surrounds the Refuge has been successfully utilized to hold the fires. Personnel are monitoring fire activity, fuels and weather conditions.

CAPE FEAR COMPLEX, North Carolina Division of Forest Resources. This complex, comprised of the Thorp Road and Plantation Road fires, is in New Hanover and Brunswick Counties, north of Murrayville and west of Henrytown, NC. No new information was reported. This will be the last report unless new information is received.

EGLIN COMPLEX, Eglin Air Force Base. This complex, consisting of the Grassy Point, Roberts Point and Range Road 747 fires, is near Fort Walton Beach, FL. Precipitation contributed to minimal fire behavior. Aerial resources are hot spotting within the interior of the fire. Personnel are monitoring smoke dispersion on State Road 87, Interstate 10 and in the Pensacola area.

OUTLOOK:

Rocky Mountain Area can expect mostly sunny skies with a chance of isolated thunderstorms east of the Continental Divide. High temperatures will be upper 60's to low 80's in the mountains and in the 80's and 90's at lower elevations. Minimum relative humidity will range from 5 to 25 percent. Winds will be west at 10 to 30 mph with gusts to 35 mph.

Southwest Area can expect mostly sunny skies with a chance of isolated wet thunderstorms in eastern New Mexico and west Texas. High temperatures will be in the 70's and 80's in the mountains and above 100 at lower elevations. Minimum relative humidity will range from 3 to 10 percent in Arizona, 4 to 20 percent in New Mexico, and 15 to 35 percent in west Texas. Winds will be west at 10 to 20 mph with gusts to 35 mph.

Western Great Basin Area can expect mostly sunny skies and increasing winds. High temperatures will be in the 80's in the north and near 100 in the south. Minimum relative humidity will range from 4 to 11 percent. Winds will be west at 15 to 25 mph with gusts to 30 mph likely by late afternoon.

Southern California Area can expect mostly sunny skies with morning low clouds and fog along the coast. High temperatures will be in the 70's to low 80's in coastal areas, in the 80's and 90's in the mountains and inland, and in the 90's to 110 across the deserts. Minimum relative humidity will range from 8 to 15 percent in the deserts, 10 to 20 percent in the mountains, 12 to 25 percent in the valleys, and above 45 percent near the coast. Winds will be southwest to northwest at 10 to 20 mph over the mountains and deserts, and onshore at 8 to 15 mph near the coast.

High pressure over Eastern Great Basin Area will bring mostly sunny skies with isolated thunderstorms over northern Utah, Idaho and the Bridger-Teton National Forest. High temperatures will be 85 to 102 in the valleys and 68 to 85 in the mountains. Minimum relative humidity will range from 3 to 16 percent in the valleys and 12 to 30 percent at higher elevations. Winds will be west to northwest at 10 to 20 mph.

<u>COMMUNICATIONS</u>	
<u>Effective communication is a critical backbone of safe and successful operations. Discuss the factors that can affect radio communication at the incident.</u>	
	<u>Knowledge of the radio issued to the individuals</u>
	<u>Net control, frequencies</u>
	<u>Line-of-site restrictions</u>
	<u>Antenna polarization effect (direction of the antenna)</u>
	<u>Minimizing noise interference</u>
<u>How can you mitigate potential problems?</u>	
	<u>Implement effective communication procedures: be brief, clear, concise, and to-the-point.</u>
	<u>Give a good comprehensive briefing (Refer to the Briefing Checklist inside the back cover of the Incident Response Pocket Guide.).</u>
	<u>Confirm that relayed information is received, acknowledged, and understood.</u>
	<u>Keep a continuous information flow (e.g.: updates on weather, fire behavior, work progress; changes in strategy/tactics; arrival of additional resources; solicit feedback).</u>
	<u>Establish emergency check-in procedures.</u>
	<u>Provide a minimum of 4 radios per 20-person firefighter crew.</u>
