

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, JUNE 18, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4**

CURRENT SITUATION:

Initial attack activity was moderate in Southern California Area and light elsewhere. Nationally, 196 new fires were reported yesterday. Four of these became large fires, one each in Western Great Basin, Southwest, Southern and Northwest Areas. Four large fires were contained, one each in Southwest, Eastern Great Basin, Western Great Basin and Northwest Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Kansas, Minnesota, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington and Wyoming.

A Hawkins and Powers Aviation C-130A air tanker on contract with the United States Forest Service crashed yesterday while assigned to the Cannon fire near Walker, CA. The three crew members aboard were fatally injured. The firefighting community extends condolences to the family and friends of the deceased.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage the Hayman fire.

MISSIONARY RIDGE, San Juan National Forest. A Unified Command between a Type 1 Incident Management Team (Melton) and La Plata County Emergency Management is in place. This fire is 15 miles northeast of Durango, CO and is burning in gambel oak, ponderosa pine and mixed conifer forest. Extreme fire behavior, crowning runs, torching and long range spotting were observed on the east and southwest flanks as the fire crossed containment lines and the Los Pinos River. Crews are constructing direct and indirect attack fireline in steep, rugged terrain. Several subdivisions south of Lemon and Vallecito Reservoirs remain evacuated. Additional evacuations occurred yesterday on the southwest portion of the fire in Lake Vista Estates, Forest Lakes and Cool Water subdivisions. An evacuation center is open in Bayfield, CO. Structure protection is in place for the 17 subdivisions that are threatened. Nine residences and four outbuildings were lost.

HAYMAN, Pike-San Isabel National Forest. Two Type 1 Incident Management Teams (Frye and Raley) are assigned. This fire is burning six miles northwest of Lake George, CO in ponderosa pine, gambel oak and mixed conifer forest. Observed fire activity included torching, short runs and spotting on the northern flank and extreme fire behavior on the east and west flanks. The fire crossed Trail Creek Road in the east and is spreading further into the Lost Creek Wilderness Area in the west. Gusty, erratic winds, low relative humidity, high temperatures and very dry fuels are hampering containment efforts. Crews are constructing direct and indirect attack handline with the support of aerial resources. A mandatory evacuation is in place for approximately 3,000 residents. The communities of Painted Rock, Quinlan Gulch and Ridgewood in Teller County were evacuated yesterday. Evacuation centers are open in Park, Douglas, Teller and Jefferson Counties. Highway

67 is closed.

HENSEL, Medicine Bow National Forest, Douglas Ranger District. A Type 2 Incident Management Team (Rios) is assigned. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Extreme fire behavior, long range spotting and isolated torching were observed as the fire moved east up Black Mountain and Laramie Peak. High winds suspended air tanker operations. Crews are building handline in steep, rugged terrain. Several ranches, Harris Park and a Boy Scout camp are threatened. An evacuation plan has been prepared for Harris Park.

COAL SEAM, Grand Junction Dispatch Center Area Counties. A Type 1 Incident Management Team (Hart) is assigned. This fire is burning four miles west of Glenwood Springs, CO in gambel oak, pinyon pine, juniper and decadent spruce. Torching was observed on the northwest perimeter. Crews have spiked out and are constructing handline on the east and west flanks. A confinement strategy will be utilized for the northern portion of the fire.

MIRACLE COMPLEX, Bureau of Land Management, Grand Junction District. A transfer of command from Hartman's Type 2 Incident Management Team to a Type 3 Incident Management Team occurred yesterday. This complex, consisting of the Long Canyon and Dierich Creek fires, is near Grand Junction, CO. The fires are burning in sagebrush, pinyon pine and juniper. Crews are patrolling and mopping up.

WESTERN GREAT BASIN AREA FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

CANNON, Humboldt-Toiyabe National Forest. A transfer of command from Murphy's Type 2 Incident Management Team to Stutler's Type 1 Incident Management Team will occur today. This fire is burning in sagebrush, ponderosa pine and mixed conifer forest 25 miles northwest of Bridgeport, CA. The fire is moving east-northeast and has crossed Highway 395 and the Walker River. Extreme fire behavior, long range spotting and numerous fire whirls were observed. Gusty, erratic winds, low relative humidity, steep terrain, limited access and unexploded ordnance in a Marine Winter Warfare Training Area are impeding containment efforts. Personnel are constructing fireline and creating defensible space around structures on the eastern perimeter. Residents in Walker have been allowed to return to their homes. The community of Camp Antelope and numerous residences east of Highway 395 have been evacuated. Evacuation centers are open in Coleville and Topaz. Highway 395 is closed. A water tender responding to the air tanker crash was involved in a rollover accident. The driver was transported to a hospital and is

in stable condition.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

BLUECUT, San Bernardino National Forest. A Unified Command between a Type 2 Incident Management Team (Walker) and San Bernardino County Fire Department is in place. This fire is one mile north of the Interstate 15 and Interstate 215 junction near the community of Oakhills, CA. Extreme fire behavior was observed in heavy chaparral. The fire made a major run to the north and northeast, crossing Interstate 15. Approximately 500 structures, power lines supplying the City of Los Angeles, a communications site, natural gas pipelines and liquid fuel pipelines are threatened. Evacuations occurred in the communities of Summit Estates, Oakhills and Baldy Mesa. Interstate 15 is closed. Two California Department of Forestry and Fire Protection engines were burned over. Three crew members sustained injuries and are in stable condition at a local hospital.

SUDDEN RANCH, Vandenberg Air Force Base. A Unified Command between a California Department of Forestry and Fire Protection Type 1 Incident Command Team (Maner), Vandenberg Air Force Base (Ardoin) and Santa Barbara County Fire Department (Schmitt) is in place. This fire is burning in heavy brush six miles west of Lompoc, CA. Very active fire behavior was observed on the north and west flanks. Dozers are constructing indirect attack fireline on the east and northwest perimeters. Several ranches, two military facilities and a flight tracking station are threatened. One outbuilding was lost.

BOREL, Sequoia National Forest. A Unified Command between a Type 2 Incident Management Team (Dietrich) and Kern County Fire Department is in place. This fire is burning in grass, brush and oak one mile northwest of Bodfish, CA. Minimal fire activity was observed. Crews are patrolling and mopping up. Reduction in acreage is due to better mapping.

SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

BMG, Sante Fe National Forest. A Type 1 Incident Management Team (Humphrey) will assume command of the fire today. This fire is burning in ponderosa pine and mixed conifer forest seven miles west of Llaves, NM. Torching and crowning were observed. Three ranches and many gas and oil wells are threatened. Structure protection is in place for a ranch that was evacuated.

ROYBAL/TRAMPAS, Sante Fe National Forest. A Type 1 Incident Management Team (Bateman) is assigned. The Roybal fire is four miles northeast of Pecos, NM and the Trampas fire is in the Pecos Wilderness Area eight miles west of Rociada, NM. The fires are burning in ponderosa pine and mixed conifer forest. A major run in the Rito Esteros drainage occurred on Trampas. Crews are constructing fireline on the south flank and around spot fires on the east flank. Structure protection is in place for improvements in Denton Canyon.

WALKER, Coronado National Forest. A Unified Command between a Type 2 Incident Management Team (Kvale) and the government of Nogales, Sonora Mexico is in place. A transfer of command from Kvale's Type 2 Incident Management Team to a Type 3 Incident Management Team will occur at 1800 MDT. This fire is in Walker Canyon northwest of Nogales, AZ and is burning in chaparral, oak woodland and grass. Active runs were observed on two flanks. US crews successfully suppressed a 20 acre slopover on the northwest perimeter and are patrolling, mopping up and rehabilitating fireline on the north and east flanks. Both US and Mexican crews are building direct attack fireline along the west flank. Aerial resources are supporting suppression efforts on both sides of the border. Numerous residences remain threatened.

WEST DOME, Arizona State Land Department. This fire is burning five miles northwest of Huachuca City, AZ in grass, mesquite and juniper. Isolated interior flare-ups were observed. Crews are patrolling and mopping up.

GARFIELD, New Mexico State Forestry Office, Socorro District. This fire is burning in salt cedar 24 miles south of Truth or Consequences, NM. Crews are mopping up. Reduction in acreage is due to better mapping. This will be the last report unless significant activity occurs.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

SANFORD, Dixie National Forest. A Type 1 Incident Management Team (Hefner) is assigned. A Fire Use Management Team (Cones) will remain on the incident to assist with fire management. The fire is being managed by the most meaningful, most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. The fire is 20 miles northeast of Panguitch, UT and is burning in aspen, pinyon pine, juniper and mixed conifer forest. Crowning and torching were observed in Deer Creek. Crews are constructing handline on the north flank with support from aerial resources. Structure protection is in place for Sanford Ranch. Increase in acreage is due to better mapping.

CCD = Bureau of Land Management, Cedar City Field Office

SOUTHERN AREA LARGE FIRES:

MARBLEYARD COMPLEX, George Washington and Jefferson National Forests. A Type 2 Incident Management Team (Kearney) is assigned. This complex, comprised of several fires, is burning three miles south of Glasgow, VA in standing dead timber, hardwoods and rhododendron. The Marbleyard fire has moved into the Sawmill Hollow drainage in the James River Face Wilderness Area. Crews are constructing fireline and burning out where necessary. The Appalachian Trail is closed.

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command between an interagency Fire Use Management Team (Zimmerman), the Georgia Forestry Commission and the Florida Division of Forestry is in place. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Receding water levels in the swamp have increased fire behavior and the potential for reburn. A ten mile section of preexisting permanent fuel break that surrounds the Refuge has been successfully utilized to hold the fires. Personnel are monitoring fire activity, fuels and weather conditions.

LEGENDS, South Carolina Forestry Commission. This fire is burning in wax myrtle and titi ten miles south of Conway, SC. Difficult terrain is hampering containment efforts. Several residences and commercial properties are threatened.

EGLIN COMPLEX, Eglin Air Force Base. This complex, consisting of the Grassy Point, Roberts Point and Range Road 747 fires, is near Fort Walton Beach, FL. The fires are in monitor status.

OUTLOOK:

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN SOUTHEAST WYOMING FOR HIGH WINDS, LOW RELATIVE HUMIDITY AND VERY WARM TEMPERATURES*****

Rocky Mountain Area can expect mostly sunny skies with a chance of isolated thunderstorms in northwestern Wyoming. High temperatures will be in the 70's to low 80's in the mountains and in the 80's and low 90's at lower elevations. Minimum relative humidity will range from 5 to 18 percent in Colorado and southern Wyoming and 20 to 35 percent in the Black Hills and northern Wyoming. Winds will be west to southwest at 12 to 30 mph with gusts to 35 mph.

Western Great Basin Area can expect mostly sunny to partly cloudy skies and increasing winds. High temperatures will be low to mid 80's in the north and in the 80's to 105 in the south. Minimum relative humidity will range from 4 to 14 percent. Winds will be west at 10 to 20 mph with gusts to 30 mph.

A weak Pacific trough moving into Southern California Area will bring mostly sunny skies with morning low clouds and fog along the coast. High temperatures will be mid 60's to low 70's in coastal areas, in the 80's and low 90's in the mountains and inland, and in the 80's to 107 across the deserts. Minimum relative humidity will range from 10 to 20 percent in the mountains and deserts, 25 to 40 percent in the valleys, and above 55 percent near the coast. Winds will be southwest to northwest at 12 to 25 mph, gusty over the mountains and deserts, and onshore at 8 to 18 mph near the coast.

High pressure over Southwest Area will bring mostly sunny skies with a chance of thunderstorms in west Texas. High temperatures will be in the 80's to low 90's in the mountains and 105 to 110 at lower elevations. Minimum relative humidity will range from 3 to 10 percent in Arizona, 4 to 15 percent in New Mexico, and 10 to 35 percent in west Texas. Winds will be west to southwest at 10 to 15 mph with gusts to 25 mph.

Eastern Great Basin Area can expect mostly sunny skies with isolated thunderstorms over northern Utah, Idaho and the Bridger-Teton National Forest. High temperatures will be 70 to 85 in the north and 85 to 100 in the south. Minimum relative humidity will range from 4 to 20 percent in the southern Utah and 15 to 30 percent elsewhere. Winds will be southwest to northwest at 15 to 30 mph.

An unstable air mass over Southern Area will bring partly to mostly cloudy skies with showers and thunderstorms over Florida and South Carolina. High temperatures will be in the 80's and 90's. Minimum relative humidity will be above 40 percent in most areas. Winds will be variable at less than 10 mph.

www.nifc.gov/sixminutes/index_j.asp

<u>ESCAPE ROUTES</u>	
<u>An escape route is a preplanned and understood route to reach a safety zone. What are the primary concerns in choosing an escape route?</u>	
	<u>Select the closest, least obstructed route.</u>
	<u>Plan for more than one escape route.</u>
	<u>Avoid an uphill escape.</u>
	<u>Scout and clearly mark the route for visibility (aids during smoky situations or night operational periods).</u>
	<u>Determine escape time--consider slowest person, fatigue, and temperature factors.</u>
	<u>Continuously reassess the situation with regard to work progress and additional resource arrivals.</u>
	<u>Assure all line personnel are familiar with escape routes.</u>
