

**INCIDENT MANAGEMENT SITUATION REPORT  
WEDNESDAY, JUNE 19, 2002 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 4**

**CURRENT SITUATION:**

Initial attack activity was moderate in the Southern California Area and light elsewhere. Nationally, 113 new fires were reported. Three of these became large fires, one each in the Southern California, Southwest and Northern California Areas. Four large fires were contained, one each in the Southern California, Southwest, Southern and Northern California Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Kansas, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington and Wyoming.

**ROCKY MOUNTAIN AREA LARGE FIRES:**

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage the Hayman fire.

HAYMAN, Pike-San Isabel National Forest. Two Type 1 Incident Management Teams (Frye and Raley) are assigned. This fire is burning six miles northwest of Lake George, CO in ponderosa pine, gambel oak and mixed conifer forest. Observed fire activity included torching, short runs and spotting on the northern flank and extreme fire behavior on the east and southeast flanks. Gusty, erratic winds low relative humidity, high temperatures and very dry fuels are hampering containment efforts. Crews are constructing direct and indirect attack handline with the support of aerial resources. A mandatory evacuation is in place for approximately 5,000 residents. The northern portion of Woodland Park was evacuated yesterday. Evacuation centers are open in Park, Douglas, Teller and Jefferson Counties. Highway 67 is closed.

MISSIONARY RIDGE, San Juan National Forest. A Type 1 Incident Management Team (Melton) is assigned. This fire is 15 miles northeast of Durango, CO and is burning in gambel oak, ponderosa pine and mixed conifer forest. Extreme fire behavior, crowning runs, torching and long range spotting were observed on the east, southwest and north flanks. High winds suspended air tanker operations. Crews are constructing direct and indirect attack fireline in steep, rugged terrain. Eighteen subdivisions south of Lemon and Vallecito Reservoirs remain evacuated and structure protection is in place. Additional evacuations occurred yesterday on the southwest portion of the fire in the Missionary Ridge subdivision and the community of Trimble. An evacuation center is open in Bayfield, CO. One outbuilding was lost.

HENSEL, Medicine Bow National Forest. A Type 2 Incident Management Team (Rios) is assigned. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Extreme fire behavior, long range spotting, torching and rapid rates of spread were observed as the fire moved east through Harris Park. High winds suspended air tanker operations. Crews are building handline in steep, rugged terrain. Several ranches, Harris Park and a Boy Scout camp are threatened. Harris Park was evacuated yesterday. Three residences and an outbuilding were lost.

COAL SEAM, Grand Junction Dispatch Center Area Counties. A Type 1 Incident Management Team (Hart) is assigned. A Fire Use Management Team (Cook) has been ordered. This fire is burning four miles west of Glenwood Springs, CO in gambel oak, decadent spruce, fir and aspen. Torching was observed on the northwest perimeter. A confinement strategy is being utilized on the north flank due to extremely steep and dangerous terrain. Crews are making good progress constructing fireline on the east and west flanks, forcing the fire north into areas with low spread potential.

MIRACLE COMPLEX, Bureau of Land Management, Grand Junction District. This complex, comprised of the Long Canyon and Dierich Creek fires, is near Grand Junction, CO. The fires are burning in sagebrush, pinyon pine and juniper. Crews are patrolling and mopping up.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

**SOUTHERN CALIFORNIA AREA LARGE FIRES:**

BLUECUT, San Bernardino National Forest. A Unified Command between a Type 1 Incident Management Team (Studebaker), the San Bernardino County Fire Department (Drennen) and the California Department of Forestry and Fire Protection (Sappok) is in place. This fire is one mile north of the Interstate 15 and Interstate 215 junction near the community of Oakhills, CA. Extreme fire behavior was observed in heavy chaparral. Crews are constructing fireline on the south and east flanks. Residents from the communities of Oakhills and Baldy Mesa have been allowed to return their homes. Approximately 500 structures, power lines suppling the City of Los Angeles, natural gas and liquid fuel pipelines, and a communications site are threatened. Voluntary evacuations have occurred in Summit Valley and Summit Estates. Livestock is being removed from Silverwood. Interstate 15 has been reopened and Highway 138 is closed.

SUDDEN RANCH, Vandenberg Air Force Base. A Unified Command between a California Department of Forestry and Fire Protection Incident Command Team (Maner), Vandenberg Air Force Base (Ardoin) and the Santa Barbara County Fire Department (Schmitt) is in place. This fire is burning in heavy brush six miles west of Lompoc, CA. A small slopover was successfully suppressed. Crews and dozers made good progress building fireline. Several structures remain threatened.

COPCO, Angeles National Forest. This fire is burning in brush and grass seven miles southeast of Lebec, CA. Dry, flashy fuels and high winds contributed to extreme fire behavior. Several structures along Copco Road are threatened. The California Highway Patrol is restricting northbound traffic on Interstate 5.

SQF = Sequoia National Forest

### WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

CANNON, Humboldt-Toiyabe National Forest. A Type 1 Incident Management Team (Stutler) is assigned. This fire is burning in sagebrush, ponderosa pine and mixed conifer forest 25 miles northwest of Bridgeport, CA. The fire had four fronts during the afternoon burning period and a major run to the north and east was observed. Unfavorable winds, low relative humidity, high Haines index and extremely dry fuels are contributing to extreme fire behavior. Camp Antelope and numerous residences east of Highway 395 remain evacuated and Wellington, NV is threatened. Evacuation centers are open in Coleville and Topaz. Highway 395 is closed. Members of the National Transportation and Safety Board have arrived to investigate the air tanker crash site.

CANNON	NV	HTF	15,000	10	6/25	672	28	50	0	4	75K

### SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

RODEO, Bureau of Indian Affairs, Fort Apache Agency. This fire is burning in ponderosa pine, juniper and brush three miles north of Cibecue, AZ. Crowning, torching and spotting up to 1/4 mile ahead of the front were observed as the fire moved into the Carrizo Creek drainage. Crews are constructing handline in preparation for a burn out.

ROYBAL/TRAMPAS, Santa Fe National Forest. A Type 1 Incident Management Team (Bateman) is assigned. The Roybal fire is four miles northeast of Pecos, NM and the Trampas fire is in the Pecos Wilderness Area eight miles west of Rociada, NM. The fires are burning in ponderosa pine and mixed conifer forest. A major run occurred on the northwest corner of Trampas. Crews are constructing fireline along the south flank and suppressing spots on the east flank. Structure protection is in place for the 450 residences that are threatened by Trampas. Personnel are mopping up Roybal.

WALKER, Coronado National Forest. A Unified Command between the United States Forest Service and the government of Nogales, Sonora Mexico is in place. This fire is burning on both sides of the US-Mexico border, west of Nogales, AZ. Minimal fire activity was observed in chaparral, oak woodland and grass. US crews are patrolling and mopping up the north and east flanks. Crews from both nations are constructing handline on the west flank with support from aerial resources.

BMG, Santa Fe National Forest. A Type 1 Incident Management Team (Humphrey) was cancelled. This fire is burning in ponderosa pine and mixed conifer forest seven miles west of Llaves, NM. Moderate fire behavior was observed. Crews are patrolling and mopping up.

AZS = Arizona State Land Department

### EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

SANFORD, Dixie National Forest. A Type 1 Incident Management Team (Hefner) is assigned. A Fire Use Management Team (Cones) remains on the incident to assist with fire management. The fire is being managed by the most meaningful, most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. The fire is 20 miles northeast of Panguitch, UT and is burning in aspen, pinyon pine, juniper and mixed conifer forest. Crowning and torching were observed on the north flank in Deer Creek and on the south flank in Hunt Creek. Crews made significant progress constructing handline on the north and northwest perimeters with the support of aerial resources. Structure protection is in place at Sanford Ranch.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
SANFORD	UT	DIF	64,000	30	UNK	318	11	3	5	0	1.4M

## SOUTHERN AREA LARGE FIRES:

MARBLEYARD COMPLEX, George Washington and Jefferson National Forests. A Type 2 Incident Management Team (Kearney) is assigned. This complex, comprised of several fires, is burning three miles south of Glasgow, VA in standing dead timber, hardwoods, and rhododendron. Crews successfully completed burn out operations and are patrolling and mopping up. The Appalachian Trail is closed in the James River Face Wilderness Area.

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command between an interagency Fire Use Management Team (Zimmerman), the Georgia Forestry Commission, the Florida Division of Forestry and the National Forests of Florida is in place. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Precipitation has raised swamp water levels and reduced fire activity. A ten mile section of preexisting permanent fuel break that surrounds the Refuge has been successfully utilized to hold the fires. Personnel are mopping up and patrolling the fuel break.

EGLIN COMPLEX, Eglin Air Force Base. This complex, consisting of the Grassy Point, Roberts Point and Range Road 747 fires, is near Fort Walton Beach, FL. The fires are in monitor status. Reduction in acreage is due to better mapping.

LEGENDS, South Carolina Forestry Commission. This fire is burning in wax myrtle and titi ten miles south of Conway, SC. No new information was reported.

## OUTLOOK:

**\*\*\*A RED FLAG WARNING HAS BEEN POSTED IN CENTRAL AND SOUTHEASTERN COLORADO FOR VERY LOW RELATIVE HUMIDITY, GUSTY WINDS AND HIGH HAINES INDEX\*\*\***

**\*\*\*A RED FLAG WARNING HAS BEEN POSTED IN THE EASTERN UINTA MOUNTAINS IN UTAH FOR ISOLATED DRY LIGHTNING\*\*\***

**\*\*\*A FIRE WEATHER WATCH HAS BEEN ISSUED IN NORTHWESTERN COLORADO FOR ISOLATED DRY LIGHTNING, GUSTY WINDS AND LOW RELATIVE HUMIDITY\*\*\***

A cold front moving into the Rocky Mountain Area will bring scattered showers and thunderstorms to Wyoming and northeastern Colorado. A chance of isolated dry thunderstorms are forecast for northwest Colorado. High temperatures will be in the 60's and 70's in the north and mid 70's to 90's in the south. Minimum relative humidity will range from 5 to 25 percent in Colorado and 25 to 40 percent elsewhere. Winds will be southwest at 15 to 25 mph with gusts to 35 mph in western and southeastern Colorado. In the remainder of the area, winds will be northwest to northeast at 10 to 20 mph.

The Southern California Area can expect mostly sunny skies with morning low clouds and fog along the coast. High temperatures will be mid 60's to low 70's along the coast, in the 70's and 80's in the mountains and inland, and in the 80's to 104 in the deserts. Minimum relative humidity will range from 15 to 25 percent in the mountains and deserts, 35 to 50 percent in the valleys, and above 55 percent near the coast. Winds will be southwest to northwest at 15 to 25 mph and gusty over the mountains and deserts. Near the coast, winds will be onshore at 8 to 16 mph.

High pressure over the Western Great Basin Area will bring fair skies. High temperatures will be upper 70's and 80's in the north and near 100 in the south. Minimum relative humidity will range from 5 to 18 percent. Winds will be southwest at 10 to 20 mph in southern Nevada and north to northeast at 10 to 20 mph in northern Nevada.

High pressure over the Southwest Area will bring mostly sunny skies with isolated thunderstorms across west Texas and the plains of northeastern New Mexico. High temperatures will be mid 80's in the mountains and near 110 at lower elevations. Minimum relative humidity will range from 3 to 10 percent in Arizona and western New Mexico, 10 to 20 percent in eastern New Mexico, and 20 to 40 percent in west Texas. Winds will be south to southwest at 10 to 25 mph.

The Eastern Great Basin Area can expect mostly sunny skies with a chance of thunderstorms over northern Utah, Idaho and the Bridger-Teton National Forest. Isolated dry thunderstorms are forecast for northeastern Utah. High temperatures will be 68 to 80 in the mountains and 85 to 103 in the valleys and deserts. Minimum relative humidity will range from 4 to 18 percent at lower elevations and 15 to 30 percent in the mountains. Winds will be west to northwest at 15 to 30 mph in the north and southwest at 15 to 30 mph in the south.

A frontal zone over the Southern Area will bring partly cloudy skies with scattered rain showers and thunderstorms in Florida and the Carolinas. High temperatures will be in the 80's and 90's. Minimum relative humidity will generally be above 45 percent. Winds will be variable at 5 to 15 mph.

### **SAFETY ZONES**

A safety zone is a location where the threatened firefighter can find adequate refuge from an approaching fire. What is the difference between a safety zone and a deployment site?

The safety zone is the area where a firefighter can survive without using a fire shelter. The deployment site is used when fire conditions are such that escape routes and safety zones have been compromised.

How do you identify a good safety zone?

Consider the distance from the escaped fire as well as topography, winds, fire behavior, and fuels in the area.

The best locations are usually “in the black,” those with a minimum of, or devoid of, ground/aerial vegetation; or large bodies of water.

Size is sufficient for all present resources with a minimum distance from fire of at least four times the maximum flame length.

Location is scouted and marked well for visibility at all times.

Location has been reassessed in relation to line work progress, fatigue, changes in fire behavior, and arrival of additional resources.
