

**INCIDENT MANAGEMENT SITUATION REPORT  
FRIDAY, JUNE 21, 2002 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 5**

**CURRENT SITUATION:**

Initial attack activity was moderate in the Southwest, Western Great Basin and Rocky Mountain Areas and light elsewhere. Nationally, 157 new fires were reported. Two of these became large fires, one each in the Eastern Great Basin and Southern California Areas. Three large fires were contained, two in the Southern Area and one in the Southwest Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Kansas, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington and Wyoming.

**ROCKY MOUNTAIN AREA LARGE FIRES:**

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage the Hayman fire.

MISSIONARY RIDGE, San Juan National Forest. A Type 1 Incident Management Team (Ferguson) is assigned. This fire is 15 miles northeast of Durango, CO and is burning in gambel oak, ponderosa pine and mixed conifer forest. Sustained crowning runs with 100 to 200 foot flame lengths, torching and spotting up to one mile ahead front were observed on the southeast, southwest and east flanks. The fire has spotted across State Route 250 to the west. Crews are building indirect attack fireline along the southeast and southwest perimeters in preparation for a burn out. Eighteen subdivisions south of Lemon and Vallecito Reservoirs and along State Route 250 remain evacuated. Additional evacuations occurred at scattered residences yesterday. An evacuation alert has been issued to residents of Durango Hills, Florida Pines and Baby Bear subdivisions. An evacuation center is open in Bayfield, CO.

HAYMAN, Pike-San Isabel National Forest. Three Type 1 Incident Management Teams (Frye, Raley and Vail) are assigned. Vail's team, in coordination with local officials in El Paso County, has nearly completed preparation of contingency and structure protection plans. This fire is burning six miles northwest of Lake George, CO in ponderosa pine, gambel oak and mixed conifer forest. Precipitation moderated fire behavior with isolated torching, short crown runs and limited spotting observed. Crews are constructing direct attack handline with the support of aerial resources and burning out where necessary. A revised estimate of evacuated residents is 5,350; no new evacuations occurred yesterday. Evacuation centers are open in Park, Douglas, Teller and Jefferson Counties. Residents in El Paso County were allowed to return to their homes. Fifty-four residences and 400 outbuildings were confirmed lost; the majority reported occurred in Teller County. The four counties continue to evaluate structure loss. Highway 67 is closed.

MILLION, Rio Grande National Forest. A Type 1 Incident Management Team (Gelobter) will assume command of the fire at 1900 MDT. This fire is burning two miles south of South Fork, CO in ponderosa pine, bug kill spruce and mixed conifer forest. Moderate fire activity was observed. Crews have anchored in and are constructing handline. Four subdivisions near South Fork remain evacuated and an evacuation center is open in Del Norte. Fifteen residences were lost during the initial phases of the fire. Highway 160 has been reopened.

HENSEL, Medicine Bow National Forest. A Type 2 Incident Management Team (Rios) is assigned. A Type 1 Incident Management Team (Wood) has been ordered. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Precipitation contributed to moderate fire activity. Crews and dozers are constructing indirect attack fireline on the north, south and west flanks. A burn out operation between Harris Park and Cottonwood Park was successful. Residents from the northern portion of Cottonwood Park remain evacuated and structure protection is in place.

COAL SEAM, Grand Junction Dispatch Center Area Counties. A Fire Use Management Team (Cook) is assigned. This fire is burning four miles west of Glenwood Springs, CO in gambel oak, decadent spruce, fir and aspen. Torching was observed on the northwest perimeter. A confinement strategy is being utilized on the north flank due to extremely steep and dangerous terrain. Completed fireline has forced the fire north into areas of low spread potential. Crews are mopping up completed fireline.

**SOUTHWEST AREA LARGE FIRES:**

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

RODEO, Bureau of Indian Affairs, Fort Apache Agency. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is burning in ponderosa pine, juniper and brush three miles north of Cibecue, AZ. Extreme fire behavior with 200 to 300 foot flame lengths and long range spotting were observed as the fire advanced north, crossing Highway 260. Personnel are creating defensible space around threatened structures. Pinedale, Clay Springs and Linden remain evacuated. Show Low, Lakeside, Pinetop, Hon Dah and a major power line are threatened. Evacuation centers are open in Holbrook and Winslow. Highway 260 is closed.

ROYBAL/TRAMPAS, Santa Fe National Forest. A Type 1 Incident Management Team (Bateman) is assigned. The Roybal fire is four miles northeast of Pecos, NM and the Trampas fire is in the Pecos Wilderness Area, eight miles west of Rociada, NM. The fires are burning in ponderosa pine and mixed conifer forest. Precipitation moderated fire behavior on Trampas. Crews are improving fireline on the south flank and building handline on the southeast flank. Four structure protection groups are creating defensible space around threatened structures. Residents in Maestas and Daily Canyons were allowed to return to their homes.

BIG, Kaibab National Forest. A Type 2 Incident Management Team (Joki) is assigned. This fire is 35 miles southeast of Fredonia, AZ. Low fire activity was observed in ponderosa pine, mixed conifer forest and slash. Crews are constructing fireline around spot fires, mopping up and patrolling.

WALKER, Coronado National Forest. A Unified Command between the US Forest Service and the government of Nogales, Sonora Mexico is in place. The fire is burning in oak woodland, mesquite and grass on both sides of the US-Mexico border, west of Nogales, AZ. Interior islands are burning out. US crews are mopping up in Potrero and Alamo Canyons, and rehabilitating fireline. Mexican crews are constructing fireline along the west flank with the support of aerial resources.

**SOUTHERN CALIFORNIA AREA LARGE FIRES:**

WILDWOOD, Angeles National Forest. A Type 2 Incident Management Team (Walker) is assigned. This fire is in Big Tujunga Canyon, four miles north of La Crescentia, CA. Extreme fire behavior was observed in heavy brush as the fire moved east-northeast. Heavy initial attack is underway with ground and aerial resources. Approximately 50 residences in the canyon are threatened.

TROY, Cleveland National Forest. A Unified Command between a California Department of Forestry and Fire Protection Type 1 Incident Command Team (Haines) and the US Forest Service (Mortimer) is in place. This fire is one-half mile southwest of the Cuyapaipe Indian Reservation and is burning in decadent chaparral and chamise. Aggressive ground and air attack limited fire spread. The threat to residences has been significantly reduced.

BLUECUT, San Bernardino National Forest. A Type 1 Incident Management Team (Studebaker) is assigned. This fire is one mile north of the Interstate 15 and Interstate 215 junction near the community of Oak Hills, CA. Backing and creeping were observed in heavy chaparral. Crews are building direct attack fireline and have completed contingency line along the south and southeast flanks. Reduction in acreage is due to better mapping.

PINEY, Los Padres National Forest. This fire is burning in heavy brush 13 miles southwest of Soledad, CA. Crews are constructing fireline and mopping up. Structure protection is in place for several improvements along Carmel Valley Road.

COPCO, Angeles National Forest. A Type 2 Incident Management Team (Szczepanik) is assigned. This fire is burning in brush and grass seven miles southeast of Lebec, CA. Minimal fire activity was observed. Crews and engines are patrolling, mopping up and rehabilitating fireline. One additional outbuilding was confirmed lost.

COPCO	CA	ANF	1,460	90	6/21	382	9	16	4	3	800K

**WESTERN GREAT BASIN AREA LARGE FIRES:**

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

CANNON, Humboldt-Toiyabe National Forest. A Type 1 Incident Management Team (Stutler) is assigned. This fire is burning in sagebrush, ponderosa pine and mixed conifer forest 25 miles northwest of Bridgeport, CA. Running and torching were observed as the fire moved south and east. Upcanyon winds pushed the south flank through Tollhouse Canyon and into Bootleg Creek. Crews are constructing fireline on the south and east flanks. Highway 395 is closed.

CANNON	NV	HTF	21,760	30	UNK	1,471	43	112	7	4	2.6M

**EASTERN GREAT BASIN AREA LARGE FIRES:**

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

SANFORD, Dixie National Forest. A transfer of command from Hefner's Type 1 Incident Management Team to Suwyn's Type 2 Incident Management Team will occur this evening. A Fire Use Management Team (Cones) remains on the incident to assist with fire management. The fire is being managed by the most meaningful, most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. The fire is 20 miles northeast of

Panguitch, UT and is burning in aspen, pinyon pine, juniper and mixed conifer forest. Torching and short runs were observed on the north and east flanks. Crews are constructing indirect attack handline east from Dutton Peak in preparation for a potential burn out. Good progress has been made with direct attack fireline on the south and west flanks. Structure protection is in place at Sanford Ranch. Increase in acreage occurred on 6/18.

WILDHORSE COMPLEX, Bureau of Indian Affairs, Uintah and Ouray Agency. This complex, comprised of the Wildhorse and Papoose fires, is 54 miles south of Fort Duchesne, UT. Running and torching were observed in pinyon pine and juniper. Crews are constructing handline on the west flank and are establishing an anchor point on the east flank. Steep, rough terrain, limited access and erratic winds are impeding containment efforts.

### SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command between an interagency Fire Use Management Team (Zimmerman), the Georgia Forestry Commission, the Florida Division of Forestry and the National Forests of Florida is in place. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. Cloud cover and higher relative humidity contributed to moderate fire activity. A ten mile section of preexisting permanent fuel break surrounding the Refuge has been successfully utilized to hold the fires. Crews are mopping up and patrolling the fuel break.

## OUTLOOK:

**\*\*\*A RED FLAG WARNING HAS BEEN POSTED IN NORTHERN ARIZONA AND NORTHWEST NEW MEXICO FOR STRONG SOUTHWEST WINDS, VERY LOW RELATIVE HUMIDITY AND EXTREME FIRE DANGER\*\*\***

**\*\*\*A FIRE WEATHER WATCH HAS BEEN ISSUED IN WEST AND SOUTH-CENTRAL COLORADO FOR DRY LIGHTNING, STRONG SOUTHWEST WINDS, VERY LOW RELATIVE HUMIDITY AND HIGH HAINES INDEX\*\*\***

**\*\*\*A FIRE WEATHER WATCH HAS BEEN ISSUED IN SOUTHERN UTAH AND THE ARIZONA STRIP FOR STRONG WINDS, LOW RELATIVE HUMIDITY AND HIGH HAINES INDEX\*\*\***

Lingering unstable air over the Rocky Mountain Area will bring isolated to widely scattered thunderstorms. Dry thunderstorms are forecast for western Colorado. High temperatures will be in the 80's and 90's in western Colorado and mid 70's to 80's elsewhere. Minimum relative humidity will range from 5 to 15 percent in western Colorado and 20 to 40 percent in the remainder of the area. Winds will be southwest at 15 to 30 mph with gusts to 40 mph west of the Continental Divide. East of the Divide, winds will be south to southeast at 15 to 25 mph.

Southwest Area can expect sunny skies in Arizona and partly cloudy skies in New Mexico and west Texas. Isolated dry thunderstorms are forecast in western New Mexico with a chance of wet thunderstorms to the east. High temperatures will be in the 70's and 80's in the mountains and in the 90's to 105 at lower elevations. Minimum relative humidity will range from 5 to 15 percent in Arizona and western New Mexico, 15 to 25 percent in eastern New Mexico, and 25 to 50 percent in west Texas. Winds will be southeast to southwest at 10 to 25 mph with gusts to 40 mph in Arizona and northwest New Mexico.

A Pacific trough over the Southern California Area will bring sunny skies with morning low clouds and fog in the coastal basins. High temperatures will be mid 60's to low 70's along the coast, in the 70's to low 80's in the mountains, in the 80's inland, and in the 80's to 106 in the deserts. Minimum relative humidity will range from 20 to 30 percent in the mountains and deserts, 35 to 50 percent in the valleys, and above 55 percent near the coast. Winds will be southwest to west at 10 to 20 mph over the mountains and deserts. Near the coast, winds will be onshore at 8 to 18 mph.

An unstable airmass in conjunction with the passage of a low pressure system over Western Great Basin Area will bring afternoon thunderstorms in northern and central Nevada. To the south, skies will be fair. High temperatures will be in the 80's and 90's. Minimum relative humidity will range from 15 to 25 percent and winds will be northwest at 10 to 20 mph.

The Eastern Great Basin Area can expect mostly sunny skies with a chance of dry thunderstorms over northwestern Utah. Scattered showers and thunderstorms are forecast for southern Idaho and the Bridger-Teton National Forest. High temperatures will be 70 to 85 in the north and 80 to 100 in the south. Minimum relative humidity will range from 5 to 20 percent in southern Utah and

15 to 35 percent elsewhere. Winds will be west at 5 to 15 mph in the north and 15 to 30 mph in the south.

<b>DOWNHILL FIRELINE CONSTRUCTION CHECKLIST</b>	
Downhill fireline construction is hazardous in step terrain, fast-burning fuels, or rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative. When building downhill fireline, the following is required:	
<input type="checkbox"/>	Crew supervisor(s) and fireline overhead will discuss assignments prior to committing crew(s). Responsible overhead individual (TFLD or ICT4 qualified or better) will stay with job until completed. Decision will be made after proposed fireline has been scouted by supervisor(s) of involved crew(s). LCES will be coordinated for all personnel involved.
<input type="checkbox"/>	Crew supervisor(s) is in direct contact with lookout who can see the fire.
<input type="checkbox"/>	Communication is established between all crews.
<input type="checkbox"/>	Ensure rapid access to safety zone(s) in case fire crosses below crew(s).
Direct attack will be used whenever possible; if not possible, the fireline should be competed between anchor points before being burned out. Fireline will not lie in or adjacent to a chute or chimney. Starting point will be anchored for crew(s) building fireline down from the top. Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.
