

**INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, JULY 4, 2002 0800 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was heavy in the Southwest Area, moderate in the Eastern Great Basin, Rocky Mountain and Northern California Areas, and light elsewhere. Nationally, 190 new fires were reported; one became a large fire in the Northern California Area. Two large fires were contained, one each in the Southwest and Southern California Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, Texas, Utah and Wyoming.

A faller assigned to the Missionary Ridge fire near Durango, CO was fatally injured on July 2nd while cutting hazard trees. The firefighting community extends condolences to the family and friends of the deceased.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Chesley) is assigned to manage the Missionary Ridge fire.

GRIZZLY GULCH, South Dakota State Forestry. A Type 1 Incident Management Team (Hefner) is assigned. This fire, burning in ponderosa pine, aspen and grass, is on the outskirts of Deadwood, SD. Torching, spotting and moderate runs were observed on the northeast, east and south flanks. Crews are constructing fireline on the northeast flank near Pillar Peak and on the east flank near the community of Galena. Steep, extremely rugged terrain on the south flank is impeding suppression efforts. Residents south of Radio Tower Road, east of Deadwood, were issued mandatory evacuation orders yesterday. A voluntary evacuation of homes along the south side of US Highway 14A occurred at the same time. Deadwood and portions of Lead remain evacuated; structure protection is in place. US Highway 14A is closed due to heavy smoke.

MISSIONARY RIDGE, San Juan National Forest. Two Type 1 Incident Management Teams (Hart and Bennett) are assigned. A transfer of command from Bennett's Type 1 Incident Management Team to Carlson's Type 2 Incident Management Team will occur today. This fire is burning five miles northeast of Durango, CO in gambel oak, ponderosa pine and mixed conifer forest. Observed fire behavior included torching and crown runs on the northeast flank. Some divisions received scattered, light precipitation. Crews are building direct attack fireline on the north and east flanks with support from aerial resources. Mopup is underway on the western half of the fire. Thirty-eight homes on the east side of Vallecito Lake remain evacuated.

REESE MOUNTAIN, Rawlins District, Bureau of Land Management. A Type 1 Incident Management Team (Wood) is assigned. This fire is burning 30 miles west of Wheatland, WY in heavy dead-down lodgepole pine and ponderosa pine. Precipitation contributed to minimal fire activity. Crews successfully defended seven residences prior to the rainfall. Personnel are

building handline on a slopover across Duck Creek and mopping up completed fireline. Numerous residences and commercial properties remain threatened. Several ranch owners returned to their homes yesterday. DALEY COMPLEX, Casper Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Johnson) is assigned. This complex, comprised of the Daley Draw, Pownell, Watt and Hart fires, is 30 miles north of Gillette, WY. These fires are creeping and torching in ponderosa pine, sagebrush and grass. Significant progress was made mopping up and cold trailing. Several residences remain threatened.

SPRING CREEK, White River National Forest. A Type 2 Incident Management Team (Hartman) is assigned. This fire is burning in spruce, fir, aspen and brush eight miles north of New Castle, CO. Torching, spotting and crown runs were observed as the fire advanced north up Elk Creek. Crews and dozers are constructing fireline on the northeast flank and burning out on the east flank. Air operations were suspended due to high winds. Three residences remain threatened.

KRAFT COMPLEX, Standing Rock Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Gardner) is assigned. This complex, consisting of the Kraft, Bale II, Twin II, Kenel Again, Maier, Oxbow and Car fires, is 50 miles south of Bismarck, ND. Smoldering was observed in grass. Good progress was made mopping up and rehabilitating fireline. Engine crews successfully initial attacked the Car and Oxbow fires, limiting fire spread. Reduction in acreage is due to more accurate mapping.

BEAR, Dinosaur National Monument. A Type 2 Incident Management Team (Chrisman) is assigned. This fire is burning in sagebrush, pinyon pine and juniper 20 miles northeast of Dinosaur, CO on the Yampa River bench. Isolated torching and low ground fire were observed. Crews are constructing fireline on the east flank and monitoring a slopover north of the Yampa River.

HENSEL, Medicine Bow National Forest. A Type 2 Incident Management Team (Swope) is assigned. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Precipitation contributed to minimal fire activity. Aerial resources are being utilized on the unsecured perimeter along the north flank due to steep and dangerous terrain. Crews are mopping up and rehabilitating fireline in Ashenfelder Creek.

SOUTH FORK II, Wind River Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Benes) is assigned. This fire is ten miles west of Fort Washakie, WY in the Wind River Roadless Area. Isolated torching and low ground fire were observed in decadent logdepole pine and sagebrush. The fire has crossed Crooked Creek and spread into Spruce Gulch. Dozers are building fireline on the north flank. Crews are cold trailing and mopping up around Washakie Reservoir.

SHE BEAR MOUNTAIN, Big Horn National Forest. This fire, burning in heavy dead and downed timber, is 15 miles west of Sheridan, WY. Moderate fire activity was observed. Crews made significant progress constructing handline.

COAL SEAM, Counties dispatched by Grand Junction Dispatch Center. A transfer of command from Cook's Fire Use Management Team to Cone's Fire Use Management Team occurred yesterday. The team is assigned to manage suppression operations and develop long term assessments. The fire is smoldering and creeping in spruce, subalpine fir and aspen four miles north of Glenwood Springs, CO. A confinement strategy is being utilized on the north flank due to extremely steep and dangerous terrain. Personnel are rehabilitating fireline and monitoring the

northern perimeter.

FOUNTAIN GULCH, Fort Collins Dispatch Center Counties, Colorado State Forest Service. This fire is north of Idaho Springs, CO. No new information was reported.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

MUSTANG, Ashley National Forest. A Type 1 Incident Management Team (Melton) is assigned. This fire is burning in Douglas fir, pinyon pine, juniper and sagebrush one mile north of Dutch John, UT. The fire has crossed the Green River and is burning east toward Diamond Mountain. Torching and running were observed. Crews made good progress building fireline and mopping up along the west and northwest flanks. Clay Basin, Browns Park, Taylor Flat, Jarvey, and Diamond Mountain remain evacuated. The Flaming Gorge Dam and Power Plant are threatened and Highway 191 is closed. Reduction in acreage is due to more accurate mapping. Three outbuildings were confirmed lost.

EAST FORK, Wasatch-Cache National Forest. A Type 2 Incident Management Team (Van Bruggen) is assigned. A Type 1 Incident Management Team (Raley) has been ordered. This fire is burning in lodgepole pine and spruce 35 miles south of Evanston, WY. Group and individual tree torching and short range spotting were observed as the fire advanced east-northeast. Crews are constructing handline on the southwest and northwest flanks and initiating fireline on the east perimeter. Forty summer homes, a Boy Scout Camp and several campgrounds remain evacuated; structure protection is in place.

RATTLE COMPLEX, Moab Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Vail) is assigned. This complex is burning 20 miles northeast of Green River, UT in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine. Active torching, spotting, and crowning were observed with significant acreage gain on the south flank.

Crews are constructing direct attack fireline on the north flank and are initiating indirect attack handline on the northwest, west and northeast perimeters. The southern perimeter is in monitor status due to predicted fire weather and limited access. Several ranches are threatened.

BLACK CANYON, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Broyles) is assigned. This fire is 20 miles northeast of Green River, UT. The fire is backing downhill to the northwest in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine. Moderate fire behavior was observed due to cloud cover and higher relative humidity. Fireline construction has been completed on the north flank in preparation for an aerial burn out. Crews are building handline on other divisions.

SPRINGVILLE, Uinta National Forest. A Type 2 Incident Management Team (Rios) is assigned. This fire is one mile north of Springville, UT. Minimal fire behavior was observed in oak brush, pinyon pine and juniper. Steep, rocky, inaccessible terrain has necessitated the use of helicopters on slopers and large sections of fireline.

PRICE CANYON, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Shell) is assigned. The fire is 12 miles northwest of Price, UT and is burning in pinyon pine, juniper and brush. Favorable weather conditions resulted in minimal fire activity. Crews have made excellent progress toward containment objectives on the north, south and west flanks, and are constructing fireline the southeast perimeter.

COW CAMP, Bridger-Teton National Forest. This fire is burning 30 miles southeast of Pinedale, WY in lodgepole pine, Englemann spruce and subalpine fir. Precipitation contributed to minimal fire activity. Crews are building handline on the north and south flanks, and mopping up other divisions.

SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Ribar) is assigned to manage the Rodeo/Chediski complex.

CUB, Gila National Forest. A Type 2 Incident Management Team (Garcia) is assigned. This plume dominated fire is in the Gila Wilderness Area, 19 miles east of Glenwood, NM. Extreme fire behavior, torching, spotting and crowning were observed in ponderosa pine and mixed conifer

forest. Steep, rugged terrain, limited access, very dry fuels, high temperatures and low relative humidity are hampering containment efforts.

RODEO/CHEDISKI COMPLEX, Fort Apache Agency, Bureau of Indian Affairs. Two Type 1 Incident Management Teams (Dash and Martin) and one Type 2 Incident Management Team (Joki) are assigned. The Rodeo and Chediski fires are burning in chaparral, ponderosa pine, juniper and brush three miles north of Cibecue, AZ. Torching and short range spotting were observed within containment lines. Mopup and fireline rehabilitation are underway on all flanks. Residents of Heber, Overgaard and surrounding communities were allowed to return to their homes yesterday. Highways 60, 260, 377 and 277 have been reopened.

CARRIZO #1, Navajo Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Sears) is assigned. This fire is 15 miles south of Teec Nos Pos, AZ and is burning in ponderosa pine, juniper and pinyon pine. Cloud cover moderated fire behavior. Crews are burning out on the northeast, southwest and northwest flanks with support from rotor wing aircraft. Fixed wing air operations were suspended due to high winds.

DARNELL, Coronado National Forest. This fire is in the Chiricahua Wilderness Area 20 miles southwest of Animas, NM. Short runs and isolated torching in grass, scrub oak and juniper were observed as the fire advanced north, west and south. Crews are constructing fireline in Sulpher and Pothole Canyons in preparation for a burn out. Several residences are threatened.

WALNUT COMPLEX, Socorro District, New Mexico State Forestry Office. This complex, comprised of the Walnut, Center, Wooley Bugger 1 and Wooley Bugger 2 fires, is 14 miles east of Cloverdale, NM. Low to moderate fire behavior was observed in grass, pinyon pine and brush. Engines crews are burning out and patrolling.

PARACHUTE ADAM, Socorro District, New Mexico State Forestry Office. This fire, burning in grass and brush, is 14 miles north of Cloverdale, NM. No new information was reported.

NORTHERN CALIFORNIA AREA LARGE FIRES:

GONDOLA, Lake Tahoe Basin Management Unit. A Type 2 Incident Management Team

(Szczepanik) is assigned. A Type 1 Incident Management Team (Studebaker) has been ordered. This fire is burning in ponderosa pine, red fir and white fir on the outskirts of Stateline, NV. Steep terrain and heavy fuel loading are hampering containment efforts. Ski lodges, ski lifts and the gondola at Heavenly Lake Tahoe Ski Resort and subdivisions on Kingsbury Grade are threatened. Highway 207 is closed.

SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. Precipitation has raised swamp water levels, decreasing fire behavior. Personnel are monitoring fire activity.

OUTLOOK:

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN NORTHEAST WYOMING AND THE BLACK HILLS FOR WET AND DRY THUNDERSTORMS*****

An upper level low pressure system approaching the Rocky Mountain Area will bring partly cloudy to mostly sunny skies with wet and dry thunderstorms. High temperatures will be in the 70's in the mountains and in the 80's to 90's at lower elevations. Minimum relative humidity will range from 25 to 35 percent in northern Wyoming and the Black Hills, 20 to 30 percent in eastern Colorado and southeast Wyoming, and 15 to 25 percent elsewhere. Winds will be south at 10 to 20 mph east of the Continental Divide and west to southwest at 10 to 15 mph in the remainder of the area.

The Eastern Great Basin Area can expect mostly sunny skies with isolated thunderstorms in the mountains of Utah. High temperatures will be mid 70's to 80's in the mountains and upper 80's to 105 in the valleys. Minimum relative humidity will range from 5 to 18 percent at lower elevations and 12 to 25 percent at higher elevations. Winds will be west to southwest at 10 to 20 mph.

A weakening upper level low over the Southwest Area will bring partly to mostly sunny skies with scattered wet and dry thunderstorms in western New Mexico and the Mogollon Rim area of Arizona. High temperatures will be in the 80's in the mountains and near 107 at lower elevations. Minimum relative humidity will range from 10 to 25 percent in Arizona and western New Mexico, and 20 to 50 percent elsewhere. Winds will be east to southeast at 10 to 20 mph in eastern New Mexico and west Texas, and southwest to west at 5 to 15 mph, gusting to 20 mph in the remainder of the region.

The Northern California Area can expect mostly sunny skies with scattered thunderstorm build up in the afternoon. High temperatures will be in the 60's along the coast and in the 80's to low 90's inland. Minimum relative humidity will range from 11 to 19 percent in the Sierra Nevada Mountains and 14 to 27 percent elsewhere. Winds will be south-southwest to west at 10 to 20 mph with local gusts to 30 and 35 mph.

A stationary low pressure system over the Continental Divide in the Northern Rockies Area will bring partly cloudy skies with isolated thunderstorms in the mountains near the Canadian border. High temperatures will be mid 80's to mid 90's in eastern Montana and in the 70's and 80's elsewhere. Minimum relative humidity will range from 10 to 20 percent in eastern Montana and 25 to 35 percent in the remainder of the area. Winds will be west at 10 to 20 mph in northern Idaho and western Montana and southeast at 10 to 20 mph in North Dakota and eastern Montana.

A weak low pressure system over the Southern Area will bring scattered rain showers and thunderstorms. High temperatures will be in the 80's and 90's and minimum relative humidity will be above 50 percent in most areas. Winds will be variable and light.

The Southern California Area can expect mostly sunny skies with morning low clouds and fog along the coast. High temperatures will be in the mid 60's to mid 70's in coastal areas, in the mid

80's in the mountains and inland valleys, and in the 90's to 110 in the deserts. Minimum relative humidity will range from 10 to 20 percent in the deserts, 12 to 25 percent in the mountains, 20 to 40 percent in the valleys, and above 55 percent near the coast. Winds will be onshore at 7 to 15 mph in coastal areas and west to northwest at 10 to 15 mph elsewhere.
