

**INCIDENT MANAGEMENT SITUATION REPORT  
FRIDAY, JULY 5, 2002 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 5**

**CURRENT SITUATION:**

Initial attack activity was moderate in the Eastern Great Basin, Southwest and Rocky Mountain Areas, and light elsewhere. Nationally, 180 new fires were reported. Five of these became large fires, two in the Southern California Area and one each in the Eastern, Northern Rockies and Southwest Areas. Six large fires were contained, two each in the Southern California and Southwest Areas, and one each in the Northern Rockies and Rocky Mountain Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

**ROCKY MOUNTAIN AREA LARGE FIRES:**

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Chesley) is assigned to manage the Missionary Ridge fire.

GRIZZLY GULCH, South Dakota State Forestry. A Type 1 Incident Management Team (Hefner) is assigned. This fire, burning in ponderosa pine, aspen and grass, is on the outskirts of Deadwood, SD. Torching, spotting and moderate runs were observed on the northeast flank. Crews are constructing fireline on the northeast flank and burning out where needed. Steep, extremely rugged terrain on the south flank is impeding suppression efforts. Residents east of Deadwood remain evacuated; structure protection is in place. Residents from the cities of Deadwood and Lead were allowed to return to their homes.

MISSIONARY RIDGE, San Juan National Forest. Two Type 1 Incident Management Teams (Hart and Bennett) are assigned. A transfer of command from Bennett's Type 1 Incident Management Team to Carlson's Type 2 Incident Management Team will occur at 1800 MDT. This fire is burning five miles northeast of Durango, CO in gambel oak, ponderosa pine and mixed conifer forest. Fire behavior was moderate on the east side of the fire and minimal on the west. Crews are building direct attack fireline on the north and east flanks with support from aerial resources. Mop-up is underway on the western half of the fire. Four ranches on the Pine River, east of Vallecito Lake, remain evacuated.

REESE MOUNTAIN, Rawlins District, Bureau of Land Management. A Type 1 Incident Management Team (Wood) is assigned. This fire is burning 30 miles west of Wheatland, WY in heavy dead-down lodgepole pine and ponderosa pine. Minimal fire activity was observed. Crews are building handline in Duck Creek and mopping up completed fireline.

KRAFT COMPLEX, Standing Rock Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Gardner) is assigned. This complex, consisting of the Kraft, Bale II, Twin II, Kenel Again, Maier, Oxbow and Car fires, is 50 miles south of Bismarck, ND. Smoldering was

observed in grass. Good progress was made mopping up and rehabilitating fireline. A revised structure evaluation reports 17 residences and 19 outbuildings lost.

SOUTH FORK II, Wind River Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Benes) is assigned. This fire is ten miles west of Fort Washakie, WY in the Wind River Roadless Area. Torching and short runs were observed in decadent lodgepole pine and sagebrush. The fire has crossed Crooked Creek on the southeast perimeter and spread into Spruce Gulch. Crews are building handline on the north perimeter and aerial resources are flanking the fire on the south flank with water and retardant drops.

SPRING CREEK, White River National Forest. A Type 2 Incident Management Team (Hartman) is assigned. This fire is burning in spruce, fir, aspen and brush eight miles north of New Castle, CO. Torching, spotting and short runs were observed as the fire advanced north up Elk Creek. Crews successfully burned out the northeast flank. Crews and dozers are constructing fireline on the east flank in preparation for a burn out. Mop-up is underway on the northwest perimeter.

SHE BEAR MOUNTAIN, Big Horn National Forest. This fire is burning in heavy dead and downed timber 15 miles west of Sheridan, WY. Moderate fire activity was observed.

HENSEL, Medicine Bow National Forest. A Type 2 Incident Management Team (Swope) is assigned. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Creeping, smouldering and occasional torching were observed. Aerial resources are being utilized on the unsecured perimeter in upper Ashenfelder drainage along the north flank due to steep and dangerous terrain. Crews are mopping up and rehabilitating fireline.

DALEY COMPLEX, Casper Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Johnson) is assigned. This complex, comprised of the Daley Draw, Pownell, Watt and Hart fires, is 30 miles north of Gillette, WY. These fires are creeping and smouldering in ponderosa pine, sagebrush and grass. Significant progress was made mopping up and cold trailing.

COAL SEAM, Counties dispatched by Grand Junction Dispatch Center. A Fire Use Management Team (Cones) is assigned to manage suppression operations and develop long term assessments. The fire is smouldering and creeping in spruce, subalpine fir and aspen four miles north of Glenwood Springs, CO. A confinement strategy is being utilized on the north flank due to extremely steep and dangerous terrain. Personnel are rehabilitating fireline and monitoring the northern perimeter.

FOUNTAIN GULCH, Fort Collins Dispatch Center Counties, Colorado State Forest Service. This fire is north of Idaho Springs, CO. No new information was reported. This will be the last report unless significant activity occurs.

### **EASTERN GREAT BASIN AREA LARGE FIRES:**

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

**MUSTANG, Ashley National Forest.** A Type 1 Incident Management Team (Melton) is assigned. This fire is burning in Douglas fir, pinyon pine, juniper and sagebrush one mile north of Dutch John, UT. Torching and running were observed. Crews made good progress building fireline on the west, northwest and southeast perimeters. Clay Basin, Browns Park, Taylor Flat, Jarvey, and Diamond Mountain remain evacuated. Highway 191 has been reopened.

**EAST FORK, Wasatch-Cache National Forest.** A transfer of command from Van Bruggen's Type 2 Incident Management Team to Raley's Type 1 Incident Management Team is planned today at 1800 MDT. This fire is burning in lodgepole pine and spruce 35 miles south of Evanston, WY. Group and individual tree torching and short range spotting were observed as the fire advanced east-northeast. Crews are constructing handline on the southwest, northwest and east flanks. Forty summer homes, a Boy Scout Camp and several campgrounds remain evacuated; structure protection is in place.

**RATTLE COMPLEX, Moab Field Office, Bureau of Land Management.** A Type 1 Incident Management Team (Vail) is assigned. This complex is burning 20 miles northeast of Green River, UT in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine. Cloud cover moderated fire behavior. Crews made good progress constructing direct attack fireline, mopping up and cold trailing. Indirect dozer line has been completed. Several ranches are threatened.

**PRICE CANYON, Moab Field Office, Bureau of Land Management.** A Type 2 Incident Management Team (Shell) is assigned. The fire is 12 miles northwest of Price, UT and is burning in pinyon pine, juniper and brush. Favorable weather conditions resulted in minimal fire activity. Crews mopping up the south and east perimeters.

**SPRINGVILLE, Uinta National Forest.** A Type 2 Incident Management Team (Rios) is assigned. This fire is one mile north of Springville, UT. Low to moderate fire behavior was observed in oak brush, pinyon pine and juniper. Steep, rocky, inaccessible terrain necessitated the use of helicopters on slopers and large sections of fireline.

BLACK CANYON, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Broyles) is assigned. This fire is 20 miles northeast of Green River, UT. The fire is backing downhill to the northwest in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine. Crews are improving fireline on the north flank in preparation for an aerial burn out, and mopping up on other divisions.

COW CAMP, Bridger-Teton National Forest. This fire is burning 30 miles southeast of Pinedale, WY in lodgepole pine, Englemann spruce and subalpine fir. Minimal fire activity was observed. Crews are building handline on the north and south flanks, and mopping up other divisions.

### SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Ribar) is assigned to manage the Rodeo/Chediski complex.

DARNELL, Coronado National Forest. A Type 2 Incident Management Team (Kvale) will assume command at 0600 MST. This fire is in the Chiricahua Wilderness Area 20 miles southwest of Animas, NM. Significant runs in grass, scrub oak and juniper were observed as the fire advanced north and northeast. Crews are constructing fireline on the north flank and burning out on the east flank. Several residences are threatened.

CUB, Gila National Forest. A Type 2 Incident Management Team (Garcia) is assigned. This plume dominated fire is in the Gila Wilderness Area, 19 miles east of Glenwood, NM. The fire is burning in ponderosa pine and mixed conifer forest. Light precipitation contributed to minimal fire activity. Crews are constructing fireline and protecting structures in Willow Creek. Steep, rugged terrain, limited access, and very dry fuels are hampering containment efforts. The Mogollon Baldy Peak Lookout is threatened.

RODEO/CHEDISKI COMPLEX, Fort Apache Agency, Bureau of Indian Affairs. Two Type 1 Incident Management Teams (Dash and Martin) and one Type 2 Incident Management Team (Joki) are assigned. The Rodeo and Chediski fires are burning in chaparral, ponderosa pine, juniper and brush three miles north of Cibecue, AZ. Small flare-ups were observed within the containment lines. Mop-up and fireline rehabilitation are underway on all flanks. An additional three structures were confirmed lost. Reduction in acreage is due to more accurate mapping.

CARRIZO #1, Navajo Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Sears) is assigned. This fire is 15 miles south of Teec Nos Pos, AZ and is burning in ponderosa pine, juniper and pinyon pine. Moderate fire behavior was observed due to higher relative humidity and lower temperatures. Crews are burning out on the southwest flank and mopping up with support from aerial resources. Very rugged terrain and limited access are hampering containment efforts.

WALNUT COMPLEX, Socorro District, New Mexico State Forestry Office. This complex is 14 miles east of Cloverdale, NM. The complex is comprised of the Walnut, Center, Wooley Bugger 1 and Wooley Bugger 2 fires. Minimal fire activity was observed in grass, pinyon pine and brush. Engines crews are mopping up and patrolling.

**NORTHERN CALIFORNIA AREA LARGE FIRES:**

GONDOLA, Lake Tahoe Basin Management Unit. A Type 2 Incident Management Team (Szczepanik) is assigned. A Type 1 Incident Management Team (Studebaker) has been prepositioned. This fire is burning in ponderosa pine, red fir and white fir on the outskirts of Stateline, NV. Crews are constructing handline on the north flank. A voluntary evacuation advisory remains in effect for subdivisions on Kingsbury Grade; structure protection is in place. Highway 207 has been reopened.

### EASTERN AREA LARGE FIRES:

TUESDAY, Minnesota State Forestry. A Minnesota State Type 2 Interagency Incident Management Team (Stegmeir) is assigned. This fire is 15 miles northeast of Grand Marais, MN. Extreme fire behavior, torching and spotting up to 3/4 mile ahead of the front were observed in pine plantations and heavy slash. The fire crossed containment lines on the northeast and east flanks. Dozers are building fireline and crews are burning out where necessary.

TUESDAY	MN	MNS	400	20	7/6	114	5	7	1	0	200K

### SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. Precipitation has raised swamp water levels, decreasing fire behavior. No new information was reported.

## **OUTLOOK:**

An upper level low pressure system moving east over the Rocky Mountain Area will bring partly cloudy to mostly sunny skies and mostly wet thunderstorms. High temperatures will be in the 70's in the mountains and 85 to 95 at lower elevations. Minimum relative humidity will range from 20 to 30 percent in northern Wyoming and the Black Hills and 15 to 25 percent in the remainder area. Winds will be south at 10 to 20 mph east of the Continental Divide and variable at 5 to 15 mph elsewhere.

The Eastern Great Basin Area can expect mostly sunny skies with isolated thunderstorms in the mountains of Utah. High temperatures will be mid 70's to 80's in the mountains and upper 80's to 105 in the valleys. Minimum relative humidity will range from 5 to 18 percent at lower elevations and 12 to 20 percent at higher elevations. Winds will be west to southwest at 10 to 15 mph.

The Southwest Area can expect partly to mostly sunny skies with scattered wet and dry thunderstorms in east-central Arizona, west Texas and much of New Mexico. High temperatures will be range from the mid 70's in the mountains to near 105 in the hottest lower elevation locations. Minimum relative humidity will be 5 to 25 percent in Arizona and western New Mexico and 20 to 50 percent elsewhere. Winds will be east to southeast at 10 to 20 mph in eastern New Mexico and west Texas, and southwest to west at 5 to 15 mph, gusting to 20 mph in the remainder of the region.

A high pressure ridge building into the Northern California Area will bring mostly sunny skies. High temperatures will be in the 60's and 70's along the coast and upper 90's inland. Minimum relative humidity will range from 12 to 20 percent. Winds will be west to southwest at 5 to 15 mph.

A weak low pressure system over the Southern Area will bring scattered rain showers and thunderstorms. High temperatures will be in the 80's and 90's and minimum relative humidity will be above 40 percent in most areas. Winds will be variable and light.

The Southern California Area can expect mostly sunny skies with morning low clouds and fog along the coast and in the coastal basins. High temperatures will be upper 60's to mid 70's in coastal areas, in the 80's in the mountains and inland valleys, and in the 90's to 110 in the deserts. Minimum relative humidity will range from 8 to 15 percent in the deserts, 15 to 25 percent in the mountains, 30 to 45 percent in the valleys, and above 55 percent near the coast. Winds will be onshore at 8 to 15 mph in coastal areas and southwest to northwest at 8 to 18 mph elsewhere.

### MANAGING VEHICLE TRAFFIC IN SMOKE

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

- Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.
- Identification of important, public roads that may be impacted by smoke Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.
- Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area.
- Identification of alternative traffic routes as part of the incident/project traffic plan.
- Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice.
- When potential smoke-related problems are identified:
  - Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
  - Notify local law enforcement units and highway departments of a potential problem.
  - Implement preplanned actions such as posting smoke warning signs.
  - Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
