

**INCIDENT MANAGEMENT SITUATION REPORT
SUNDAY, JULY 7, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was moderate in the Eastern Great Basin and Rocky Mountain Areas, and light elsewhere. Nationally, 227 new fires were reported. Three of these became large fires, two in the Eastern Great Basin Area and one in the Northern Rockies Area. Three large fires were contained, one each in the Southwest, Rocky Mountain and Northern California Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Massachusetts, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

ROCKY MOUNTAIN AREA LARGE

FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

KRAFT COMPLEX, Standing Rock Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Gardner) is assigned. This complex is 50 miles south of Bismarck, ND and consists of 16 fires. Active fire behavior and flare-ups were observed on the Ten Brooke fire. Crews made good progress constructing fireline and mopping up. Residents of Porcupine were allowed to return to their homes. One additional outbuilding was confirmed lost.

MISSIONARY RIDGE, San Juan National Forest. A Type 1 Incident Management Team (Hart) and a Type 2 Incident Management Team (Carlson) are assigned. This fire is burning five miles northeast of Durango, CO in gambel oak, ponderosa pine and mixed conifer forest. Fire behavior was moderate on the east side of the fire and minimal on the west. Crews made excellent progress building direct attack fireline on the east flank with support from aerial resources. On the western half of the fire, crews are mopping up and rehabilitating dozer lines. Residents of the four ranches on the Pine River, east of Vallecito Lake, were allowed to return to their homes yesterday.

GRIZZLY GULCH, South Dakota State Forestry. A Type 1 Incident Management Team (Hefner) is assigned. This fire, burning in ponderosa pine, aspen and grass, is on the outskirts of Deadwood, SD. Smouldering and creeping were observed in the interior. Crews are mopping up and rehabilitating firelines. Highway 14A has been reopened.

SOUTH FORK II, Wind River Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Benes) is assigned. This fire is ten miles west of Fort Washakie, WY in the Wind River Roadless Area. Minimal fire activity was observed in decadent lodgepole pine and sagebrush. Crews and dozers completed fireline construction on the north flank in preparation for a burn out operation. Aerial resources are flanking the fire on the south-central perimeter with water and retardant drops. Increase in acreage is due to more accurate mapping.

SPRING CREEK, White River National Forest. A Type 2 Incident Management Team (Hartman) is assigned. This fire is burning in spruce, fir, aspen and brush eight miles north of New Castle, CO. Precipitation moderated fire activity. Crews and dozers have completed fireline construction on the east and southeast flanks in preparation for a burn out. Mop-up is underway on the west flank.

REESE MOUNTAIN, Rawlins District, Bureau of Land Management. A transfer of command from Wood's Type 1 Incident Management Team to Swope's Type 2 Incident Management Team will occur at 1800 MDT. This fire is burning 30 miles west of Wheatland, WY in heavy dead and down lodgepole pine and ponderosa pine. Minimal fire activity was observed. Crews are mopping up and rehabilitating firelines.

HENSEL, Medicine Bow National Forest. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Creeping, smouldering and occasional torching were observed. Aerial resources are being utilized on the unsecured perimeter in upper Ashenfelder drainage along the north flank due to steep and dangerous terrain. Crews are mopping up, patrolling and rehabilitating firelines.

DALEY COMPLEX, Casper Field Office, Bureau of Land Management. This complex, comprised of the Daley Draw, Pownell, Watt and Hart fires, is 30 miles north of Gillette, WY. The fires are creeping and smouldering in ponderosa pine, sagebrush and grass. Significant progress was made cold trailing and rehabilitating firelines.

COAL SEAM, Counties dispatched by Grand Junction Dispatch Center. A Fire Use Management Team (Cones) is assigned to manage suppression operations and develop long term assessments. The fire is smouldering and creeping in spruce, subalpine fir and aspen four miles north of Glenwood Springs, CO. A confinement strategy is in place for the north flank; the fire is in monitor status.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

MUSTANG, Ashley National Forest. A Type 1 Incident Management Team (Melton) is assigned. This fire is burning in Douglas fir, pinyon pine, juniper and sagebrush one mile north of Dutch John, UT. Creeping and smouldering were observed. Crews are constructing, holding, and mopping up firelines with support from aerial resources.

EAST FORK, Wasatch-Cache National Forest. A Type 1 Incident Management Team (Raley) is assigned. This fire is burning in lodgepole pine and spruce 35 miles south of Evanston, WY. Group and individual tree torching and short range spotting were observed as the fire advanced northeast. Crews are constructing handline on the southwest, northwest and east flanks with support from aerial resources. Approximately 500 residences remain evacuated; structure protection is in place.

RATTLE COMPLEX, Moab Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Vail) is assigned. This complex is burning 20 miles northeast of Green River, UT in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine. High intensity surface fire runs, short range spotting and crown runs were observed on the south and southeast perimeters. Crews made good progress constructing direct attack fireline, mopping up and cold trailing. Several ranches are threatened. Reduction in acreage is due to more accurate mapping.

BLACK CANYON, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Broyles) is assigned. This fire is 20 miles northeast of Green River, UT. Moderate fire behavior was observed in Horse Canyon on the northwest flank in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine. Crews completed burn out operations on the northwest perimeter and are holding, improving and mopping up established firelines. Down drafts from passing thunder cells and extremely rugged terrain are impeding containment efforts.

SPRINGVILLE, Uinta National Forest. A Type 2 Incident Management Team (Rios) is assigned. This fire is one mile north of Springville, UT. Low to moderate fire behavior was observed in oak brush, pinyon pine and juniper. Rappellers are constructing handline on a slopover on the southeast flank. Steep, rocky, inaccessible terrain has necessitated the use of helicopters to contain large sections of fireline on the south perimeter.

CARPENTER, Manti-LaSal National Forest. This fire is ten miles northwest of Paradox, CO. Active fire behavior was observed in ponderosa pine and oak brush. Crews are constructing direct attack fireline with support from aerial resources. Several campgrounds were evacuated as a precaution.

WALCOTT1, Minidoka National Wildlife Refuge. This fire is burning in cat tails, sagebrush and grass 11 miles east of Rupert, ID. Passing thunder cells and very rugged terrain are hampering containment efforts.

SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

DARNELL, Coronado National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is in the Chiricahua Wilderness Area five miles south of Portal, AZ. Active fire behavior in grass, scrub oak and juniper was observed. Aerial resources were utilized on the west flank in the Wilderness Area to limit fire spread. Crews successfully completed several burn out operations and are constructing fireline, mopping up and patrolling.

CUB, Gila National Forest. A Fire Use Management Team (Zimmerman) is assigned. This fire is in the Gila Wilderness Area, 19 miles east of Glenwood, NM. Torching and several crowning runs were observed on the southeast, northeast and northwest flanks in ponderosa pine and mixed conifer forest. Crews are creating defensible space for threatened structures in Willow Creek.

RODEO/CHEDISKI COMPLEX, Fort Apache Agency, Bureau of Indian Affairs. A Type 1 Incident Management Team (Dash) and a Type 2 Incident Management Team (Joki) are assigned. The Rodeo and Chediski fires are burning in chaparral, ponderosa pine, juniper and brush three miles north of Cibecue, AZ. Small flare-ups were observed within the containment lines. Mop-up and fireline rehabilitation are underway on all flanks.

N3S = Socorro District, New Mexico State Forestry Office

NORTHERN ROCKIES AREA LARGE FIRES:

BROAD, Yellowstone National Park. This fire is burning in old growth lodgepole and Douglas fir 20 miles southeast of Mammoth, WY. Single tree torching and short range spotting were observed as the fire advanced west toward the Yellowstone River. Personnel have completed helispot and safety zone construction, established an anchor point and are building handline along the east flank. Aerial resources are being utilized to slow the fire's spread south and east of Broad Creek.

EASTERN AREA LARGE FIRES:

TUESDAY, Minnesota State Forestry. A Minnesota State Type 2 Interagency Incident Management Team (Stegmeir) is assigned. This fire is 15 miles northeast of Grand Marais, MN. Torching and short runs were observed in pine plantations and heavy slash. Crews made good progress constructing fireline and are mopping up, gridding for spot fires on the southeast flank and rehabilitating dozer lines.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
TUESDAY	MN	MNS	450	80	UNK	201	7	9	1	0	466K

SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. Precipitation has raised swamp water levels, decreasing fire behavior. Personnel are rehabilitating fireline and roads in the area.

OUTLOOK:

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN NORTH-CENTRAL WASHINGTON FOR DRY LIGHTNING*****

A high pressure system over the Rocky Mountain Area will bring mostly sunny skies with isolated to widely scattered thunderstorms in northern Wyoming, the Black Hills and the mountains of Colorado. High temperatures will be in the 70's to mid 80's in the mountains and mid 80's to mid 90's at lower elevations. Minimum relative humidity will range from 9 to 16 percent in western Colorado, 12 to 22 percent in central Wyoming, and 20 to 35 percent in the remainder of the area. Winds will be south to southeast at 5 to 15 mph.

High pressure over the Eastern Great Basin Area will bring mostly sunny skies with isolated mountain thunderstorms in Utah and over the Bridger-Teton National Forest. High temperatures will be 75 to 90 in the mountains and 90 to 106 in the valleys. Minimum relative humidity will range from 5 to 18 percent at lower elevations and 12 to 20 percent at higher elevations. Winds will be southwest at 10 to 20 mph in southern Idaho and light elsewhere.

The Southwest Area can expect partly to mostly sunny skies with isolated dry thunderstorms in western New Mexico and Arizona. Scattered wet thunderstorms are forecast in eastern New Mexico and west Texas. High temperatures will be in the 70's and 80's in the mountains and in the 90's to 105 at lower elevations. Minimum relative humidity will be 5 to 20 percent in Arizona and western New Mexico and 30 to 60 percent elsewhere. Winds will be east to southeast at 10 to 20 mph in eastern New Mexico and west Texas, and southwest to west at 5 to 15 mph, gusting to 20 mph in the remainder of the region.

An unstable air mass over the Northern Rockies Area will bring partly cloudy to mostly sunny skies with scattered showers and thunderstorms in western Montana during the afternoon. Isolated showers and thunderstorms are forecast in eastern Montana with heavy rain expected in North Dakota. High temperatures will be 85 to 95 in Montana and 75 to 90 in North Dakota. Minimum relative humidity will range from 15 to 25 percent west of the Divide, above 50 percent in North Dakota and 25 to 35 percent elsewhere. Winds will be south to east at 5 to 15 mph.

A high pressure ridge over the Northern California Area will bring mostly sunny skies with variable high clouds and a chance of light showers over the far northern portions of the region. High temperatures will be in the 60's and 70's along the coast and upper 90's inland. Minimum relative humidity will range from 15 to 28 percent. Winds will be west to southwest at 5 to 25 mph.
