

**INCIDENT MANAGEMENT SITUATION REPORT  
WEDNESDAY, JULY 17, 2002 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 5**

**CURRENT SITUATION:**

Initial attack activity was moderate in the Northwest and Eastern Great Basin Areas, and light elsewhere. Nationally, 233 new fires were reported. Five of these became large fires, four in the Northwest Area and one in the Rocky Mountain Area. Nine large fires were contained, three in the Eastern Great Basin Area, two in the Southern California Area, and one each in the Western Great Basin, Southwest, Northwest, and Northern California Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Massachusetts, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

**NORTHWEST AREA LARGE FIRES:**

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

EYERLY, Warm Springs Agency, Bureau of Indian Affairs. A Type 1 Incident Management Team (Studebaker) and a Type 2 Incident Management Team (Jackson) are assigned. This fire is burning in ponderosa pine, mixed conifer forest, juniper and bitter brush in the Metolius River Canyon, 15 miles northeast of Camp Sherman, OR. Fire activity was limited to creeping and occasional torching. Crews are constructing direct and indirect attack fireline and burning out with support from aerial resources. Summer homes on Lake Billy Chinook remain evacuated with structure protection in place.

WINTER, Klamath Lake District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Mair) is assigned. This fire is ten miles northwest of Paisley, OR in sagebrush, ceanothus, juniper and mixed conifer forest. Torching and running fire behavior were observed. Crews are establishing anchor points and constructing handline. Sixty residences are threatened and structure protection is in place.

FLAGTAIL, Malheur National Forest. Burning in mixed conifer and lodgepole, this fire is 13 miles west of Seneca, OR. Active fire behavior was observed as the fire grew significantly. Bear Valley Forest Service Work Center was evacuated.

TOOL BOX, Fremont National Forest. A Washington Interagency Incident Management Team (Berndt) is assigned. This fire is 30 miles northwest of Paisley, OR. Extreme fire behavior with spotting up to ½ mile ahead of the front was observed. Crews are constructing fireline and utilizing existing roads as containment lines. Strong erratic winds are hampering containment efforts. Several ranches and a major power line are threatened.

SILVER, Fremont National Forest. This fire is eight miles southwest of Silver Lake, OR in heavy timber and slash. No new information was reported.

TILLER COMPLEX, Umpqua National Forest. A Washington Interagency Incident Management Team (Dutton/Holloway) is assigned. This complex is comprised of 94 reported fires on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, west of Tiller, OR. Short and long range spotting was observed. Rough terrain, rolling debris and spotting are hampering containment efforts. Crews are mopping up and providing initial attack on unstaffed fires. Forty residences are threatened.

NORTH UMPQUA COMPLEX, Umpqua National Forest. Burning in heavy timber, this complex of several fires is 25 miles east of Glide, OR. Running, spotting and torching fire behavior was observed. Personnel are mopping up and performing initial attack on unstaffed fires.

MALHEUR COMPLEX, Malheur National Forest. A Type 2 Incident Management Team (Morcom) is assigned. This complex, consisting of the Roberts and Easy fires, is burning in mixed conifer forest, eight to 25 miles south of Prairie City, OR. Lower relative humidity and gusty winds contributed to increased spotting and are hampering containment efforts. Crews and dozers are constructing direct and indirect attack fireline and burning out with support from aerial resources. Evacuation plans have been developed for several communities along Highway 26 and County Road 62.

MONUMENT, Malheur National Forest. A Type 1 Incident Management Team (Stutler) is assigned. This fire is burning in the Monument Rock Wilderness Area, nine miles southwest of Unity, OR. Moderate fire behavior with torching and spotting was observed in mixed conifer forest, ponderosa pine and grass. Crews are constructing direct and indirect attack fireline in preparation for a burnout. Seventy-five residences are threatened; structure protection is in place.

GRIZZLY COMPLEX, Fremont National Forest. A Type 2 Incident Management Team (Bright) is assigned. This complex, comprised of the Grizzly, Bare and Logan fires, is 15 miles west of Lakeview, OR. Moderate fire behavior with torching and spotting was observed in heavy timber and slash. Dozers and crews are constructing fireline and engines are patrolling.

BISCUIT COMPLEX, Siskiyou National Forest. A Type 2 Incident Management Team has been ordered. This complex consists of several fires, 17 miles southwest of Cave Junction, OR. Torching and significant runs were observed in mixed conifer forest and brush. Personnel are improving access routes and evaluating suppression strategies.

MAHOGANY COMPLEX, Vale District, Bureau of Land Management. A Type 2 Incident Management Team (Gardner) is assigned. This complex consists of the Atkins and Mahogany Mountain fires which are 15 miles northwest of Jordan Valley, OR. Running fire behavior was observed in grass and sagebrush. Personnel are patrolling and engines are wetlining.

DEER POINT, Wenatchee National Forest. A Washington Interagency Management Team (Jasso/Perry) is assigned. This fire is near Chelan, WA in brush and heavy timber. Significant fire growth was observed due to very active fire behavior. Crews are constructing handline and aerial resources are assisting suppression efforts. Structure protection is in place for 512 residences.

747, Ochoco National Forest. This fire is northeast of Paulina, OR in the Black Canyon

Wilderness. Extreme fire behavior was observed in sage and ponderosa pine.

SQUIRE PEAK, Southwest Oregon District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Thorpe) is assigned. Structures are threatened near Sterling Creek; structure protection is in place.

### EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

HANG DOG, Manti-LaSal National Forest. This fire is eight miles northeast of La Sal, UT. Extreme fire behavior with 200 foot flame lengths, extensive torching, crowning and running was observed in gambel oak, ponderosa pine, juniper and pinyon pine. Heavy fuel loading, low relative humidity, erratic winds from passing thunder cells and long term drought are impeding containment efforts. Thirty residences are threatened and evacuations are underway.

HAMMOND, Manti-LaSal National Forest. The fire is 15 miles northwest of Blanding, UT in brush, gambel oak, pinyon pine, juniper and ponderosa pine. Crowning, spotting and torching with 200 foot flame lengths was observed as the fire advanced northeast. Low fuel moisture and passing thunderstorms are hampering containment efforts.

SEQUOIA, Dixie National Forest. This fire is 26 miles southwest of Cedar City, UT. Extreme fire

behavior with crowning and rapid fire growth was observed in ponderosa pine. Crews are constructing handline on the southeast flank and scouting possible helispot locations.

HORSE, Salmon-Challis National Forest. A Type 2 Incident Management Team has been ordered. This fire is 25 miles west of North Fork, ID. Extreme fire behavior with long range spotting and running was observed in subalpine fir and spruce. Unfavorable weather conditions and very steep, rugged terrain are hampering containment efforts. Crews are constructing fireline on the west flank. Engines are providing structure protection for the threatened Gattin Ranch.

RATTLE COMPLEX, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Murphy) is assigned. This complex is 20 miles northeast of Green River, UT. Minimal fire behavior was observed in aspen and mixed conifer forest. The fire is advancing west and southwest toward secondary containment lines on Went ridge. Crews and dozers are constructing fireline above West Willow Creek in preparation for a planned burn out operation. One additional outbuilding was confirmed lost.

MULE, Bridger-Teton National Forest. A Type 2 Incident Management Team (Smith) is assigned. This fire is 12 miles west of Daniel, WY. Torching, running and spotting were observed in heavy timber. Crews are building direct attack fireline with support from aerial resources on the north and south flanks.

EAST FORK, Wasatch-Cache National Forest. A Type 1 Incident Management Team (Raley) is assigned. This fire is burning in lodgepole pine and spruce 35 miles south of Evanston, WY. Minimal fire behavior was observed. Crews are improving fireline, mopping up and rehabilitation established dozer line. Evacuation orders have been lifted and residents are being allowed to return to their homes in the Christmas Meadows subdivisions; they remain in effect for a Boy Scout Camp and scattered homes.

WEST TWIN PEAKS, Wasatch-Cache National Forest. This fire is on the Twin Peaks above Salt Lake City, UT. Active torching and spotting fire behavior were observed in Douglas fir, pinyon pine, juniper and gambel oak. Steep, inaccessible terrain, high temperatures, low relative humidity and erratic winds from passing thunder cells are impeding containment efforts. Aerial resources are being utilized on the south, north and west flanks.

CLEAR CREEK, Southwest State, Utah State Division of Forestry Fire & State Lands. A Type 2 Incident Management Team has been ordered. This fire is burning in pinyon pine, juniper, oak, sage and ponderosa pine. Favorable weather conditions assisted containment efforts. Crews and dozers are constructing fireline and mopping up. Two resort complexes, a radio repeater site and various summer homes are threatened; structure protection is in place.

### ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

BURN CANYON, Grand Mesa-Uncompahgre-Gunnison National Forest. A Type 2 Incident Management Team (Furlong) is assigned. This fire is five miles southwest of Norwood, CO. Precipitation moderated fire behavior in pinyon pine, gambel oak and ponderosa pine. Crews are building handline and burning out. Engine crews are protecting evacuated structures in Redvale and surrounding populated areas.

HINMAN, Routt National Forest. A Type 2 Incident Management Team (Garcia) is assigned. This fire is 23 miles north of Steamboat Springs, CO. Extreme fire behavior with torching and spotting was observed in spruce, fir and lodgepole pine. Extremely dry fuels, inaccessible terrain and unfavorable weather conditions are hampering containment efforts. Numerous residences and two commercial properties are threatened.

GREEN CREEK, Routt National Forest. This fire is 15 miles southeast of Steamboat Springs, CO. Extreme fire behavior with 200 to 300 foot flame lengths while torching, crowning and spotting up to ½ mile was observed in heavy dead and down spruce and fir. Erratic winds from passing

thunder cells are hampering containment efforts. Two thousand residences are threatened. EAST MARBLE, Ute Mountain Agency, Bureau of Indian Affairs. This fire is 15 miles south of Cortez, CO in pinyon pine, juniper and sage. Isolated torching fire behavior was observed. Aerial resources are assisting suppression efforts and crews are constructing fireline.

BEAR MOUNTAIN SOUTH, Medicine Bow National Forest. A Type 2 Incident Management Team (Gray) is assigned. This fire is 14 miles southeast of Encampment, WY. Individual tree torching and creeping were observed in lodgepole pine and spruce. Crews are patrolling and mopping up. Six residences remain threatened.

SPRING CREEK, White River National Forest. A Type 2 Incident Management Team (Sisk) is assigned. This fire is burning in spruce, fir, aspen and brush eight miles north of New Castle, CO. Very active fire behavior with short crown runs and group tree torching was observed. Crews are patrolling, mopping up and rehabilitating established line. Dozers are constructing fireline. Three residences and associated outbuildings are threatened; structure protection is in place.

LOST LAKE, Routt National Forest. A Fire Use Management Team (Cones) is assigned. This fire is 20 miles west of Yampa, CO. Moderate fire behavior with torching and creeping was observed in heavy dead and down spruce and fir. Personnel are preparing long range assessment and implementation plans.

STEUBEN, Grand Mesa-Uncompahgre-Gunnison National Forest. This fire is burning ten miles west of Gunnison, CO in sagebrush, aspen and bug kill Douglas fir. Minimal fire activity with smouldering and creeping was observed. Crews are constructing handline and mopping up.

HENSEL, Medicine Bow National Forest. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Moderate fire behavior with interior torching was observed. Cliffs, large boulders and very steep terrain are hampering containment efforts. Engines are patrolling and aerial resources are suppressing hot spots in the Ashenfelder drainage.

MISSIONARY RIDGE, San Juan National Forest. A Type 2 Incident Management Team (Carlson) is assigned. This fire is five miles northeast of Durango, CO. Smouldering fire behavior was observed in gambel oak, ponderosa pine and mixed conifer forest. Crews are mopping up and rehabilitating established fireline.

LITTLE ELK, South Dakota State Forestry. This fire is burning in ponderosa pine near Piedmont, SD. Crowning and torching fire behavior was observed. Crews are constructing fireline on the rim of Little Elk Canyon. Twenty residences in the Piedmont Meadows subdivision are threatened and have been evacuated.

CURRANT CREEK, Rocky Springs District, Bureau of Land Management. This fire is burning in juniper, sage and grass 26 miles south of Rock Springs, WY. Creeping and running fire behavior were observed. Personnel are and mopping up. The Currant Creek Ranch is threatened; structure protection is in place.

### WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

LOST CABIN, Humboldt-Toiyabe National Forest. A California Department of Forestry and Fire Protection Type 1 Incident Command Team (Maner) is assigned. This fire is 27 miles west of Las Vegas, NV. Extreme fire behavior with crowning, torching and spotting were observed in pinyon pine, juniper and sagebrush as the fire advanced northeast. CC Springs and Torino Ranch have been evacuated with 460 residences threatened; structure protection is in place.

GATE COMPLEX, Humboldt-Toiyabe National Forest. A Type 1 Incident Management Team (Lohrey) is assigned. This complex is comprised of the Gate, Coleville and Slinkard fires and is five miles north of Walker, CA. Extreme fire behavior with torching, running and long range spotting was observed in Jeffery pine, pinyon pine, juniper and sagebrush on the Slinkard fire. Crews and dozers are constructing direct attack fireline on the south flank. Three hundred residences and one hundred twenty-five outbuildings and commercial properties are threatened; engine crews are providing structure protection. Two outbuildings were confirmed lost.

EAGLE, Ely Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Hefner) is assigned. This fire is 50 miles southeast of Ely, NV. Favorable weather conditions resulted in minimal fire activity in pinyon pine, juniper and sagebrush. The fire has crossed the

Nevada-Utah border. Steep terrain, high winds and continuous fuels are impeding containment efforts. Crews and dozers are building fireline on the north and south flank and protecting threatened structures in Utah. Thirty-three residences and several structures are threatened.

ELLSWORTH, Humboldt-Toiyabe National Forest. This fire is 50 miles southeast of Fallon, NV. Significant runs with the wind were observed in pinyon pine, juniper and sagebrush. Crews and dozers have anchored and are building fireline. The Ellsworth historical site is threatened.

PONY EXPRESS, Carson City Field Office, Bureau of Land Management. This fire is burning in sage, pinyon pine and juniper 40 miles east of Fallon, NV. Extreme fire behavior was observed as the fire advanced east. Engine crews are wet lining and smokejumpers are constructing handline.

BUCKEYE, Carson City Field Office, Bureau of Land Management. This wind driven fire is 15 miles east of Gardnerville, NV. Torching, crowning and short runs were observed in unburned islands of pinyon pine and juniper. Crews are mopping up and rehabilitating dozer fireline. Erratic winds and limited access are hampering containment efforts.

**NORTHERN ROCKIES AREA LARGE FIRES:**

Priorities are being established by the Northern Rockies Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

BROAD, Yellowstone National Park. A Type 1 Incident Management Team (Frye) is assigned. This fire is burning in old growth lodgepole pine and Douglas fir 20 miles southeast of Mammoth, WY. Favorable weather conditions resulted in moderate fire behavior with individual and group tree torching. Crews are spiked out and constructing handline along the rim of the Grand Canyon of the Yellowstone to Joseph’s Coat Hot Springs on the south flank. Type 1 helitankers are being utilized on the west flank, holding the fire on the east side of the Yellowstone River. National Park Service facilities and commercial properties at Canyon Village are threatened.

FOX CREEK, Blackfeet Agency, Bureau of Indian Affairs. A Type 2 Incident Management (Kechter) is assigned. This fire is burning nine miles southeast of Babb, MT in subalpine fir, lodgepole pine and spruce. Isolated torching fire behavior was observed. Dozers are constructing line on the south and east flanks and personnel are mopping up. Aerial resources are assisting suppression efforts.

RED WAFFLE, Custer National Forest. A Type 2 Incident Management Team (Chrisman) is assigned. This fire is 35 miles southeast of Bridger, MT. Extreme fire behavior with torching, crowning, and spotting were observed in ponderosa pine, brush and grass as the fire advanced northeast. Crews are constructing fireline and helicopters are assisting suppression efforts on the east flank in inaccessible terrain.

GOLDSTONE, Beaverhead-Deer Lodge National Forest. A Type 2 Incident Management Team (Sandman) is assigned. This fire is 30 miles west of Wisdom, MT on the Continental Divide. Group and individual torching fire behavior was observed in subalpine fir. Crews are constructing direct attack fireline.

WIGWAM COMPLEX, Beaverhead-Deer Lodge National Forest. This complex, comprised of seven fires, is 17 miles southwest of Ennis, MT. Torching and spotting were observed in dead and down lodgepole pine, spruce and subalpine fir. Crews are constructing direct attack fireline, utilizing green meadows for natural barriers and mopping up.

**SOUTHWEST AREA LARGE FIRES:**

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

PEAK COMPLEX, Phoenix-Kingman District, Bureau of Land Management. A Type 1 Incident Management Team (Bennett) is assigned. This complex, comprised of the Peak, Lion Kill and Wildcow fires, is 12 miles southeast of Kingman, AZ in ponderosa pine, chaparral, pinyon pine and juniper. No new information was reported.

ORACLE HILL, Coronado National Forest. A Type 2 Incident Management Team (Sears) is assigned. This fire is one mile south of Oracle, AZ. Minimal fire behavior was observed in grass and chaparral. Crews are patrolling, mopping up and rehabilitating established fireline. Evacuated residents have been allowed to return to their homes. Reduction in acreage was due to better mapping.

### SOUTHERN CALIFORNIA AREA LARGE FIRES:

FEMA-MICRONESIA-CHUUK, Guam, Micronesia and Northern Mariana Islands. The islands were struck by Typhoon Chata'an on July 5<sup>th</sup> and Typhoon Halong on July 9<sup>th</sup> resulting in 40 major landslides causing many injuries and fatalities as well as severe damage to the islands. US Forest Service and Federal Emergency Management Agency personnel have responded to provide disaster aid and supplies. The US Forest Service has been tasked with organizing and staffing a receiving and distribution center for planning food and water distribution in Chuuk State and setting up operational planning on Chuuk and Guam.

### OUTLOOK:

#### **\*\*\*A FIRE WEATHER WATCH HAS BEEN ISSUED IN THE BLACK HILLS FOR HOT, DRY CONDITIONS AND ISOLATED TO WIDELY SCATTERED DRY THUNDERSTORMS\*\*\***

The Northwest Area will have mostly sunny skies with isolated to widely scattered thunderstorms in south central and eastern Oregon. High temperatures will be in the 70's and 80's west of the Cascade Mountains and in the 90's elsewhere. Minimum relative humidity will range from 10 to 25 percent in the east and 25 to 40 percent to the west. Winds will be north to northwest at 5 to 15 mph west of the Cascade Mountains and up slope up valley at 5 to 10 mph to the east.

The Eastern Great Basin Area can expect partly sunny skies with widely scattered wet and dry thunderstorms. High temperatures will be 80 to 90 in the mountains and 90 to 103 in the valleys. Minimum relative humidity will range from 13 to 30 percent in the mountains and 10 to 20 percent at lower elevations. Winds will be variable at 5 to 15 mph.

The Rocky Mountain Area can expect mostly sunny skies with isolated to widely scattered wet and dry thunderstorms. High temperatures will be in the 80's to mid 90's. Minimum relative humidity will range from 20 to 35 percent in north central Wyoming and southwest Colorado and 8 to 18 percent elsewhere. Winds will be variable with gusts near thunderstorms.

The Western Great Basin Area can expect mostly sunny skies with scattered wet thunderstorms. High temperatures will be in the low 80's to low 90's in the north and in the 90's in the south. Minimum relative humidity will range from the single digits to mid teens. Winds will be southwest at 10 to 20 mph with gusts near 30 mph.

A thermal trough in combination with moist subtropical air over the Northern Rockies Area will bring mostly sunny skies with scattered thunderstorms in eastern Montana. High temperatures will be 85 to 95. Minimum relative humidity will range from 20 to 40 percent. Winds will be easterly at 10 to 20 mph.

Monsoonal moisture over the Southwest Area will bring partly sunny skies and scattered, wet thunderstorms. High temperatures will be in the 70's and 80's in the mountains and in the 90's and

100's at lower elevations. Minimum relative humidity will range from 15 to 45 percent in Arizona and northwestern New Mexico, and 25 to 50 percent elsewhere. Winds will be upslope, up valley at 5 to 15 mph.

A trough of low pressure moving into the Northern California Area will bring mostly sunny skies and a chance of thunderstorms. High temperatures will be in the 60's and 70's along the coast and in the 70's to upper 90's inland. Minimum relative humidity will range from 12 to 45 percent inland to above 50 percent along the coast. Winds will be southwest to northwest at 8 to 22 mph.

The Southern California Area can expect mostly sunny skies. High temperatures will be upper 60's and 70's in coastal areas, 80's to mid 90's in the mountains and inland valleys, and 90's to 110 in the deserts. Minimum relative humidity will range from 10 to 20 percent in the deserts, 12 to 24 percent in the mountains, 25 to 40 percent in the valleys, and above 50 percent near the coast. Winds will be onshore at 8 to 15 mph near the coast and southwest to west at 8 to 18 mph elsewhere.

### **HELICOPTER PERFORMANCE AND EFFECTIVENESS**

- ! Certain helicopter missions push the limits of the aircraft's performance capabilities. Items that reduce the effectiveness and increase the risk of the mission include weight, temperature, altitude, and visibility.
- ! Helicopter missions that transport external loads increase risk.
- ! Helicopters reach their maximum performance capabilities as temperature and altitude increase.
- ! All helicopters have different maximum performance capabilities, so be aware of the capabilities of the specific helicopter that you are working with.
- ! Low-level helicopter operations often occur in heavy smoke where hazards (e.g., trees, snags, antennas, visibility, turbulence, and other aircraft) increase the risk level significantly.
- ! Determine the risk level for every mission. Is the risk level acceptable? Can the risk be mitigated? If the risk is not acceptable or it cannot be mitigated, then the mission should not be flown.
- ! A large part of the success of a helicopter mission is the result of good communications between the pilot and the user on the ground. Accurate target and hazard descriptions are essential to a safe mission. Locate this information and relay it to the pilot. Things to consider in the target description include:
  - ! Have you considered what the target would look like from the air?
  - ! Are you located where the pilot can see you?

- ! Do you have a signal mirror?
- ! Are you using cardinal directions or clock directions in relation to the track of the aircraft?
- ! What is the wind direction? Provide this information to the pilot.
- ! Are all firefighters clear of the drop area?
- ! Is there a safer way to carry out an effective suppression action?
