

**INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, JULY 18, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was moderate in the Northwest, Rocky Mountain, Northern Rockies and Eastern Great Basin Areas, and light elsewhere. Nationally, 240 new fires were reported. Five of these became large fires, two in the Northwest Area and one each in the Eastern Great Basin, Rocky Mountain and Western Great Basin Areas. Six large fires were contained, three in the Rocky Mountain Area and one each in the Eastern Great Basin, Northern California and Southern California Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Kansas, Massachusetts, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage large fires in southeast Oregon.

WINTER, Klamath Lake District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Mair) is assigned. This fire is ten miles northwest of Paisley, OR in sagebrush, ceanothus, juniper and mixed conifer forest. Torching and spotting were observed as the fire spread north. Crews are establishing anchor points and constructing handline. Sixty residences are threatened; structure protection is in place.

SQUIRE PEAK, Southwest Oregon District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Thorpe) is assigned. Torching, spotting and rapid rates of spread were observed in mixed conifer, timber slash, manzanita and ceanothus. Crews are constructing fireline and burning out on the east flank. Two hundred residences are threatened; structure protection is in place.

TOOL BOX COMPLEX, Fremont National Forest. A Washington Interagency Incident Management Team (Berndt) is assigned. This complex consists of the Tool Box and Silver fires which are 30 miles northwest of Paisley and eight miles southwest of Silver Lake, OR respectively. Extreme fire behavior was observed. Strong erratic winds are hampering containment efforts. Several ranches and a major power line are threatened.

EYERLY COMPLEX, Warm Springs Agency, Bureau of Indian Affairs. A Type 1 Incident Management Team (Studebaker) and a Type 2 Incident Management Team (Jackson) are assigned. This complex consists of the Eyerly and Geneva 2 fires and are burning in ponderosa pine, mixed conifer forest, juniper and bitter brush in the Metolius River Canyon, 15 miles northeast of Camp Sherman, OR. Fire activity included running, spotting and torching. Crews are

constructing direct and indirect attack fireline and burning out with support from aerial resources. Summer homes on Lake Billy Chinook remain evacuated with structure protection in place.

DEER POINT, Wenatchee National Forest. A Washington Interagency Management Team (Perry) is assigned. This fire is 27 miles north of Chelan, WA in brush and heavy timber. Significant fire growth was observed due to very active fire behavior. Crews are constructing handline on the east flank. Structure protection is in place for several residences.

FLAGTAIL, Malheur National Forest. A Type 1 Incident Management Team (Wood) has been ordered. Burning in mixed conifer and lodgepole, this fire is 13 miles west of Seneca, OR. Active fire behavior was observed as the fire grew significantly. Crews are anchoring and constructing fireline. Bear Valley Forest Service Work Center has been evacuated. A warehouse and a cabin are confirmed lost.

MALHEUR COMPLEX, Malheur National Forest. A Type 2 Incident Management Team (Morcom) is assigned. This complex, consisting of the Roberts and Easy fires, is burning in mixed conifer forest, eight to 25 miles south of Prairie City, OR. Short range spotting and crowning were observed. Crews and dozers are constructing direct and indirect attack fireline and burning out with support from aerial resources.

TILLER COMPLEX, Umpqua National Forest. A Washington Interagency Incident Management Team (Dutton/Holloway) is assigned. This complex is comprised of 94 reported fires on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, west of Tiller, OR. Short and long range spotting were observed. Rough terrain, rolling debris and spotting are hampering containment efforts. Forty residences are threatened.

NORTH UMPQUA COMPLEX, Umpqua National Forest. A Type 2 Incident Management Team has been ordered. Burning in heavy timber, this complex of several fires is 25 miles east of Glide, OR. Running, spotting and torching fire behavior was observed. Personnel are mopping up and performing initial attack on unstaffed fires. Twenty residences are threatened.

MONUMENT, Malheur National Forest. A Type 1 Incident Management Team (Stutler) is assigned. This fire is nine miles southwest of Unity, OR. Torching, running and spotting fire behavior was observed in mixed conifer forest, ponderosa pine and grass. Crews are constructing direct and indirect attack fireline in preparation for a burnout. Seventy-five residences are threatened; structure protection is in place.

GRIZZLY COMPLEX, Fremont National Forest. A Type 2 Incident Management Team (Bright) is assigned. This complex, comprised of the Grizzly, Bare and Logan fires, is 15 miles west of Lakeview, OR. Active fire behavior with torching and spotting was observed in heavy timber and slash on all flanks. Dozers and crews are constructing fireline and burning out.

747, Ochoco National Forest. A Type 2 Incident Management Team has been ordered. This fire is northeast of Paulina, OR. The fire is burning in ponderosa pine, juniper, sage and grass. The fire spotted across Black Canyon Creek and the South Fork of the John Day River and has burned out of the wilderness. Local ranches and the community of Daville are threatened.

BISCUIT COMPLEX, Siskiyou National Forest. A Type 2 Incident Management Team has been

ordered. This complex consists of several fires, 17 miles southwest of Cave Junction, OR. Torching and significant runs were observed in mixed conifer forest and brush. Personnel are improving access routes and evaluating suppression strategies.

MAHOGANY COMPLEX, Vale District, Bureau of Land Management. A Type 2 Incident Management Team (Gardner) is assigned. This complex consists of the Atkins and Mahogany Mountain fires which are 15 miles northwest of Jordan Valley, OR. Running fire behavior was observed in grass and sagebrush. Personnel are patrolling and engines are wet lining.

ROSEBURG COMPLEX, Southwest Oregon District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Lane) is assigned. This complex consists of several fires surrounding Roseburg, OR in brush and timber. Torching and short crown runs were observed. Crews are constructing handline and mopping up. Active initial attack is underway on unstaffed fires in the complex.

WALL CREEK, Southwest Oregon District, Oregon Department of Forestry. Short crown runs and torching were observed in mixed conifer and pine ten miles northeast of Medford, OR. Dozers are constructing fireline and personnel are burning out. Steep and rocky terrain are hampering containment efforts.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

COUNTY LINE, Uintah and Ouray Agency, Bureau of Indian Affairs. This fire is 30 miles north of Green River, UT. Running and torching fire behavior was observed in sage, oak, pine and manzanita. Dozers are constructing fireline. Difficult terrain is hampering containment efforts.

CLEAR CREEK, Southwest State, Utah State Division of Forestry Fire & State Lands. This fire is burning in pinyon pine, juniper, oak, sage and ponderosa pine. Favorable weather conditions assisted containment efforts. Two resort complexes, a radio repeater site and various summer homes are threatened; structure protection is in place.

HANG DOG, Manti-LaSal National Forest. This fire is eight miles northeast of La Sal, UT. Extreme fire behavior with 200 foot flame lengths, extensive torching, crowning and running was observed in gambel oak, ponderosa pine, juniper and pinyon pine. Heavy fuel loading, low relative humidity, erratic winds from passing thunder cells and long term drought are impeding containment efforts. Thirty residences are threatened and evacuations are underway.

HAMMOND, Manti-LaSal National Forest. The fire is 15 miles northwest of Blanding, UT in brush, gambel oak, pinyon pine, juniper and ponderosa pine. Crowning, spotting and torching with 200 foot flame lengths was observed as the fire advanced northeast. Low fuel moisture and passing thunderstorms are hampering containment efforts.

SEQUOIA, Dixie National Forest. The Type 2 Incident Management Team (Suwyn) is assigned. This fire is 26 miles southwest of Cedar City, UT. Short runs and creeping fire behavior were observed in ponderosa pine and chaparral. Limited access and steep terrain are hampering containment efforts. Crews are constructing fireline on the south and northwest flanks.

HORSE, Salmon-Challis National Forest. A Type 2 Incident Management Team (Saleen) is assigned. This fire is 25 miles west of North Fork, ID. Single tree torching was observed in subalpine fir and spruce. Unfavorable weather conditions and very steep, rugged terrain are hampering containment efforts. Crews are constructing fireline on the west flank. Engines are providing structure protection for the threatened Gattin Ranch.

RATTLE COMPLEX, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Murphy) is assigned. This complex is 20 miles northeast of Green River, UT. Minimal fire behavior was observed in aspen and mixed conifer forest. Crews are constructing fireline and burning out the east side of the West Willow Creek drainage. Difficult terrain and limited access is hampering containment efforts.

MULE, Bridger-Teton National Forest. A Type 2 Incident Management Team (Smith) is assigned. This fire is 12 miles west of Daniel, WY. Torching and short crown runs were observed in heavy

timber. Crews are building direct attack fireline with support from aerial resources on the north and south flanks.

WEST TWIN PEAKS, Wasatch-Cache National Forest. This fire is on the Twin Peaks above Salt Lake City, UT. Smouldering and creeping fire behavior were observed in Douglas fir, pinyon pine, juniper and gambel oak. Steep, inaccessible terrain, high temperatures and low relative humidity are impeding containment efforts. Aerial resources are being utilized on the west flank.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

LITTLE ELK, South Dakota State Forestry. A Type 1 Incident Management Team (Martin) will assume command today. This fire is burning in ponderosa pine near Piedmont, SD. Crowning, torching and spotting was observed. Crews are constructing fireline on the rim of Little Elk Canyon. One hundred residences in the Piedmont Meadows subdivision are threatened and have been evacuated.

BURN CANYON, Grand Mesa-Uncompahgre-Gunnison National Forest. A Type 2 Incident Management Team (Furlong) is assigned. This fire is five miles southwest of Norwood, CO. Some torching and creeping fire behavior was observed in pinyon pine, gambel oak and ponderosa pine. Crews are building handline and burning out. Engine crews are protecting evacuated structures in Redvale, Lower Naturita Canyon and surrounding populated areas.

HINMAN, Routt National Forest. A Type 2 Incident Management Team (Garcia) is assigned. This fire is 23 miles north of Steamboat Springs, CO. Extreme fire behavior with torching and spotting was observed in spruce, fir and lodgepole pine. Dozers are constructing fireline. Extremely dry fuels, inaccessible terrain and unfavorable weather conditions are hampering containment efforts. Numerous residences and two commercial properties are threatened. Reduction in acreage was

due to better mapping.

SPRING CREEK COMPLEX, White River National Forest. A Type 2 Incident Management Team (Sisk) is assigned. This complex consists of the Spring Creek and East Meadow fires which are burning in spruce, fir, aspen and brush eight miles north of New Castle, CO. Very active fire behavior with short range spotting and group tree torching was observed within the interior. Crews are building fireline and improving established line. Erratic winds, steep terrain and inaccessibility are hampering containment efforts.

GREEN CREEK, Routt National Forest. This fire is 15 miles southeast of Steamboat Springs, CO. Active torching and spotting fire behavior was observed on the north, east and south flanks in heavy dead and down spruce and fir. Personnel are constructing fireline on the southeast flank and aerial resources are suppressing spot fires on the west flank. Two thousand residences are threatened. Reduction in acreage was due to better mapping.

EAST MARBLE, Ute Mountain Agency, Bureau of Indian Affairs. This fire is 15 miles south of Cortez, CO in pinyon pine, juniper and sage. Smouldering and creeping fire behavior was observed. Engines are patrolling and mopping up.

LOST LAKE, Routt National Forest. A Fire Use Management Team (Cones) is assigned. This fire is 20 miles west of Yampa, CO. Moderate fire behavior with torching and creeping was observed in heavy dead and down spruce and fir. Personnel are preparing long range assessment and implementation plans. Reduction in acreage was due to better mapping.

HENSEL, Medicine Bow National Forest. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Moderate fire behavior with interior torching was observed. Cliffs, large boulders and extremely difficult terrain are hampering containment efforts. Engines are patrolling and aerial resources are suppressing hot spots in the Ashenfelder drainage.

BIG ELK, Arapaho-Roosevelt National Forest. A Type 2 Incident Management Team (Hartman) will assume command today. This fire is nine miles southeast of Estes Park, CO. Crowning and spotting was observed in brush and ponderosa pine. Steep and rocky terrain are impeding containment efforts. The Big Elk subdivision has been evacuated. Structure protection is in place.

CURRENT CREEK, Rocky Springs District, Bureau of Land Management. This fire is burning in juniper, sage and grass 26 miles south of Rock Springs, WY. No new information was reported.

WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

LOST CABIN, Humboldt-Toiyabe National Forest. A California Department of Forestry and Fire Protection Type 1 Incident Command Team (Maner) is assigned. A Type 1 Incident Management Team (Vail) has been ordered. This fire is 27 miles west of Las Vegas, NV. Precipitation resulted in minimal fire behavior observed in pinyon pine, juniper and sagebrush. Crews are constructing handline east of Lovell Canyon road and improving established fireline. CC Springs and Torino Ranch have been evacuated with 460 residences threatened; structure protection is in place.

GATE COMPLEX, Humboldt-Toiyabe National Forest. A Type 1 Incident Management Team (Lohrey) is assigned. The Buckeye fire is now being managed within this complex comprised of the Gate, Coleville and Slinkard fires and is five miles north of Walker, CA. Precipitation aided containment efforts in Jeffery pine, pinyon pine, juniper and sagebrush. Crews are constructing direct attack fireline and mopping up. Two hundred fifty residences and one hundred twenty-five outbuildings and commercial properties are threatened; engine crews are providing structure protection.

EAGLE, Ely Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Hefner) is assigned. This fire is 50 miles southeast of Ely, NV. Favorable weather conditions resulted in minimal fire activity in pinyon pine, juniper and sagebrush. The fire has crossed the Nevada-Utah border. Steep terrain, high winds and continuous fuels are impeding containment efforts. Crews made good progress constructing fireline on the north flank. Thirty-three residences and several structures are threatened. Reduction in acreage was due to better mapping.

ELLSWORTH, Humboldt-Toiyabe National Forest. This fire is 50 miles southeast of Fallon, NV. Significant runs were observed in pinyon pine, juniper and sagebrush. Crews and dozers have anchored and are building fireline. Aerial resources assisted protection efforts of the Ellsworth historical site.

PONY EXPRESS, Carson City Field Office, Bureau of Land Management. This fire is burning in sage, pinyon pine and juniper 40 miles east of Fallon, NV. Smouldering and creeping fire behavior was observed. Engine crews are mopping up.

TIN CANYON, Winemucca Field Office, Bureau of Land Management. This fire is burning in juniper, sage and grass and is 15 miles northwest of Gerlach, NV. Occasional torching and smouldering fire behavior was observed. Limited access and steep, rocky terrain are hampering containment efforts. Crews are constructing handline. Aerial resources are assisting suppression efforts.

NORTHERN ROCKIES AREA LARGE FIRES:

Priorities are being established by the Northern Rockies Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

BROAD, Yellowstone National Park. A Type 1 Incident Management Team (Frye) is assigned. This fire is burning in old growth lodgepole pine and Douglas fir 20 miles southeast of Mammoth, WY. Favorable weather conditions resulted in moderate fire behavior with creeping and occasional torching. Crews are spiked out and constructing handline on the east flank. Type 1 helitankers are being utilized on the west flank, holding the fire on the east side of the Yellowstone River. National Park Service facilities and commercial properties at Canyon Village are threatened.

FOX CREEK, Blackfeet Agency, Bureau of Indian Affairs. A Type 2 Incident Management (Kechter) is assigned. This fire is burning nine miles southeast of Babb, MT in subalpine fir,

lodgepole pine and spruce. Isolated torching and crowning fire behavior was observed. Dozers are constructing line on the south and east flanks and performing reconnaissance on the west flank. Aerial resources are assisting suppression efforts.

RED WAFFLE, Custer National Forest. A Type 2 Incident Management Team (Chrisman) is assigned. This fire is 35 miles southeast of Bridger, MT. Isolated torching and short range spotting were observed in ponderosa pine, brush and grass. Crews are burning out on the northeast flank and constructing indirect and direct attack fireline.

GOLDSTONE, Beaverhead-Deer Lodge National Forest. A Type 2 Incident Management Team (Sandman) is assigned. This fire is 30 miles west of Wisdom, MT on the Continental Divide. Group and individual tree torching was observed in subalpine fir. Crews are mopping up on the east flank.

WIGWAM COMPLEX, Beaverhead-Deer Lodge National Forest. This complex, comprised of seven fires, is 17 miles southwest of Ennis, MT. Minimal fire behavior was observed in dead and down lodgepole pine, spruce and subalpine fir. Crews are improving established fireline and mopping up.

SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

PEAK COMPLEX, Phoenix-Kingman District, Bureau of Land Management. A Type 1 Incident Management Team (Bennett) is assigned. This complex, comprised of the Peak, Lion Kill and Wildcow fires, is 12 miles southeast of Kingman, AZ in ponderosa pine, chaparral, pinyon pine and juniper. Smouldering fire behavior was observed on the Peak fire. Precipitation aided containment efforts. Crews are constructing handline, patrolling and cold trailing.

OUTLOOK:

The Northwest Area will have mostly sunny skies with scattered thunderstorms in eastern Oregon. High temperatures will be in the 60's along the coast and 75 to 85 west of the Cascade Mountains and in the 90's elsewhere. Minimum relative humidity will range from 10 to 25 percent in the east and 30 to 50 percent to the west. Winds will northwest at 5 to 15 mph west of the Cascade Mountains, west at 10 to 15 mph to the east and up slope up valley at 5 to 15 mph elsewhere.

The Eastern Great Basin Area can expect partly sunny skies with scattered showers and thunderstorms. High temperatures will be 75 to 85 in the mountains and 85 to 100 in the valleys. Minimum relative humidity will range from 20 to 35 percent in the mountains and 15 to 25 percent at lower elevations. Winds will be west at 5 to 15 mph.

High pressure over the Rocky Mountain Area will bring mostly sunny skies with isolated to widely scattered wet and dry thunderstorms. High temperatures will be in the 80's to low 90's. Minimum relative humidity will range from 20 to 35 percent in north central Wyoming and southwest Colorado and 8 to 20 percent elsewhere. Winds will be northwest at 10 to 20 mph in the Black Hills and 5 to 15 mph elsewhere.

The Western Great Basin Area can expect partly sunny skies with scattered thunderstorms. High temperatures will be a little below seasonal. Minimum relative humidity will range from the 13 to 29 percent. Winds will be light with gusts to 50 mph near thunderstorms.

A thermal trough in combination with moist subtropical air over the Northern Rockies Area will bring mostly sunny skies with scattered thunderstorms in eastern Montana. High temperatures will be 100 to 105 in northern Idaho and 85 to 95 elsewhere. Minimum relative humidity will range from 20 to 35 percent. Winds will be east at 5 to 10 mph.

Monsoonal moisture over the Southwest Area will bring partly sunny skies and scattered, wet thunderstorms. High temperatures will be in the 70's and 80's in the mountains and in the 90's and 100's at lower elevations. Minimum relative humidity will range from 15 to 30 percent at lower elevations and 25 to 50 percent elsewhere. Winds will be upslope, up valley at 5 to 15 mph with gusts near thunderstorms.

A trough of low pressure moving into the Northern California Area will bring mostly sunny skies and a chance of thunderstorms. High temperatures will be in the 60's along the coast and in the 80's to 90's inland. Minimum relative humidity will range from 15 to 22 percent. Winds will be southwest

to northwest at 6 to 17 mph.
