

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, AUGUST 6, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was light across the nation. Nationally, 184 new fires were reported. Four of these became large fires, two in the Alaska Area and one each in the Western Great Basin and Eastern Areas. Two large fires were contained, one each in the Northwest and Rocky Mountain Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Ribar) is assigned to manage large fires in southwestern Oregon and northern California.

FLORENCE, Siskiyou National Forest. Two Type 1 Incident Management Teams (Lohrey and Martin) are assigned. This fire is 26 miles southwest of Grants Pass, OR. Moderate fire behavior was observed in mixed conifer forest and brush. Indirect attack fireline construction tying in to the Sour Biscuit fire has been completed on the east flank; crews are improving the fireline in preparation for a burn out. The Illinois River Valley is under a 24 hour evacuation advisory; 3,619 residences and 250 commercial properties are threatened; structure protection is in place.

SOUR BISCUIT, Siskiyou and Six Rivers National Forests. Two Type 1 Incident Management Teams (Bennett and Lohrey) are assigned. This fire is burning on both sides of the California-Oregon border, 17 miles southwest of Cave Junction, OR. Low to moderate fire behavior was observed in mixed conifer forest and brush. Fireline construction, burn out operations and mop-up are underway.

TIMBERED ROCK, Southwest Oregon District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Thorpe) is assigned. This fire is 15 miles north of Shady Cove, OR. Minimal fire behavior was observed in old growth timber and heavy slash. A burn out operation was successfully completed on the west flank and crews are mopping up.

TILLER COMPLEX, Umpqua National Forest. A Type 1 Incident Management Team (Stutler) and US Army Task Force Destroyer (1st Battalion, 5th Field Artillery Regiment) commanded by Lt. Col. David R. Byrn Sr., at Ft. Riley, KS are assigned. A Type 1 Incident Management Team (Hart) has been ordered. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, 25 miles east of Canyonville, OR. Moderate fire behavior was observed in grass, brush and timber. Crews are building indirect

and direct fireline, burning out where appropriate, and scouting for new fire starts. Structure protection is in place in Ash Valley.

DEER POINT, Wenatchee National Forest. A Washington Interagency Incident Management Team (Furlong/Gormley) is assigned. This fire is seven miles northwest of Chelan, WA and is burning in sagebrush, ponderosa pine and lodgepole pine. Fire behavior included creeping and smouldering, with some group torching in unburned islands in the interior and in the Grade Creek drainage. Crews are burning out, mopping up and rehabilitating firelines.

MONUMENT, Malheur National Forest. A Type 2 Incident Management Team (Morcom) is assigned. This fire is nine miles southwest of Unity, OR. Minimal fire activity was observed in mixed conifer forest, ponderosa pine and sagebrush. Crews are mopping up and rehabilitating firelines.

FRF = Fremont National Forest

SOUTHERN CALIFORNIA AREA LARGE FIRES:

PINES, San Diego Unit, California Department of Forestry and Fire Protection (CDF). A CDF Type 1 Incident Command Team (Ristow) is assigned. This fire is burning one half mile southeast of Julian, CA in chaparral and bug kill timber. Extreme fire behavior with long range spotting and fire whirls was observed as the fire made a run to the northeast onto the Los Coyotes Indian Reservation. Crews and dozers are building fireline with support from aerial resources. A Boy Scout camp in Lost Valley and the Los Coyotes Indian Reservation were evacuated yesterday. Residents of the Ranchita subdivision and homes near the northeast perimeter of the fire remain evacuated; structure protection is in place.

MCNALLY, Sequoia National Forest. A Type 1 Incident Management Team (Studebaker) is assigned. This fire is burning in heavy brush and mixed conifer forest, nine miles north of Kernville, CA. The fire has advanced into the Golden Trout Wilderness Area and is burning on both sides of the Kern River. Twelve residences remain threatened; structure protection is in place.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

KING HILL, Payette National Forest. A Type 2 Incident Management Team (Suwyn) will assume command of the fire today. This fire is burning in grass and sagebrush, five miles southeast of Indian Valley, ID. No further information was reported.

GARDEN VALLEY COMPLEX, Boise National Forest. A transfer of command from Brunner's Type 2 Incident Management Team to Murphy's Type 2 Incident Management Team will occur today. This complex consists of 23 fires northeast of Garden Valley, ID. Smouldering, creeping and intermittent torching fire activity was observed in sagebrush, lodgepole pine and subalpine fir. Crews made good progress constructing fireline and mopping up.

HORSE BUTTE, Upper Snake River District, Southern Idaho Area, Bureau of Land Management. This fire is 14 miles east of Burley, ID. Running and torching fire behavior was observed in grass, brush, juniper and pinyon pine. Engine crews and dozers are building fireline with support from aerial resources.

CATHEDRAL ROCK, Salmon-Challis National Forest. A Type 2 Incident Management Team (Saleen) is assigned. This fire is burning on both sides of the Continental Divide, 35 miles north-northwest of Salmon, ID. Isolated torching, creeping and smouldering fire activity was observed in lodgepole pine, spruce and fir. Crews made good progress constructing direct attack handline with support from aerial resources. Personnel scouted and secured numerous spot fires.

SEQUOIA, Dixie National Forest. This fire is 26 miles southwest of Cedar City, UT. Low to moderate fire behavior was observed in chaparral and ponderosa pine. Crews are gridding for hot spots and monitoring inaccessible areas.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

ALASKA AREA LARGE FIRES:

Priorities are being established by the Alaska Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

KETCHUM CREEK, Upper Yukon Zone, Bureau of Land Management. A Type 2 Incident Management Team (McKnight) is assigned. This fire is three miles northeast of Circle Hot Springs, AK. Moderate fire behavior was observed in black spruce, taiga and hardwood forest. Smokejumpers and a crew are securing the southwest perimeter and mopping up.

NORTH FORK, Southwest Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This fire is two miles north-northwest of Medfra, AK. The fire is burning in black spruce, muskeg and hardwood forest. Crews are building indirect attack fireline northeast from the north fork of the Kuskokwim River. An evacuation plan has been completed for the community of Medfra; structure protection is in place. Heavy smoke impeded aerial operations.

GESKAMINA LAKE, Tanana Zone, Bureau of Land Management. This fire is 70 miles west of Fairbanks, AK near the community of Lake Minchumina. A significant run to the southeast was observed in black spruce, taiga, muskeg and hardwood forest. Heavy smoke is hampering accurate fire mapping and limiting aerial operations. Personnel successfully burned out around threatened structures at West Twin Lake. Structure protection is in place along the Kantishna River.

MINCHUMINA GROUP, Tanana Zone, Bureau of Land Management. This group of fires, consisting of the Sischu, John Hansen Lake, John Hansen Creek and Moose Lake fires, is northwest of Lake Minchumina, AK. Active fire behavior was observed as the fire moved east-southeast in black spruce, taiga, muskeg and hardwood forest. Personnel are providing structure protection to threatened cabins along the northwest and north sides of Lake Minchumina.

KOCACHO #2, Upper Yukon Zone, Bureau of Land Management. This fire is 20 miles northeast of Venetie, AK. Running and torching were observed in black spruce and tussock tundra. Smokejumpers are burning out around cabins on the southwest flank.

GOBLET CREEK, Galena Zone, Bureau of Land Management. This fire is eight miles west of Grayling, AK. Observed fire behavior included occasional torching and short runs in black spruce. Crews are making good progress constructing fireline and mopping up spot fires on the north and west flanks. Structure protection is in place for a cabin and commercial property.

WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

ASH, Ely Field Office, Bureau of Land Management. This fire is nine miles southeast of Caliente, NV. Running, torching and crowning were observed in sagebrush, pinyon pine and juniper.

BUSTER, Ely Field Office, Bureau of Land Management. This fire is burning 15 miles northeast of Pioche, NV in sagebrush, pinyon pine and juniper. Crews are making good progress mopping up.

ROCKY MOUNTAIN AREA LARGE FIRES:

TOLLMAN, Niobrara County. This fire is burning in grass, sagebrush and ponderosa pine on both sides of the Wyoming-Nebraska border, 18 miles northeast of Lusk, WY. Minimal fire activity was observed due to precipitation. Crews made good progress constructing fireline. Seven residences and associated outbuildings are threatened; structure protection is in place.

MB1F = Medicine Bow National Forest

SOUTHERN AREA LARGE FIRES:

CHOCOLATE BAYOU, Brazoria National Wildlife Refuge. This fire is 40 miles south of Houston, TX. Running and spotting fire activity was observed in grass and brush. Dozers are building fireline and engine crews are burning out.

PARCHED CORN BAY, Alligator River National Wildlife Refuge. This fire is four miles south of Stumpy Point, NC. Moderate fire behavior was observed in scrub pine, pocosin and marsh grass. Engine crews and dozers are suppressing spot fires and sloopers on the west flank. Due to heavy smoke, Highway 264 is open during daylight hours only.

SAMPSON, Cherokee National Forest. This fire is burning seven miles southwest of Erwin, TN in bug kill timber and hardwood litter. Personnel are improving handline and mopping up.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

OUTLOOK:

*****A RED FLAG WARNING HAS BEEN POSTED IN NORTHEAST INTERIOR ALASKA FOR DRY THUNDERSTORMS*****

*****A RED FLAG WARNING HAS BEEN POSTED FOR THE SEWARD PENINSULA IN WESTERN ALASKA FOR STRONG NORTH WINDS AND LOW RELATIVE HUMIDITY*****

A low pressure system lingering over the Northwest Area will bring partly to mostly cloudy skies with isolated showers and thunderstorms. High temperatures will be 53 to 70 in the mountains and 65 to 83 at lower elevations. Minimum relative humidity will range from 12 to 22 percent in southeast Oregon and above 25 percent elsewhere. Winds will be west to north at 5 to 15 mph with gusts to 25 mph in some areas.

The Southern California Area can expect sunny skies with morning low clouds and fog along the coast and in the coastal valleys. High temperatures will be upper 60's to mid 70's near the coast, in the 70's to mid 90's in the mountains and inland valleys, and in the 90's to 110 in the deserts. Minimum relative humidity will range from 8 to 25 percent in the mountains and deserts, 15 to 30 percent inland, and above 40 percent in coastal areas. Winds will be onshore at 7 to 15 mph along the coast and southwest to west at 10 to 20 mph elsewhere.

A southwest flow over the Eastern Great Basin Area will bring mostly sunny skies with isolated to widely scattered afternoon thunderstorms in the mountains. High temperatures will be 70 to 85 in southern Idaho and 85 to 100 in Utah. Minimum relative humidity will range from 6 to 22 percent in Idaho and 15 to 35 percent in Wyoming and eastern Utah. Winds will be southwest at 10 to 20 mph with gusts to 35 mph at higher elevations.

The Alaska Area can expect partly cloudy skies with scattered showers in the eastern interior, south of the Alaska Range and in the southwest portion of the state. Mostly sunny skies are forecast elsewhere. High temperatures will be in the 60's to low 70's. Minimum relative humidity will range from 30 to 43 percent and winds will be north to northwest at 10 to 20 mph.

The Western Great Basin Area can expect partly sunny skies. High temperatures will be near 100 in the south and in the 80's elsewhere. Minimum relative humidity will range from the single digits to teens and winds will be west to northwest at 10 to 20 mph.

Monsoonal moisture moving into the Rocky Mountain Area will bring partly sunny skies with isolated to scattered wet thunderstorm activity in Colorado and eastern Wyoming. High temperatures will be in the 60's and 70's in the mountains and mid 80's to low 90's at lower elevations. Minimum relative humidity will range from 20 to 30 percent at lower elevations and 28 to 38 percent in the mountains. Winds will be southwest at 10 to 20 mph with gusts to 30 mph in western Wyoming, and variable at 10 to 20 mph elsewhere.

A weakening cold front moving south across the Appalachian Mountains will bring scattered showers to the central portion of the Southern Area and remnants of tropical storm Bertha will bring showers to the lower Mississippi River Valley region. A slight chance of thunderstorms are forecast in southern Florida with mostly sunny skies predicted elsewhere. High temperatures will be in the 80's and 90's and minimum relative humidity will generally be above 40 percent. Winds will be variable to 12 mph.

A frontal boundary across the southern Great Lakes region will move southeast, producing showers and thunderstorms in the Eastern Area. Very warm and humid conditions will prevail ahead of the front. Behind the front, surface high pressure will move into the area from the northwest, moderating temperatures and relative humidity levels through mid week.

www.nifc.gov/sixminutes/index_j.asp

FREQUENT SPOT FIRES ACROSS THE LINE

There are few Watchout Situations that state more clearly how much potential your fire has for rapid, uncontrolled growth. Consider the following questions if frequent spot fires are crossing the line:

Can you handle increased spotting? List some ways you can keep ahead of spot fires (gridding the green, lookouts, etc.)

Do you have a plan for long range spotting? In what fuel type and under what conditions will you likely have long range spotting? What types of plans can you think of for handling long range spotting?

Is help available if necessary? What kinds of resources will you have in place or order to handle spot fires?

If fire behavior increases, is your position still defensible? Discuss what type of action you might take if a spot fire takes off.

Do you have more than one safety zone in case one gets cut off? Describe how you might have multiple safety zones.

Do the primary lookouts have a good view of the situation? Discuss who might be acting as a lookout (e.g., crew member, air resources, etc.) and how you will get good information from that person. (Are you relying on an air attack who is busy with air tankers?)

Is the primary burning period ending? Talk about how your tactics may vary from finding spot fires early in the day to later into the evening. Review Probability of Ignition (PIG) and what it can tell you about spotting potential.

To reduce the risk, be ready to retreat. Keep your guard up even if spotting has not occurred for a few hours. Review fires where you have had frequent spot fires and what you learned about controlling them.
