

**INCIDENT MANAGEMENT SITUATION REPORT  
THURSDAY, AUGUST 15, 2002 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 4**

**CURRENT SITUATION:**

Initial attack activity was light across the nation. Nationally, 224 new fires were reported. Eight of these became large fires, three in the Eastern Great Basin Area, two in the Northwest Area, and one each in the Northern California, Southwest and Eastern Areas. Two large fires were contained, one each in the Rocky Mountain and Eastern Great Basin Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Massachusetts, Montana, Nebraska, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming.

**NORTHWEST AREA LARGE FIRES:**

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage large fires in southwest Oregon and northern California. The Oregon State Fire Marshall's Office is assisting the Area Command Team with contingency planning.

BISCUIT, Siskiyou and Six Rivers National Forests. A Unified Command between three Type 1 Incident Management Teams (Bateman, Martin, Frye), a Type 2 Incident Management Team (Bright), and the Oregon Department of Forestry (Sifford, Spichart, Oman) is in place. The fire is burning on both sides of the California-Oregon border in mixed conifer forest and brush, 26 miles southwest of Grants Pass, OR. Fire behavior was moderate to extreme on the northwest flank, active in Indigo Creek on the north perimeter, moderate on the east and west flanks, and low on the south flank. Crews are constructing direct and indirect attack fireline and burning out in Oregon on the north, east and west flanks. In California, crews are patrolling and mopping up the south flank. The Illinois River Valley, the Pistol River drainage, Agness and areas southwest of Quail Prairie remain under an evacuation advisory; structure protection is in place. Cave Junction, Brookings, Kerby, Selma, Agness, Gardner Ranch and McCaleb Ranch are threatened.

TILLER COMPLEX, Umpqua National Forest. A Type 1 Incident Management Team (Hart) and US Army Task Force Destroyer (1<sup>st</sup> Battalion, 5<sup>th</sup> Field Artillery Regiment) commanded by Lt. Col. David R. Byrn Sr., at Ft. Riley, KS are assigned. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, 25 miles east of Canyonville, OR. Short crown runs, torching and spotting were observed in grass, brush and timber. Crews are building indirect and direct attack fireline and conducting burn out operations. Structure protection is in place in Ash Valley.

HEMLOCK, Willamette National Forest. A Type 2 Incident Management Team (Gardner) is assigned. This fire is one half mile north of West Fir, OR. Minimal fire behavior was observed in timber and brush. Crews made good progress mopping up on all divisions.

DEER POINT, Wenatchee National Forest. This fire is burning seven miles northwest of Chelan, WA in sagebrush, ponderosa pine and lodgepole pine. Increased torching and running were observed in the Grade Creek drainage and in unburned interior islands. Crews are burning out the higher elevations of the Grade Creek drainage and mopping up other divisions.

MONUMENT-MALHEUR COMPLEX, Malheur National Forest. A Type 2 Incident Management Team (Swope) is assigned. This complex is southwest of Unity, OR. Minimal fire activity was observed in mixed conifer forest, ponderosa pine and sagebrush. Crews are mopping up, rehabilitating firelines and patrolling.

MT. MARION, Willamette National Forest. A Type 2 Incident Management Team (Jackson) has been ordered. This fire is in the Mt. Jefferson Wilderness Area, 14 miles southeast of Idanha, OR. Extreme fire behavior with torching, spotting and crowning was observed in mountain hemlock, subalpine fir and brush. Smokejumpers are scouting for escape routes, safety zones and anchor points.

EAST ANTELOPE, Southwest Oregon District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Keith) is assigned. This fire is seven miles northeast of Ashland, OR. Extreme fire behavior with spotting up to three quarter mile ahead of the front was observed in oak, timber and brush. Crews and dozers are constructing fireline. Steep, rugged terrain and heavy smoke are impeding containment efforts.

**SOUTHERN CALIFORNIA AREA LARGE FIRES:**

MCNALLY, Sequoia and Inyo National Forests. A Type 1 Incident Management Team (Studebaker) is assigned. This fire is burning in heavy brush and mixed conifer forest, nine miles north of Kernville, CA. Short runs and minor torching were observed in the Nine Mile Creek and Cold Creek drainages. Burn out operations were successfully completed on a portion of the east flank. Crews are constructing indirect attack fireline and burning out from Osa Meadow to Kingfisher Ridge. Good progress was made mopping up portions of the west flank near Hockett Peak.

### EASTERN GREAT BASIN AREA LARGE FIRES:

LITTLE HORSE, Salmon-Challis National Forest. A Type 2 Incident Management Team (Saleen) has been ordered. This fire is 30 miles northwest of Salmon, ID. Extreme fire behavior with spotting up to three quarter mile ahead of the front was observed in subalpine fir, spruce and lodgepole pine. Heavy fuel loading, very steep terrain and unfavorable winds are hampering containment efforts. Structure protection is in place at Gattin Ranch.

LITTLE SOLDIER, Salmon-Challis National Forest. This fire is 36 miles west of Challis, ID. Moderate fire behavior was observed in subalpine fir and heavy downed timber. Personnel are providing structure protection for a commercial property, a US Forest Service Guard Station and lookout towers.

BROWNIE, Ashley National Forest. This fire is 22 miles northwest of Vernal, UT. Minimal fire behavior observed in bug kill lodgepole pine. Crews are mopping up.

SEQUOIA, Dixie National Forest. This fire is burning 26 miles southwest of Cedar City, UT in mixed conifer forest and brush. Crews are patrolling and monitoring the west flank.

DIVIDE, Bridger-Teton National Forest. This lightning-caused Wildland Fire Use Incident is nine miles east of Pinedale, WY. The fire is burning in the Bridger Wilderness Area and is being managed for resource benefit. This will be the last report unless significant activity occurs.

**ROCKY MOUNTAIN AREA LARGE FIRES:**

BURN RIDGE, Routt National Forest. A Fire Use Management Team has been ordered. This fire is burning in the Mt. Zirkel Wilderness Area, 25 miles north of Steamboat Springs, CO. Extreme fire behavior with torching, crowning and spotting was observed in aspen, fir and spruce. Very steep terrain, gusty winds and heavy fuel loading are hampering confinement efforts.

BIG FISH, White River National Forest. A Fire Use Management Team (Cook) has been ordered. This lightning-caused Wildland Fire Use Incident was previously reported as part of the Lost Green Complex. The fire is 34 miles southwest of Steamboat Springs, CO and is being managed for resource benefit. Torching, spotting and short upslope runs to the north and west were observed in spruce, fir and aspen.

Southern Ute Agency, Bureau of Indian Affairs

**ALASKA AREA LARGE FIRES:**

GESKAKMINA LAKE, Tanana Zone, Bureau of Land Management. A Type 2 Incident Management Team (Wilcock) is assigned. This fire is 70 miles west of Fairbanks, AK. Observed fire behavior included creeping, smouldering and torching in black spruce, muskeg and hardwood forest. Crews are mopping up around structures along the Kantishna River and at West Twin Lake, Kindanina Lake and Mucha Lake.

REINDEER, Southwest Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) has been ordered. This fire is 29 miles northeast of Holycross, AK. Running, crowning and torching were observed in black spruce, tussock tundra and hardwood forest. The fire has crossed Reindeer River on the southeast flank. Crews are providing structure protection on the southwest flank.

## OUTLOOK:

High pressure over the Northwest Area will bring sunny skies. High temperatures will be in the 70's along the Canadian border, in the 80's in the remainder of Washington, in the 90's in Oregon and near 100 in the valleys of southwestern Oregon. Minimum relative humidity will be near 40 percent in western Washington and 10 to 20 percent elsewhere. Winds will be west, gusting to 30 mph in the Columbia River Gorge and over the east slopes of the Cascade Mountains in Washington.

A high pressure system over the Southern California Area will bring sunny skies with morning low clouds and fog along the coast. High temperatures will be in the 70's to low 80's near the coast, in the 80's to 100 in the mountains and inland valleys, and 98 to 115 in the deserts. Minimum relative humidity will range from 5 to 18 percent in the mountains and deserts, 15 to 25 percent in the inland valleys, 20 to 35 percent in the coastal valleys, and above 50 along the coast. Winds will be southwest to northwest at 15 to 25 mph in the deserts of Los Angeles and Kern Counties, on shore at 6 to 12 mph near the coast, and west to north at 10 to 20 mph in the mountains.

High pressure over the Northern California Area will bring sunny skies with fog and low clouds along the coast and afternoon cumulus build up over the Sierra Nevada Mountains. High temperatures will be in the 60's and 70's along the coast and in the 80's to 104 inland. Minimum relative humidity will range from 8 to 14 percent east of the Sierra Nevada Mountains. Poor overnight relative humidity recovery is forecast over the mid and upper slopes of the northern and eastern mountains with slightly better recoveries in the Sacramento Valley. Winds will be southwest to northwest at 5 to 10 mph.

A dry, northwest flow over the Rocky Mountain Area will bring sunny skies. High temperatures will be in the 70's and 80's in the mountains and in the 80's to low 90's at lower elevations. Minimum relative humidity will range from 8 to 16 percent in western Colorado and southwest Wyoming, 10 to 25 percent in the mountains, and 20 to 32 percent in northern Wyoming and the Black Hills. Winds will be northeast at 5 to 15 mph along the east slopes of the Rocky Mountains in Colorado, northwest with gusts to 30 mph in the southern Wyoming and northern Colorado mountains, and variable at 5 to 15 mph in the remainder of the area.

The Eastern Great Basin Area can expect mostly sunny skies. High temperatures will be 72 to 92 in Idaho and Wyoming and 90 to 107 in Utah. Minimum relative humidity will range from 12 to 25 percent in eastern Idaho and western Wyoming and 4 to 18 percent elsewhere. Winds will be variable at 5 to 15 mph in Utah and northwest at 10 to 20 mph in the remainder of the area.

Partly to mostly cloudy skies are forecast for the Alaska Area. High temperatures will be upper 50's to 60's. Minimum relative humidity will be in the upper 20 percent range in the western interior and in the 30 and 40 percent range in the east. Winds will be west to southwest at 10 to 20 mph.

### NFDRS POCKET CARDS

An aid to identifying local fuels conditions that might contribute to severe fire behavior is the NFDRS Pocket Card. The Pocket Card displays a general assessment of the fire potential compared to local fire occurrence and historical fire danger. It is a tool that can be used to track daily outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season for a local area. The Pocket Card provides:

- A general indicator of the potential for extreme fire behavior and difficulty of control.
- A graph to show the trend and status of the current year's fire season.
- A comparison of current year's conditions to historical worst and average conditions.
- Fire danger values related to past large fires.
- Locally significant values for temperature, humidity, wind speed, and more.

Discuss the following ways to use the Pocket Card:

- Use it primarily before fires occur, before arriving to a fire, and during initial stages of fire events, such as initial fire size-up, initial attack, and extended attack.
- Use the Pocket Card to track local fire danger and in so doing increase the safety of your firefighters through increased awareness of fire danger conditions. NOTE: If fire danger is running at or above seasonal highs, be alert to those weather conditions that can lead to extreme fire behavior; e.g., low RH, 1-hour fuel moisture less than 5%, high temperatures, moderate to high winds.
- Use it to track daily fire dangers so that there are no surprises when extreme fire behavior occurs.
- Use it to supplement local experience.
- Use the Pocket Card as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive your fire assignment outside your local area, visit the National Pocket Card website at <http://famweb.nwcg.gov/pocketcards/>. Click on the map and locate a Pocket Card for the area to which you are going.
- Put the Card in the Pocket of all your firefighters and keep a copy in your fire vehicle.
- Post the card in dispatch. Use them in briefings. Provide them to incoming crews.
- Do not use the PocketCard for site specific fire behavior predictions and fireline actions.
