**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, AUGUST 21, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was moderate in the Eastern Great Basin and Rocky Mountain Areas, light elsewhere. Nationally, 209 new fires were reported. Five of these became large fires, two each in the Northern Rockies and the Southwest Areas, and one in the Southern California Area. Three large fires were contained, one each in the Northwest, Eastern Great Basin and Southern California Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Massachusetts, Montana, Nebraska, New Mexico, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage large fires in southwest Oregon, and another Area Command Team (Williams-Rhodes) has been ordered. An Area Command Team (Chesley) is assigned to manage large fires on the Umpqua National Forest. The Oregon State Fire Marshall's Office is assisting the Area Command Teams with contingency planning.

BISCUIT, Siskiyou and Six Rivers National Forests. A Unified Command between three Type 1 Incident Management Teams (Bateman, Frye, Vail) and the Oregon Department of Forestry is in place. The fire is burning in mixed conifer forest and brush, 26 miles southwest of Grants Pass, OR. Active fire behavior with torching, short crown runs and spotting was observed. Crews are constructing fireline, burning out and patrolling. Evacuations are in place for residents on Spud Road and in the Oak Flats area south of Agness. Residents in the upper Pistol River drainage and Agness remain under an evacuation advisory. Galice, Agness and adjacent areas are threatened; structure protection is in place.

APPLE, Umpqua National Forest. A Type 2 Incident Management Team (Carlson) is assigned. This fire is 21 miles east of Glide, OR in heavy timber. Lower temperatures, precipitation and higher relative humidity moderated fire behavior. Crews are constructing indirect fireline. Twenty homes and several outbuildings are threatened. Local road closures are in effect.

TILLER COMPLEX, Umpqua National Forest. A Unified Command between two Type 1 Incident Management Teams (Hart/Melton) and the Oregon Department of Forestry is in place. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, 25 miles east of Canyonville, OR. Short crown runs, individual tree torching and mid range spotting were observed in grass, brush and timber. Crews are building indirect and direct attack fireline, burning out and mopping up. Sixty-seven homes are threatened; structure protection is in place.

SPOKANE COMPLEX, Northeast, Washington State. A Washington Interagency Incident Management Team (Jennings/Perry) is assigned. This complex is 45 miles west and 25 miles north of Spokane, WA and consists of the Spring Creek, Cooper and Nicholson fires. No new information was reported.

SIUSLAW RIVER FIRE, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Mair) is assigned. This fire is burning 18 miles west of Veneta, OR in Douglas fir, brush and untreated slash. Minimal fire behavior with creeping and smouldering was observed. Crews are constructing fireline, improving established fireline and mopping up.

FERRY COMPLEX, Northeast Washington State. A Washington Interagency Incident Management Team (Dunton/Holloway) is assigned. This complex, comprised of Malo, Curlew and East Lake fires, is between Curlew, WA and Curlew Lake. Crews are mopping up and rehabilitating fireline. Reduction in acreage is due to more accurate mapping.

DEER POINT, Wenatchee National Forest. A Washington Interagency Incident Management Team (Furlong/Gormley) is assigned. The fire is burning seven miles northwest of Chelan, WA in sagebrush, ponderosa pine and lodgepole pine. Torching, short runs, creeping and smouldering were observed in unburned islands in the interior and in the Grade Creek drainage. Steep, rugged terrain is hampering containment efforts.

QUARTZ MT. COMPLEX, Okanogan National Forest. A Washington Interagency Incident Management Team (Johnson/Barnett) is assigned. A Fire Use Management Team (Cones) has been ordered. This complex is located in the Pasayten Wilderness area northwest of Winthrop, WA. No new information was reported.

LAVA, Lakeview District, Bureau of Land Management. This fire, which started on July 13th and was previously reported as part of the Toolbox Complex, is 15 miles north and northwest of Christmas Valley, OR. Active fire behavior with torching was observed in juniper, sage and grass. Personnel are improving established fireline and mopping up. Limited access and difficult terrain continue to impeded containment efforts.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

BATTLE CREEK, Black Hills National Forest. A Type 1 Incident Management Team (Wood) is assigned. This fire is ten miles southwest of Rapid City, SD in ponderosa pine and grass. Fire behavior was moderate due to increased relative humidity. Crews are burning out and constructing fireline with assistance from dozers. A pre-evacuation notice was issued to Keystone. Hayward, Mount Rushmore estates and Rockerville remain evacuated; structure protection is in place.

MT. ZIRKEL COMPLEX, Routt National Forest. A Type 1 Incident Management Team (Gelobter) is assigned. This complex, previously reported as the Burn Ridge and Hinman fires, is 25 miles north of Steamboat Springs, CO. Light rain moderated fire behavior in heavy dead and down spruce, lodgepole pine and fir. Crews are preparing for burn out operations on the west flank. Thirty homes are threatened; structure protection is in place.

GREEN CREEK, Routt National Forest. A Type 2 Incident Management Team (Hartman) will assume command today. This previously reported fire, which began on July 14th, is 15 miles southeast of Steamboat Springs, CO. Precipitation and higher relative humidity resulted in minimal fire activity in spruce, fir and lodgepole pine. Crews and dozers are constructing fireline. Thirteen homes and numerous outbuildings at Lake Agnes are threatened; structure protection is in place.

BIG FISH, White River National Forest. A Fire Use Management Team (Cook) is assigned. The Team is also managing the Lost Lakes fire. This lightning-caused Wildland Fire Use Incident, which started on July 19th, is 34 miles southwest of Steamboat Springs, CO. The fire is being managed for resource benefit and a confinement strategy is in place. Smouldering was observed in heavy dead and down spruce, fir and aspen. Structure protection is in place at the Rio Blanco Guest Ranch.

SHAFF #2, San Juan National Forest. This fire is four miles north of Cascade, CO. Observed fire behavior included smouldering and creeping in mixed conifer forest. Crews are building direct attack fireline with support from aerial resources. Steep, rocky terrain is hampering containment efforts. Five outbuildings remain threatened. No significant changes occurred.

LOST LAKES, Routt National Forest. A Fire Use Management Team (Cook) is assigned. This fire is 20 miles west of Yampa, CO. The fire is being managed for resource benefit and is in monitor status. Minimal fire activity with smouldering was observed in bug kill spruce and fir. Reduction in acreage is due to more accurate mapping.

NORTHERN ROCKIES AREA LARGE FIRES:

KELLY CREEK, Nez Perce National Forest. A Type 2 Incident Management Team (Kechter) is assigned. This fire is burning 11 miles east of Riggins, ID in ponderosa pine, Douglas fir and sage brush. Active fire behavior was observed. Crews are building fireline on the west flank. Steep terrain and limited access are hampering containment efforts. Two residences are threatened, structure protection is in place.

HOPE 44, Pend Oreille Area Office, Idaho Department of Lands. A Type 2 Incident Management Team (Chrisman) is assigned. This fire is six miles northwest of the town of Hope, ID. Active fire activity was observed in ponderosa pine, grass and logging slash. Crews are constructing fireline and mopping up. Twenty-four residences and several outbuildings are threatened; structure protection is in place.

SHEEP CREEK, Beaverhead-Deerlodge National Forest. A Type 2 Incident Management Team (Benes) is assigned. This fire is 16 miles west of Wisdom, MT. Group and isolated torching were observed in heavy dead and down lodgepole pine. Crews are constructing fireline, improving established fireline and preparing for burnout operations. Four residences are threatened.

PHLOX, Yellowstone National Park. This lightning-caused Wildland Fire Use Incident, which started on August 10th, is 25 miles south-southeast of Lake Junction, WY. The fire is being managed for resource benefit and is in monitor status. This will be the last report unless significant activity occurs.

ARLINGTON, Nez Perce National Forest. This lightning-caused Wildland Fire Use Incident, which started on August 4th, is 35 miles southwest of Elk City, ID burning in mixed conifer and grass. This fire is being managed for resource benefit and is in monitor status. This will be the last report unless significant activity occurs.

BUCK LAKE, Nez Perce National Forest. This lightning-caused Wildland Fire Use Incident, which started August 4th, is 24 miles northeast of Elk City, ID burning in subalpine fir, lodgepole pine and whitebark pine. This fire is being managed for resource benefit and is in monitor status. This will be the last report unless significant activity occurs.

EASTERN GREAT BASIN AREA LARGE FIRES:

GARDER FIRE, Vernal Field Office, Bureau of Land Management. A transfer of command to a Type 2 Incident Management Team (Brunner) will occur at 0600 MDT. This fire is 21 miles southwest of Duchesne, UT in lodgepole pine, aspen and Douglas fir. Lower temperatures and higher relative humidity moderated fire behavior with isolated torching observed. Crews are constructing direct attack fireline. Five residences are threatened in the Argyle Canyon, structure protection is in place.

EAGLE SPRINGS, Sawtooth National Forest. This fire is 29 miles south of Twin Falls, ID, burning in lodgepole pine, grass and sagebrush. Torching and creeping were observed. Crews are constructing direct attack fireline. Nine residences and two outbuildings are threatened. Reduction in acreage is due to more accurate mapping.

LITTLE HORSE, Salmon-Challis National Forest. A Fire Use Management Team (Zimmerman) is assigned. The Fire Use Management Team will also be managing the Parker Mountain fire. This fire is 30 miles northwest of Salmon, ID. Very active torching, crown runs and spotting were observed in subalpine fir, spruce and lodgepole pine. Structure protection is in place at Gattin Ranch.

LITTLE SOLDIER, Salmon-Challis National Forest. This fire is 36 miles west of Challis, ID. Precipitation and higher relative humidity resulted in minimal fire activity in subalpine fir and heavy dead and down timber. One commercial property and several outbuildings are threatened; structure protection is in place.

PARKER MOUNTAIN, Salmon-Challis National Forest. A Fire Use Management Team (Zimmerman) is assigned. This previously reported Wildland Fire Use Incident, which began on August 4th, is 45 miles west-northwest of the town of Salmon, ID. Minimal fire behavior was observed. This fire is in monitor status.

DIVIDE, Bridger-Teton National Forest. This lightning-caused Wildland Fire Use Incident, which started on August 4th, is nine miles east of Pinedale, WY. The fire is burning in the Bridger Wilderness Area and is being managed for resource benefit. This will be the last report unless significant activity occurs.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

MCNALLY, Sequoia and Inyo National Forests. A Type 1 Incident Management Team (Raley) is assigned. This fire is burning in heavy brush and mixed conifer forest, nine miles north of Kernville, CA. Active fire behavior with isolated torching was observed. Crews are constructing direct attack fireline on the north, northeast and west flanks. Crews are mopping up and rehabilitating fireline on the south and west flanks. Twelve residences are threatened.

LPF = Los Padres National Forest

NORTHERN CALIFORNIA AREA LARGE FIRES:

SHOWERS, Tahoe Basin Management Unit. A Type 2 Incident Management Team (Terwilliger) is assigned. This fire is burning south of the town of Meyers, CA in mixed conifer and heavy brush. Minimal fire behavior with creeping was observed. Difficult terrain and inaccessibility are hampering containment efforts. Crews are improving established fireline and mopping up.

SHAMROCK, Mendocino Unit, California Department of Forestry and Fire Protection. This fire is 7 miles south of Laytonville, CA burning in timber and grass. Strong winds caused medium range spotting. Crews are building direct and indirect attack fireline and improving established fireline. Thirty-five residences and numerous outbuildings are threatened, and structure protection is in place.

SOUTHWEST AREA LARGE FIRES:

PACK RAT, Coconino National Forest. This fire is eight miles east of Pine, AZ. Minimal fire behavior was observed in mixed conifer forest and chaparral. Crews are preparing for burn out operations and constructing direct and indirect attack fireline. Very steep and inaccessible terrain is impeding containment efforts.

WATER, Gila National Forest. This fire is burning in pinyon pine, juniper and grass. Favorable weather conditions with higher relative humidity resulted in minimal fire behavior with creeping observed. This fire is being mapped and is in monitor status.

CASTLE, Gila National Forest. This fire is burning in pinyon pine, juniper and grass. Higher relative humidity resulted in minimal fire activity. This fire is being mapped and is in monitor status.

ALASKA AREA LARGE FIRES:

REINDEER, Southwest Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This fire is 29 miles northeast of Holycross, AK in black spruce, tussock tundra and hardwood forest. Increased relative humidity resulted in minimal fire activity with creeping and smouldering observed. One commercial property and nine outbuildings are threatened. Crews are providing structure protection.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
REINDEER	AK	SWS	227,500	0	UNK	67	2	0	2	0	747K

OUTLOOK:

Low pressure over the Northwest Area will bring higher relative humidity, scattered showers and thunderstorms. High temperatures will be in the 60's and 70's in the mountains, and 80's in the valleys. Minimum relative humidity will be above 45 percent in western Washington and western Oregon, and 20 to 40 percent elsewhere. Winds will be west to northwest and light, with gusts to 25 mph at higher elevations east of the Cascade Mountains.

The Rocky Mountain Area can expect scattered wet thunderstorms in northern Wyoming and western South Dakota, with isolated thunderstorms elsewhere. High temperatures will be in the 70's in the mountains and in the 70's to low 90's at lower elevations. Minimum relative humidity will range from 30 to 40 percent in northern Wyoming and South Dakota, 20 to 30 percent in the mountains, and 14 to 22 percent elsewhere. Winds will be west at 10 to 20 mph in western Colorado and southern Wyoming and northerly at 8 to 16 mph elsewhere.

Unstable moisture over the Northern Rockies Area will bring mostly cloudy skies with scattered showers and thunderstorms. High temperatures will be in the 70's and 80's and minimum relative humidity will be 25 to 40 percent. Winds will be east and south to west at 15 mph.

The Eastern Great Basin Area can expect partly cloudy skies with widely scattered wet and dry thunderstorms. High temperatures will be 70's to mid 80's in the mountains and 90 to 105 in the valleys. Minimum relative humidity will range from 9 to 19 percent in the valleys and 18 to 30 percent at higher elevations. Winds will be southwest at 10 to 20 mph with gusts to 45 mph possible.

The Southern California Area can expect sunny skies with low clouds near the coast. High temperatures will be 60's to 70's along the coast, mid 70's to upper 80's in the mountains and 90's to 105 in the deserts. Minimum relative humidity will be 30 to 50 percent along the coast, 15 to 30 percent in the mountains and 5 to 15 percent in the deserts. Winds will be west-southwest to northwest at 10 to 25 mph, and along the coast winds will be onshore at 8 to 15 mph.

Low pressure over the Northern California Area will bring mostly sunny skies with low clouds near the coast. High temperatures will be in the 60's along the coast, and 70's and 80's inland. Minimum relative humidity will range from 18 to 35 percent. Winds will be south-southwest to northwest at 5 to 20 mph.

Low pressure over the Western Great Basin will bring mostly sunny skies with a chance of isolated dry thunderstorms in northern Nevada. High temperatures will be mid 70's to mid 80's in the north, and 90's in the south. Minimum relative humidity will range from single digits to the low twenties. Winds will be northwest to southwest at 10 to 20 mph.

HELICOPTER LANDING AREA SAFETY

The following points should be considered when operating around an unimproved landing site:

- Always wear your personal protective equipment (PPE) when working around an operating helicopter.
- Always get the approval of a flight crewmember or the pilot before approaching a starting or operating helicopter.
- Only approach and depart a helicopter as directed, in a slightly crouched position, and in full view of a crewmember.
- When approaching or departing an operating helicopter, never approach or depart uphill and do not hold equipment overhead.
- Always approach and depart an operating helicopter on the downhill side.
- Remove or secure loose articles when working around an operating helicopter.
- Be aware of the dust abatement conditions of the landing area, as blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous.
