

**INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, AUGUST 24, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was moderate in the Northwest Area and light elsewhere. Nationally, 173 new fires were reported. Three of these became large fires, one each in the Eastern Great Basin, Southwest and Southern Areas. Four large fires were contained, two in the Rocky Mountain Area and one each in the Eastern Great Basin and Southern Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Montana, Nevada, North Dakota, Oregon, Utah, Virginia, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Chesley) is assigned to manage large fires on the Umpqua National Forest. A transfer of command for the Biscuit fire from Mann's Area Command Team to Williams-Rhodes' Area Command Team will occur at 0600 PDT.

BISCUIT, Siskiyou and Six Rivers National Forests. A Unified Command between three Type 1 Incident Management Teams (Bateman, Frye, Vail) and the Oregon Department of Forestry is in place. A Type 2 Incident Management Team (Morcom) has been ordered. The fire is burning in mixed conifer forest and brush, 26 miles southwest of Grants Pass, OR. Moderate to low fire behavior was observed on the northwest and west flanks. Crews are constructing indirect and direct attack fireline on the northwest and west perimeters and burning out. Residents in the upper Pistol River drainage, Illahe and Agness remain under an evacuation advisory. Wilderness Retreat, Gardner Ranch, Tolman Ranch, the Chetco Inn and structures in the Pistol River drainage are threatened; structure protection is in place.

TILLER COMPLEX, Umpqua National Forest. A Type 1 Incident Management Team (Melton) is assigned. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, 25 miles east of Canyonville, OR. Moderate fire behavior was observed in grass, brush and timber. Crews are building indirect and direct attack fireline, burning out and mopping up. Sixty-seven homes are threatened; structure protection is in place.

APPLE, Umpqua National Forest. A Unified Command between a Type 2 Incident Management Team (Carlson) and the Oregon Department of Forestry is in place. This fire is 21 miles east of Glide, OR. Moderate fire behavior was observed in heavy timber. Crews are constructing indirect attack fireline on the east and west flanks in preparation for a burn out. Twenty homes and several outbuildings are threatened; structure protection is in place. Highway 138 is open with no traffic restrictions.

LAVA, Lakeview District, Bureau of Land Management. This fire is in a Wilderness Study Area, 15 miles north-northwest of Christmas Valley, OR. Active fire behavior was observed on the northwest flank in mountain mahogany, juniper, sagebrush and grass.

DEER POINT, Wenatchee National Forest. This fire is burning seven miles northwest of Chelan, WA in sagebrush, ponderosa pine and lodgepole pine. No new information was reported. This will be the last report unless new information is received.

QUARTZ MT. COMPLEX, Okanogan National Forest. A Fire Use Management Team (Cones) is assigned. This complex is in the Pasayten Wilderness Area, northwest of Winthrop, WA. Increased fire behavior was observed in lodgepole pine and subalpine fir. Three historic structures are threatened; structure protection is in place. Personnel are monitoring fire behavior.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

BATTLE CREEK, Black Hills National Forest. A Type 1 Incident Management Team (Wood) is assigned. This fire is ten miles southwest of Rapid City, SD. Precipitation moderated fire behavior in ponderosa pine, grass and light slash. Crews are improving fireline and mopping up around structures. One hundred sixty residences and fifteen commercial properties remain threatened; structure protection is in place.

MT. ZIRKEL COMPLEX, Routt National Forest. A Type 1 Incident Management Team (Gelobter) is assigned. This complex, comprised of the Burn Ridge and Hinman fires, is 25 miles north of Steamboat Springs, CO. Moderate to low fire activity was observed in heavy dead and down spruce, lodgepole pine and fir. Crews are improving fireline and holding on the west flank in preparation for a burn out operation. Structure protection is in place in North Park and in the Seed House corridor.

GREEN CREEK, Routt National Forest. A Type 2 Incident Management Team (Hartman) is assigned. This fire is 15 miles southeast of Steamboat Springs, CO. Increased fire activity was observed in spruce, fir and lodgepole pine. Crews and dozers are constructing fireline with support from aerial resources. Thirteen homes and a commercial property at Lake Agnes are threatened; structure protection is in place.

BIG FISH, White River National Forest. A Fire Use Management Team (Cook) is assigned. The Team is also managing the Lost Lakes fire. This lightning-caused Wildland Fire Use Incident,

which started on July 19th, is 34 miles southwest of Steamboat Springs, CO. The fire is being managed for resource benefit and a confinement strategy is in place. Smouldering was observed in heavy dead and down spruce, fir and aspen.

LOST LAKES, Routt National Forest. A Fire Use Management Team (Cook) is assigned. This fire is 20 miles west of Yampa, CO. The fire is being managed for resource benefit and is in monitor status. Minimal fire activity was observed in bug kill spruce and fir.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

MCNALLY, Sequoia and Inyo National Forests. A Type 1 Incident Management Team (Raley) is assigned. This fire is nine miles north of Kernville, CA. Increased fire behavior with moderate to high intensity surface runs and occasional torching was observed in heavy brush, mixed conifer forest and fir. Burn out operations have been successfully completed near Sherman Peak. Crews are constructing direct attack fireline on the northwest and northeast flanks. Twenty-three residences and seven commercial properties remain threatened; structure protection is in place.

MCNALLY	CA	SQF	149,482	87	UNK	1,580	35	61	15	14	41M

NORTHERN ROCKIES AREA LARGE FIRES:

KELLY CREEK, Nez Perce National Forest. A Type 2 Incident Management Team (Kechter) is assigned. This fire is burning in the Salmon River Breaks, 11 miles east of Riggins, ID. Minimal fire activity was observed in ponderosa pine, Douglas fir and sagebrush. Crews completed direct attack fireline construction on the north flank. Two cabins are threatened; structure protection is in place.

SHEEP CREEK, Beaverhead-Deerlodge National Forest. A Type 2 Incident Management Team (Benes) is assigned. This fire is 16 miles west of Wisdom, MT. Minimal fire activity was observed in heavy dead and down lodgepole pine, Douglas fir and subalpine fir. Crews and dozers have completed fireline construction; mop-up is underway on all divisions.

EASTERN GREAT BASIN AREA LARGE FIRES:

GARDER, Vernal Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Brunner) is assigned. This fire is 21 miles southwest of Duchesne, UT. Isolated torching and spotting were observed in lodgepole pine, aspen and Douglas fir. Burn out operations were successfully completed on two divisions. Crews are constructing direct attack fireline on the east, south and west flanks. Structure protection is in place in Argyle Canyon.

COW HOLLOW, Richfield Field Office, Bureau of Land Management. This fire is 35 miles northeast of Delta, UT. Isolated torching and smouldering were observed in pinyon pine, juniper, sagebrush and grass. Crews and dozers made good progress constructing fireline with support from aerial resources.

FRANK CHURCH COMPLEX, Salmon-Challis National Forest. A Fire Use Management Team (Zimmerman) is assigned. This complex, consisting of the Parker Mountain, Little Horse, Little Soldier, Bobtail and Big Hill fires, is 30 miles northwest of Salmon, ID. Creeping, smouldering and isolated torching were observed in subalpine fir and lodgepole pine. Engine crews are patrolling and hot-spotting. Structure protection is in place at Gattin Ranch.

STF = Sawtooth National Forest

SOUTHWEST AREA LARGE FIRES:

TRICK, Kaibab National Forest. A Type 2 Incident Management Team (Broyles) has been ordered. This fire is 26 miles southwest of Flagstaff, AZ. Extreme fire behavior with long range spotting was observed in timber and grass. Crews are constructing fireline and burning out.

PACK RAT, Coconino National Forest. This fire is eight miles east of Pine, AZ. Increased fire behavior was observed in mixed conifer forest and chaparral. Crews are constructing direct and indirect attack fireline on the east and west flanks with support from aerial resources. Extremely steep, rugged terrain is impeding containment efforts.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

WESTERN GREAT BASIN AREA LARGE FIRES:

COTTONWOOD, Ely Field Office, Bureau of Land Management. This fire is 18 miles southeast of Caliente, NV. Creeping and smouldering fire behavior was observed in pinyon pine, sagebrush and grass. Crews are constructing fireline and mopping up.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
COTTONWOOD	NV	ELD	375	80	8/24	80	3	0	2	0	65K

SOUTHERN AREA LARGE FIRES:

COMET COMPLEX, Virginia Department of Forestry. This complex consists of the Comet, Carrollton and four smaller fires and is near Smithfield, VA. Interior islands are burning out and short range spotting was observed in loblolly pine plantations. Engine crews are patrolling and mopping up. Eleven residences are threatened; structure protection is in place.

CAMDEN, Texas State Forest Service. This fire is 80 miles northeast of Houston, TX. No new information was reported. This will be the last report unless new information is received.

PINELAND, Texas State Forest Service. This fire is 150 miles northeast of Houston, TX. No new information was reported. This will be the last report unless new information is received.

OKS = Oklahoma Division of Forestry

ALASKA AREA LARGE FIRES:

REINDEER, Southwest Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This fire is 29 miles northeast of Holycross, AK, and is burning in black spruce, tussock tundra and hardwood forest. Minimal fire activity was observed due to precipitation and the fire has been placed in monitor status. This will be the last report unless significant activity occurs.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

OUTLOOK:

Low pressure over the Northwest Area will bring partly cloudy skies with scattered showers and isolated thunderstorms east of the Cascade Mountains. High temperatures will be in the 60's in the mountains and in the 70's and 80's at lower elevations. Minimum relative humidity will range from 20 to 40 percent in the west and 15 to 25 percent in the east. Winds will be variable to 15 mph.

The Rocky Mountain Area can expect isolated to widely scattered wet thunderstorms. High temperatures will be in the 60's and 70's in the mountains and in the 70's and 80's at lower elevations. Minimum relative humidity will range from 8 to 18 percent in southwestern Wyoming and western Colorado, 30 to 40 percent in the mountains of Wyoming and South Dakota, and 20 to 30 percent elsewhere. Winds will be southwest at 8 to 16 mph in Colorado and southern Wyoming, and east at 5 to 15 mph east of the Continental Divide.

The Southern California Area can expect sunny skies with morning low clouds and fog near the coast. High temperatures will be in the 70's to low 80's along the coast, in the 80's and 90's in the mountains, in the 90's in the inland valleys, and 100 to 115 in the deserts. Minimum relative humidity will range from 5 to 18 percent in the mountains and deserts, 15 to 30 percent in the inland valleys, and above 45 percent near the coast. Winds will be southwest to west at 8 to 18 mph in the mountains and deserts, and onshore at 8 to 12 mph along the coast.

Unstable air over the Northern Rockies Area will bring scattered showers and thunderstorms. High temperatures will be 70 to 85. Minimum relative humidity will range from 35 to 45 percent in North Dakota and 25 to 35 percent elsewhere. Winds will be variable to 10 mph west of the Continental Divide and east to south at 5 to 10 mph in the remainder of the region.

The Eastern Great Basin Area can expect mostly sunny skies in Utah and partly cloudy skies with scattered wet and dry thunderstorms in Idaho and western Wyoming. High temperatures will be 65 to 85 in Idaho and 85 to 100 in Utah. Minimum relative humidity will range from 20 to 35 percent in the north and 3 to 18 percent in the south. Winds will be west to southwest at 10 to 20 mph.

The Western Great Basin Area can expect partly cloudy skies with a chance of isolated thunderstorms. High temperatures will be in the 80's in the north and upper 80's to upper 90's in the south. Minimum relative humidity will range from 5 to 12 percent. Winds will be southwest to west at 10 to 15 mph, gusting to 20 mph in the Sierra Nevada Mountains.

The Southern Area can expect mostly sunny skies with isolated to scattered thunderstorms in the Tennessee River Valley. High temperatures will be in the 80's and 90's. Minimum relative humidity will be in the 30 percent range in Oklahoma and South Carolina, and above 45 percent elsewhere. Winds will be variable at 5 to 18 mph.

www.nifc.gov/sixminutes/index_j.asp

INITIATE ALL ACTIONS BASED ON CURRENT AND EXPECTED FIRE BEHAVIOR

Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing? Can you observe the area or use scouts? What information are the scouts looking for? Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working. Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use? Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it. Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?

To reduce risk, initiate the following:

_____ Post Lookouts

_____ Check communications

Retreat if you have doubts about your escape routes or safety zones or if the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.
