

**INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, AUGUST 26, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was moderate in the Northwest and Northern Rockies Areas, and light elsewhere. Nationally, 143 new fires were reported. Five of these became large fires, two in the Eastern Great Basin Area and one each in the Southern California, Rocky Mountain and Northern California Areas. Three large fires were contained, one each in the Eastern Great Basin, Northern California and Northern Rockies Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, North Dakota, Oregon, South Dakota, Utah, Virginia, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

An Area Command Team (Chesley) is assigned to manage large fires on the Umpqua National Forest. An Area Command Team (Williams-Rhodes) is assigned to manage the Biscuit fire.

BISCUIT, Siskiyou and Six Rivers National Forests. A Unified Command between two Type 1 Incident Management Teams (Frye and Vail), a Type 2 Incident Management Team (Morcom) and the Oregon Department of Forestry is in place. A Type 1 Incident Management Team (Dash) has been ordered. The fire is 26 miles southwest of Grants Pass, OR. Low to moderate intensity fire behavior was observed in mixed conifer forest and brush. Crews are constructing direct attack fireline on the northwest and west perimeters and burning out where appropriate. Fireline rehabilitation and mop-up are underway on the east and south perimeters. Structure protection is in place at Wilderness Retreat, Gardner Ranch, the Chetco Inn, Tolman Ranch and in the Pistol River drainage.

APPLE, Umpqua National Forest. A Unified Command between a Type 2 Incident Management Team (Carlson) and the Oregon Department of Forestry is in place. This fire is 21 miles east of Glide, OR. Moderate fire behavior was observed in heavy timber. Crews are constructing indirect attack fireline on the east, west and south flanks. Three miles of burn out were successfully completed on the east and west perimeters. Twenty homes are threatened; structure protection is in place.

TILLER COMPLEX, Umpqua National Forest. A Type 1 Incident Management Team (Melton) is assigned. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, 25 miles east of Canyonville, OR. Low to moderate fire behavior was observed in grass, brush and timber. Crews are building indirect and direct attack fireline, burning out and mopping up. Sixty seven homes are threatened; structure protection is in place.

LAVA, Lakeview District, Bureau of Land Management. This fire is burning in mountain mahogany, juniper, sagebrush and grass in a Wilderness Study Area, 15 miles north-northwest of Christmas

Valley, OR. No new information was reported.

QUARTZ MT. COMPLEX, Okanogan National Forest. A Fire Use Management Team (Cones) is assigned. This complex, consisting of the Quartz Mountain and Middle Mountain fires, is in the Pasayten Wilderness Area, northwest of Winthrop, WA. The fires are in monitor status and a confinement strategy is in place. Minimal fire activity was observed in lodgepole pine and subalpine fir. Personnel are providing structure protection at three administrative sites.

ROCKY MOUNTAIN AREA LARGE FIRES:

MT. ZIRKEL COMPLEX, Routt National Forest. A Type 1 Incident Management Team (Gelobter) is assigned. This complex, comprised of the Burn Ridge and Hinman fires, is 25 miles north of Steamboat Springs, CO. Moderate to low fire activity was observed in heavy dead and down spruce, lodgepole pine and fir. Crews are improving fireline on the west flank in preparation for a burn out operation. Structure protection is in place in North Park and in the Seed House corridor.

PASS CREEK, Shoshone National Forest. A Type 2 Incident Management Team (Sisk) will assume command at 0600 MDT. This fire is 18 miles south of Lander, WY. Extreme fire behavior with long range spotting was observed in lodgepole pine, spruce, and heavy down fuels. Summer homes in Pass Creek have been evacuated and an evacuation advisory has been issued to residents of Red Canyon. Engine crews are providing structure protection for twenty four residences.

GREEN CREEK, Routt National Forest. A Type 2 Incident Management Team (Hartman) is assigned. A Type 2 Incident Management Team (Sandman) has been ordered. This fire is 15 miles southeast of Steamboat Springs, CO. Increased fire activity with short runs and group tree torching was observed in spruce, fir and lodgepole pine. Crews are constructing handline with support from aerial resources.

BIG FISH, White River National Forest. A Fire Use Management Team (Cook) is assigned. The Team is also managing the Lost Lakes fire. This lightning-caused Wildland Fire Use Incident, which started on July 19th, is 34 miles southwest of Steamboat Springs, CO. The fire is being managed for resource benefit and a confinement strategy is in place. Smouldering was observed in heavy dead and down spruce, fir and aspen. Fire Use Modules are monitoring fire behavior and providing structure protection at several guest ranches.

LOST LAKES, Routt National Forest. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use Incident, which started on July 8th, is 20 miles west of Yampa,

CO. The fire is in monitor status and a confinement strategy is in place. Minimal fire activity was observed in bug kill spruce and fir.

BEAR CREEK, Worland District, Bureau of Land Management. This fire is 45 miles south of Tensleep, WY. Very active fire behavior was observed in grass, sagebrush and timber. Engine crews are building handline and installing hose lays. Structure protection is in place at a ranch.

SOUTHWEST AREA LARGE FIRES:

PACK RAT, Coconino National Forest. A Type 1 Incident Management Team (Humphrey) will assume command today. This fire is eight miles east of Pine, AZ. Extreme fire behavior was observed in mixed conifer forest and chaparral. The fire has jumped containment lines on the north and east perimeters. Personnel are scouting for new anchor points and fireline locations. Hunters and campers in the area have been evacuated. One hundred thirty seven residences in the Washington Park area are threatened.

TRICK, Kaibab National Forest. A Type 2 Incident Management Team (Broyles) will assume command at 0600 MST. This fire is 26 miles southwest of Flagstaff, AZ. Active fire behavior was observed in ponderosa pine and grass. Dozers are constructing fireline with support from aerial resources and crews are burning out along the rim of Tule Canyon. Steep, inaccessible terrain and limited water sources are impeding containment efforts.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

MCNALLY, Sequoia and Inyo National Forests. A Type 1 Incident Management Team (Raley) is assigned. A Type 2 Incident Management Team (Rios) has been ordered. This fire is nine miles north of Kernville, CA. Moderate fire behavior was observed in heavy brush and mixed conifer forest. Crews made good progress constructing direct attack fireline on the northwest and northeast flanks with support from aerial resources. Twenty three residences and seven commercial properties remain threatened; structure protection is in place.

BOBCAT, Cleveland National Forest. This fire is three miles northwest of Morena Village, CA. Minimal fire activity was observed in grass and brush. Crews have completed fireline construction and are mopping up. The town of Lake Morena, Lake Morena County Park and Corral Canyon Marine Corps Base remain threatened; structure protection is in place. Decrease in acreage is due to better mapping.

CHERRY, Los Angeles County Fire Department. This fire is burning in light to medium brush near Lake Elisabeth, west of Lancaster, CA. Several residential housing tracts are threatened; structure protection is in place.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HEL	STRC LOST	\$\$\$ CTD

EASTERN GREAT BASIN AREA LARGE FIRES:

COTTONWOOD, Fishlake National Forest. A Type 2 Incident Management Team (Van Bruggen) has been ordered. This fire is six miles southwest of Marysville, UT. Significant runs and spotting up to one half mile ahead of the front were observed in subalpine fir, mountain mahogany, juniper and aspen. Crews are building fireline on the northeast flank with support from aerial resources.

PROSPECT, Sawtooth National Forest. This fire is seven miles southwest of Yost, UT. Running, torching and crowning were observed in sagebrush, grass, juniper and pinyon pine. Dozers are constructing fireline with support from aerial resources. Crews are burning out and mopping up.

GARDER, Vernal Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Brunner) is assigned. This fire is 21 miles southwest of Duchesne, UT. Increased torching and spotting were observed in lodgepole pine, aspen and Douglas fir. Crews are constructing direct attack fireline on the east, south and west flanks. Structure protection is in place in Argyle Canyon. Decrease in acreage is due to better mapping.

FRANK CHURCH COMPLEX, Salmon-Challis National Forest. A Fire Use Management Team (Zimmerman) is assigned. This complex, consisting of the Parker Mountain, Little Horse, Little Soldier, Bobtail, Waterfall and Big Hill fires, is 30 miles northwest of Salmon, ID. The fires are in monitor status and are being managed for resource benefit. Creeping, smouldering and isolated torching were observed in subalpine fir and lodgepole pine. Engine crews are patrolling and hot-spotting. Structure protection is in place at Gattin Ranch.

NORTHERN ROCKIES AREA LARGE FIRES:

KELLY CREEK, Nez Perce National Forest. A Type 2 Incident Management Team (Kechter) is assigned. This fire is burning in the Salmon River Breaks, 11 miles east of Riggins, ID. Minimal fire activity was observed in ponderosa pine, Douglas fir and sagebrush. Crews made good progress constructing fireline on the east flank and are mopping up the north perimeter. Two cabins are threatened; structure protection is in place.

OUTLOOK:

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN SOUTHWESTERN AND SOUTH-CENTRAL OREGON FOR GUSTY NORTH TO NORTHEAST WINDS AND LOW RELATIVE HUMIDITY*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN THE NORTHERN SACRAMENTO VALLEY AND SURROUNDING FOOTHILLS FOR GUSTY NORTH TO NORTHEAST WINDS AND LOW RELATIVE HUMIDITY*****

Moist, unstable air over the Northwest Area will bring partly cloudy skies with scattered showers and isolated wet thunderstorms east of the Cascade Mountains. High temperatures will be in the 70's and 80's. Minimum relative humidity will range from 30 to 50 percent in western Washington and northwestern Oregon, and 15 to 25 percent elsewhere. Winds will be west to north at 10 to 20 mph.

Unstable air spreading into the Rocky Mountain Area will bring widely scattered wet thunderstorms to northern Wyoming and the Black Hills. Isolated, mainly dry thunderstorms are forecast in northern Colorado, southern Wyoming and along the east slopes of the Rocky Mountains in Colorado. High temperatures will be in the 70's and 80's in the mountains and in the 80's and 90's at lower elevations. Minimum relative humidity will range from 5 to 13 percent in southwestern Wyoming and western Colorado, and 15 to 28 percent elsewhere. Winds will be west at 10 to 18 mph in Wyoming and western Colorado, and east at 5 to 15 mph in eastern Colorado and the Black Hills.

The Southwest Area can expect mostly sunny skies in Arizona and New Mexico with partly cloudy skies and a chance of thunderstorms in west Texas. High temperatures will be in the 90's to 110 at lower elevations and in the 70's to upper 80's in the mountains. Minimum relative humidity will range from 20 to 40 percent in west Texas and 5 to 20 percent elsewhere. Winds will be southwest to west at 10 to 20 mph and gusty.

The Southern California Area can expect sunny skies with morning low clouds and fog near the coast. High temperatures will be in the 70's and 80's along the coast, upper 80's to 90's in the mountains, in the 90's to 104 in the inland valleys, and 100 to 115 in the deserts. Minimum relative humidity will range from 5 to 15 percent in the mountains and deserts, 10 to 20 percent in the inland valleys, and above 45 percent near the coast. Winds will be southwest to northwest at 10 to 20 mph in the mountains and deserts, and onshore at 8 to 12 mph along the coast.

The Eastern Great Basin Area can expect mostly sunny skies in Utah and partly cloudy skies with a chance of showers and thunderstorms in Idaho. High temperatures will be 66 to 86 in the north and 85 to 100 in the south. Minimum relative humidity will range from 12 to 30 percent in Idaho and 3 to 16 percent in Utah. Winds will be southwest to northwest at 10 to 20 mph.

Low pressure over the Northern Rockies Area will bring isolated to scattered thunderstorms. High temperatures will be 65 to 75 in eastern North Dakota and western Montana, and 75 to 85 elsewhere. Minimum relative humidity will range from 35 to 45 percent in North Dakota and 25 to 35 percent in the remainder of the area. Winds will be southeast to 10 mph in Montana and west to 10 mph in northern Idaho.

High pressure building into the Northern California Area will bring mostly sunny skies with morning low clouds and fog along the coast. High temperatures will be in the 60's and 70's near the coast and mid 80's to upper 90's inland. Minimum relative humidity will range from 12 to 18 percent inland. Winds will be northwest to north at 6 to 14 mph becoming north to northeast at 15 to 25 mph.

INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Every firefighter will give and receive briefings at some point on the job. Briefings are an effective way to disseminate information that can make the firefighter's job safer and easier. When giving a briefing, it is important to keep the following questions in mind and remain perceptive to how the audience is receiving the information. For example:

1. Did they ask questions? Talk about what it is like giving a briefing. Do you get empty stares? What feedback are you looking for to ensure they understand you?
2. Did they take notes? What kind of information would you like to see people write down?
3. Did they repeat information back? What other ways can you identify that your briefing is registering?
4. Did you give all the necessary information? How will you ensure that you covered everything necessary? Did you include such things as task, location, communications, hazards, who, when, etc?

It is also important for the firefighter who is receiving instructions to be mindful of the following during the briefing:

1. Did you really listen? What do you do to make yourself pay attention to everything being said?
2. Did you understand the assignment, location, and the nature and location of hazards? Do you expect to figure it out for yourself when you get out there or do you step forward and ask questions?

To reduce the risks, take the time and get it right! You must know the location of the assignment and:

1. What is to be done.
2. Who you are to report to and how often to report.

3. When you are expected to complete the assignment.
4. Hazards.
5. Communication plan frequencies.
6. Weather and fire behavior.
7. Status of adjoining forces.
