

**INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, SEPTEMBER 30, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light across the nation. Nationally, 36 new fires were reported. Very high to extreme fire indices were reported in California, Colorado, Idaho, Nevada and Oregon.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

WILLIAMS, Angeles National Forest. A Type 1 Incident Management Team (Raley) is assigned. This fire is 25 miles north of Azusa, CA. Minimal fire behavior was observed in heavy brush. Crews are burning out along Mt. Baldy Road, patrolling and mopping up. Residents in the Mt. Baldy Village remain evacuated; structure protection is in place. Residents from San Gabriel Canyon were allowed to return to their homes.

OUTLOOK:

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN NORTHERN CALIFORNIA FOR GUSTY NORTHEAST TO EAST WINDS AND LOW RELATIVE HUMIDITY*****

Weakening low pressure over the Southern California Area will bring mostly sunny skies with widespread low clouds and fog along the coast. High temperatures will be in the 60's in the valleys, coastal basins and mountains, 70's in the high deserts, and 80's in the low deserts. Minimum relative humidity will range from 15 to 30 percent in the deserts, 25 to 40 percent in the mountains, 45 to 60 percent in the inland valleys, and above 60 percent near the coast. Winds will be southwest to west at 8 to 15 mph along the coast and 10 to 25 mph over the mountains and deserts.

A cool trough of low pressure moving through the Northern California Area will bring mostly sunny skies with low clouds and fog near the coast. High temperatures will be in the 60's and 70's. Minimum relative humidity will range from 25 to 40 percent inland and winds will be northwest to north at 18 to 30 mph in the afternoon.

MANAGING VEHICLE TRAFFIC IN SMOKE

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.

Identification of important, public roads that may be impacted by smoke

Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.

Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area

Identification of alternative traffic routes as part of the incident/project traffic plan

Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice

When potential smoke-related problems are identified:

- Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
- Notify local law enforcement units and highway departments of a potential problem.
- Implement preplanned actions such as posting smoke warning signs.
- Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
