

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, OCTOBER 11, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light across the nation. Nationally, 31 new fires were reported. Very high to extreme fire indices were reported in Arizona, California, Nevada, Montana and Oklahoma.

SOUTHWEST AREA LARGE FIRES:

TOWERS, Tonto National Forest. This fire is seven miles south-southwest of Globe, AZ, and is burning in pine, oak brush and chaparral. The fire is exhibiting occasional torching associated with burnout operations. Personnel made significant progress and continue to burnout and hold fireline.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
TOWERS	AZ	TNF	350	60	10/12	224	8	7	3	0	250K

OUTLOOK:

The Southwest Area will have mostly sunny skies becoming partly sunny in the afternoon. Temperatures will be in the upper 50's to the 70's in the mountains and upper 70's to 90's at lower elevations. Minimum relative humidity will range from 10 to 20 percent. Winds will be southeast to southwest at 5 to 10 mph.

SAFETY ZONES

A safety zone is a location where the threatened firefighter can find adequate refuge from an approaching fire.

- What is the difference between a safety zone and a deployment site?
 - The safety zone is the area where a firefighter can survive without using a fire shelter. The deployment site is used when fire conditions are such that escape routes and safety zones have been compromised.

- How do you identify a good safety zone?
 - Consider the distance from the escaped fire as well as topography, winds, fire behavior, and fuels in the area.
 - The best locations are usually "in the black;" those with a minimum of, or devoid of, ground/aerial vegetation; or large bodies of water.
 - Size is sufficient for all present resources with a minimum distance from fire of at least four times the maximum flame length.
 - Location is scouted and marked well for visibility at all times.
 - Location has been reassessed in relation to line work progress, fatigue, changes in fire behavior, and arrival of additional resources.
