

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, OCTOBER 25, 2002 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light across the nation. Nationally, 59 new fires were reported. No new large fires were reported. Very high to extreme fire indices were reported in Arizona.

AVIATION MISHAP RESPONSE ACTIONS

Having a written mishap response action posted and accessible to all employees is an important first step. Having a list of actions to follow will ensure that nothing is missed in a stressful, time-critical period.

- Immediate, positive action is necessary. Any delay may affect someone's chances of survival.
- Conduct rescue operations keeping the following priorities in mind:
 - Preserve life.
 - Do whatever is necessary to extricate injured occupants and to extinguish fires, keeping in mind the necessity of protecting and preserving evidence.
 - Document and/or photograph the location of any debris that must be disturbed in order to carry out rescues and/or fire suppression activities.
 - Secure the area. Treat the crash site as a crime scene. Arrange for security at the accident scene if necessary. Determine if hazardous materials were on the aircraft. Deny access except to credentialed officials and escorted media.
- Be aware that crash sites can be dangerous due to hazardous cargo, flammable and toxic fluids, sharp objects, disease, adverse terrain, hot/cold weather conditions, and fire.
- Exercise good judgment, utilize available protective devices and clothing, and use extreme caution when working near the wreckage site.
- Do not exceed your physical limitations.
