INCIDENT MANAGEMENT SITUATION REPORT SUNDAY MAY 18, 2003 - 0800 MDT NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationally, with 12 new fires reported yesterday. Very high to extreme fire indices were reported in Arizona, Minnesota, New Mexico, Oklahoma, and Texas.

SOUTHWEST AREA LARGE FIRES:

RED ROCK, Coronado National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is burning in grass and brush ten miles south of Sonoita, AZ. Significant progress was made yesterday utilizing air resources and direct attack with hand crews. Mopup and patrol with hand crews are planned for today. Increase in acreage is due to more accurate mapping.

OUTLOOK:

Weather Discussion: A very cold low pressure system for this time of year will sink into the northwest quadrant of the country, pushing a cold front into the Great Basin. The front will cause an increase of wind in the Southwest today, along with a spike in temperatures and lower relative humidity. Some severe thunderstorms will also be possible ahead of the front over the northern Plains. Warm and humid low pressure in the Southeast will trigger thunderstorms today. Some may become severe from southern Mississippi to southern South Carolina. Central Alaska will remain dry in westerly flow.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHERN CALIFORNIA Areas of morning low clouds and fog into the coastal valleys, otherwise mostly sunny	55-75 Mountains 72-82 Valleys 75-95 Deserts	20-30% Mountains 30-40% Valleys 15-25% Deserts	SW-W 10 to 20 mph
SOUTHWEST AREA Partly cloudy and warm with afternoon breezes. A slight chance for thunderstorms along the northern AZ and NM borders, some possibly dry.	Upper 60s to mid 80s mountains and northern AZ, upper 80s to near 104 remaining lower elevations.	15-30% AZ higher terrain in northern AZ and northwest NM, 5-15% elsewhere.	S to SW 10-25 mph, with the higher speeds across central AZ and west-central NM.
EASTERN AREA Becoming partly sunny across the NE 1/3 of MN, far NW WI, the UP and northern ½ of the LP of Michigan where elevated fire potential is expected, a good chance of showers and thunderstorms over NW and W central MN	66 to 76	35 to 45%	South to southeast winds increasing to 10 to 20 mph over much of the northern Great Lakes
