# INCIDENT MANAGEMENT SITUATION REPORT <br> MONDAY JUNE 30, 2003-0530 MDT <br> NATIONAL PREPAREDNESS LEVEL 2 

## CURRENT SITUATION:

Initial attack activity was moderate in the Northern California Area and light elsewhere with 106 new fires reported. Seven new large fires were reported, two each in the Northern California, Northwest and Eastern Great Basin Areas and one in the Southern California Area. Three large fires were contained, one each in the Southern California, Eastern Great Basin and Southwest Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Hawaii, Nevada, New Mexico, Oregon, Texas and Utah.

## SOUTHERN CALIFORNIA LARGE FIRES

TEJON, Kern County Fire Department. A California Department of Forestry and Fire Protection Incident Command Team (Kerrigan) has been ordered. This wind driven fire is three miles north of Lebec, CA on Interstate 5. Active fire behavior was observed in grass, oak and brush. Two thousand five hundred residents have been evacuated to a center at Fort Tejon School. Seven hundred fifty residences in Frazier Park, Lebec, O'Neil Canyon and Digier Canyon are threatened; structure protection is in place. An oil pipeline and tank storage facility and a primary power transmission line are threatened. Interstate 5 was closed.

## SOUTHWEST AREA LARGE FIRES:

ASPEN, Coronado National Forest. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is in mixed conifer, ponderosa pine and brush, 17 miles northeast of Tucson, AZ. Backing, isolated group torching and short range spotting were observed on the southwest flank in the Pusch Ridge Wilderness Area. Crews are conducting burn out operations, patrolling, mopping up and rehabilitating fireline. Extremely steep slopes, large rock outcrops and rugged ridgelines are hampering containment efforts on the southwest perimeter.

HELEN'S 2, Saguaro National Park. A Type 2 Incident Management Team (Raley) is assigned. This lightning caused fire is 23 miles east of Tucson, AZ. Minimal fire activity was observed in ponderosa pine, mixed conifer, oak and manzanita. Crews are mopping up, cold trailing and rehabilitating fireline. Reduction in acreage is due to more accurate mapping.

JENNY, Gila National Forest. A Type 2 Incident Management Team (Mullenix) is assigned. This lightning caused fire is in mixed conifer, pinyon pine and oak, 45 miles northwest of Truth or Consequences, NM. Low to moderate fire behavior with isolated individual tree torching was observed. Crews are building direct attack fireline on the west flank and burning out pockets of unburned fuel on the north perimeter.

DRY LAKE COMPLEX, Gila National Forest. A Fire Use Management Team (Duncan) is assigned. This lightning caused Wildland Fire Use complex, comprised of the Dry Lake, Sycamore, Moonshine and Granny fires, is 27 miles northwest of Silver City, NM. The Granny fire was added to the complex on June $28^{\text {th }}$. The complex is being managed to accomplish multiple resource objectives. Light precipitation moderated fire behavior in decadent stands of mixed conifer, pinyon pine, juniper, ponderosa pine and grass. Crews are preparing trails on the north and west flanks of the Dry Lake fire for possible mitigation actions.

SECO, Gila National Forest. A Type 2 Incident Management Team (Bradley) is assigned. This fire is in the Aldo Leopold Wilderness Area, 15 miles southwest of Winston, NM. The fire is being managed with a confine/contain strategy. Minimal fire activity was observed in mixed conifer, ponderosa pine, oak and grass. Crews are constructing handline and preparing trails for possible mitigation actions.

POWELL, Grand Canyon National Park. A Fire Use Management Team (Cook) is assigned. This lightning caused Wildland Fire Use fire is burning in ponderosa pine, grass, gambel oak and manzanita, 23 miles northwest of Grand Canyon Village, $A Z$. The fire is being managed to accomplish resource objectives. Poor relative humidity recovery contributed to a long-duration burn period. The fire has spread south with short, uphill runs observed in brush on the steep sides of the Powell Plateau. The Mauv Saddle historic cabin has been protected from potential fire spread.

## NORTHERN CALIFORNIA AREA LARGE FIRES:

FRIDAY, Six Rivers National Forest. A Type 2 Incident Management Team (Wendt) will assume command today at 0600 PDT. This fire is on Highway 299, one mile west of Salyer, CA. Spotting and torching were observed in heavy timber. Residents along Highway 299 have been evacuated. Several residences are threatened; structure protection is in place.

97, Siskiyou Unit, California Department of Forestry and Fire Protection. This fire is ten miles northeast of Weed, CA. Active fire behavior was observed in brush. Forty residents have been evacuated to a center at Big Springs Elementary School. Twenty residences are threatened in a rural subdivision; structure protection is in place. One residence was lost during the initial phases of the fire.

## NORTHWEST LARGE FIRES

DAVIS, Deschutes National Forest. A Type 2 Incident Management Team (Hoff) is assigned. This fire is in lodgepole pine, Douglas fir, white fir and ponderosa pine, 12 miles west of La Pine, OR. Major runs, crowning and long range spotting were observed. Crews are flanking the fire with handline from established anchor points. Campers along Wickiup Reservoir and several residents have been evacuated; structure protection is in place for ten residences.

DAISY HILL ROAD, Southwest Oregon District, Oregon Department of Forestry. This fire is one mile west of Cave Junction, OR. Running fire was observed in grass and brush. Crews are constructing fireline and providing structure protection. A trailer park and several homes have been evacuated. Four residences were lost during the initial phases of the fire.

BEAR LAKE, Willamette National Forest. A Type 2 Incident Management Team (Gardner) will assume command today at 0600 PDT. This fire is 15 miles east of Detroit, OR. Isolated torching, creeping and smoldering were observed in mixed conifer with heavy fuel loading. Smokejumpers made good progress establishing containment lines.

SULPHER CREEK, Western Lane District, Oregon Department of Forestry. This fire is in timber and heavy logging slash, five miles southeast of Mapleton, OR. No further information was reported.

## EASTERN GREAT BASIN LARGE FIRES

APEX, Southwest State, Utah Division of Forestry, Fire and State Lands. A Type 2 Incident Management Team (Suwyn) will assume command today. This fire is in brush, pinyon pine and juniper, 12 miles west of St. George, UT. The fire spread to the north and south, and spotted across Bulldog Road. Erratic winds and rugged terrain are hampering containment efforts.

WOODENSHOE, Manti-LaSal National Forest. A Fire Use Management Team (Bonefeld) has been ordered. This fire is in the Dark Canyon Wilderness Area, 25 miles west of Blanding, UT. A major run to the northeast with crowning and spotting was observed in mixed conifer. Smokejumpers are constructing handline in an effort to keep the fire from backing into Woodenshoe Canyon.

FIN CANYON, Southeast State, Utah Division of Forestry, Fire and State Lands. This fire is 18 miles west of Price, UT. Minimal fire activity was observed in mixed conifer and logging slash. Crews successfully contained several spot fires and are mopping up.

## ALASKA AREA LARGE FIRES:

SAND CREEK, Alaska Division of Forestry. A Type 2 Incident Management Team (McKnight) is assigned. Transfer of command to a Type 3 organization will occur today. This fire is in black spruce, tundra and hardwoods, 25 miles northeast of Delta Junction, AK. Minimal fire activity was observed on the west flank. Reduction in acreage is due to more accurate mapping. This will be the last report unless significant activity occurs.

## OUTLOOK:

Red Flag Warnings: In portions of northwestern Montana for dry lightning, gusty winds and low relative humidity.

Fire Weather Watches: In portions of southern Idaho for strong southwest winds, low relative humidity and high Haines Index; in portions of western Montana for dry lightning, gusty winds and low relative humidity.

Weather Discussion: A cold front which passed over the Pacific Northwest yesterday will progress across the Northern Rockies today. Gusty winds will remain in place behind the front in eastern Oregon and eastern Washington. Higher elevations in eastern Arizona and most of New Mexico will still have enough moisture for isolated thunderstorms today. In the Southeast, tropical storm Bill is projected to move onshore overnight near the Texas/Louisiana border. In Alaska, warm and dry weather will remain in place over interior sections.

| Geographic Area Weather | High Temperatures | Minimum Relative Humidity | Wind |
| :---: | :---: | :---: | :---: |
| ALASKA AREA <br> Northern: sunny <br> Southern: partly cloudy | Northern: upper 60s to upper 70's Southern: mid 60s to mid 70s | Northern: 25 to 35\% <br> Southern: 30 to 40\% | Northern: variable to southwest at less than 10 <br> Southern: variable to southwest at less than 15 |
| EASTERN GREAT BASIN <br> A slight chance of dry thunderstorms over the mountains of eastern Utah, otherwise mostly sunny, locally breezy, and very dry. | Idaho, Bridger- <br> Teton: 68 to 79 mountains, 80 to 91 valleys. Utah and Arizona Strip: 75 to 90 mountains, 90 to 106 valleys. | Idaho, Bridger- <br> Teton, northern half Utah: 12 to 25\% mountains, 7 to $20 \%$ valleys. Southern half Utah and Arizona Strip: 2 to 15\% | West 10 to 20 over Idaho and western Wyoming, southwest 10 to 20 over western Utah, variable 5 to 15 mph eastern Utah. |
| NORTHERN CALIFORNIA AREA <br> Clear except for night and morning fog and low clouds along the coast and in the coastal valleys. | 60s near the coast. Inland 70s and 80s higher elevations and 80s and 90s lower elevations. | 7 to $15 \%$ east of the SierraCascade Crest and 15 to 30\% west of the crest. | Southwest to west 8 to 15 mph in the afternoon with gusts 20 to 25 mph along and east of the SierraCascade Crest. |
| NORTHWEST AREA <br> Mostly cloudy western Washington and northwestern Oregon with a few showers. Partly cloudy eastern Washington with a chance of mountain showers. Mostly sunny eastern Oregon. | Cooler. 60s and 70s west of Cascades and 70s and 80s eastside. | Higher. Above $50 \%$ west side and 20 to $35 \%$ east side except 6 to $16 \%$ southeast Oregon. | Southwest to west 10 to 20 mph and gusty east of Cascades. |
| ROCKY MOUNTAIN AREA <br> Dry except isolated thunderstorms over eastern sections. | Highs in the 80s, except lower to mid 90s western Colorado, northeast Wyoming, and western South Dakota. | 10 to $20 \%$ western sections, 25 to $40 \%$ in the east. | Westerly 5 to 18 mph in the west, southerly 8 to 20 mph in the east. |

| SOUTHERN CALIFORNIA AREA <br> Areas of morning low clouds and fog into the coastal valleys, otherwise mostly sunny. | 75 to 90 mountains. 85 to 100 valleys. 90 to 105 upper desert 100 to 115 low desert | 8 to $15 \%$ deserts 15 to 30\% mountains 30 to 50\% valleys | Southwest to northwest 10 to 20 mph . |
| :---: | :---: | :---: | :---: |
| WESTERN GREAT BASIN AREA <br> A trough of low pressure is moving into Oregon-Idaho, bringing increasing southwest to west winds to northern Nevada and much cooler temperatures. Mostly sunny skies will have just a bit of afternoon cloudiness. | In the north: 80 to low 90s at low elevations, 75 to 85 in higher elevations. <br> In the south: 90s to 102 at low elevations and in the 80s to low 90s at higher elevations. | 5 to $12 \%$ southern deserts, 8 to 18\% in the northern valleys, 12 to $22 \%$ in the central mountains and 20 to $35 \%$ in the Sierras | Southwest to west 15 to 25 mph in the northwestern half of the state, south to southwest 5 to 15 in the southeastern half. |

## ESCAPE ROUTES

An escape route is a preplanned and understood route to reach a safety zone.

- What are the primary concerns in choosing an escape route?
- Select the closest, least obstructed route.
- Plan for more than one escape route.
- Avoid an uphill escape.
- Scout and clearly mark the route for visibility (aids during smoky situations or night operational periods).
- Determine escape time. Consider slowest person, fatigue and temperature factors.
- Continuously reassess the situation with regard to work progress and additional resource arrivals.
- Assure all line personnel are familiar with escape routes.
