SAFENET

SAFENET is a form, and process, that provides a method for reporting unsafe situations on, or off, the fireline. The information provided on the form will help collect important, safety-related data to determine long-term trends and problem areas. A SAFENET may be filled out at any time to report a valid concern about unsafe situations in fire operations, as well as document corrective action.

- Discuss the methods for filing a SAFENET.
 - Electronically (Access site through NIFC web site)
 - By hardcopy (self-addressed, stamped forms available through the cache system).
 - By phone (1-800-670-3938)

- Discuss advantages of filing a SAFENET through your supervisor versus sending it yourself.
 - Increase the chances of finding an immediate solution.
 - Keeps supervisor "in the loop."

- Discuss using SAFENET in situations other than fire.
 - Prescribed fire
 - All-risk
 - Training

- Where does a SAFENET go, and what response can you expect?
 - SAFENETs are received and stored in a database in Boise. After a SAFENET is received, the names are removed. It is then given a document number and posted to the web.
 - Every new SAFENET is then forwarded to the affected agencies designated list of contacts, which usually includes the National or Regional Safety Officer.
 - It is each agency's responsibility to insure that corrective actions are taken.

- Corrective actions can be filed by anyone at any time. They are automatically attached to the individual SAFENET on the database.

- Discuss using SAFENET to monitor safety issues other firefighters may be having.
