

**INCIDENT MANAGEMENT SITUATION REPORT  
FRIDAY MAY 14, 2004 – 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 1**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 98 new fires reported. One new large fire was reported in the Southern California Area. One large fire was contained in the Eastern Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Minnesota, Nevada, New Mexico, Oklahoma, South Dakota and Texas.

**SOUTHERN CALIFORNIA AREA LARGE FIRES:**

COTTONWOOD, Riverside Unit, California Department of Forestry & Fire Protection. This fire is in brush, five miles northeast of Whitewater, CA. Wind-driven fire behavior resulted in strong up canyon runs. Steep, inaccessible terrain has hampered suppression efforts.

SELLIN	MN	BGR	550	100	---	16	0	4	0	0	20K

BGR = Big Stone National Wildlife Refuge

## OUTLOOK:

**Weather Discussion:** High pressure ridges are anchored along both the West and East coasts with a broad trough of low pressure over the central states. The main area of rainfall over the country will be associated with a slow-moving frontal system that extends from the Great Lakes to Texas.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>SOUTHERN CALIFORNIA AREA</b> Patchy morning low clouds and fog coastal areas, otherwise mostly sunny.	65 to 75 coastal areas 65 to 80 mountains 80 to 90 valleys 80 to 90 upper deserts 90 to 100 lower deserts	10 to 20%.	Southwest to northwest 10 to 20 mph.
<b>SOUTHWEST AREA</b> Mostly sunny and warmer Arizona and western New Mexico. Partly cloudy and cooler eastern New Mexico and west Texas. Slight chance thunderstorms northeast New Mexico and southwest Texas.	50s to 70s mountains and eastern New Mexico and west Texas plains, 80s to mid 90s southwest Texas, southern New Mexico and lower elevations of Arizona.	5 to 15% Arizona and western New Mexico, 15 to 30% eastern New Mexico, 30 to 40%+ west Texas.	West to southwest 5 to 15 mph with some gusts to 25 mph Arizona and western New Mexico. South to southeast 10 to 20 mph eastern New Mexico & west Texas.

#### **ATTEMPTING A FRONTAL ASSAULT ON A FIRE**

Attempting a frontal assault on a fire is recognized as Watchout Situation #10 and is a potentially dangerous tactic.

● If your tactics include a frontal assault, the following checklist must be adequately addressed before engaging the fire:

- Has the fire been scouted and sized up? Who will scout and size up a fire and what are they looking for?
- Is your position defensible? List what makes a firefighter's position defensible. (Anchor points, safety zones, escape routes, etc.)
- Are escape routes and safety zones adequate? Review what constitutes an adequate safety zone and escape route.
- Do you have an anchor point? How would you establish an anchor point for a frontal assault on a fire?

● continued...

- Do you have adequate resources to complete the assault? Discuss things you need to consider; for example, if the frontal assault fails, do you have backup?
- Are you informed on strategy, tactics, and hazards? Consider what could happen if someone has a different approach than you; i.e., the IC has a burnout operation planned while you are attempting frontal assault.
- Is the terrain favorable to holding the fire? Discuss ways the terrain will influence where you will make a stand.

● In order to reduce the risks, reassess your tactics, post lookouts, identify situations in which firefighters may be enticed to attempt frontal assault on a fire. Review why this may or may not be a good idea.
