

**INCIDENT MANAGEMENT SITUATION REPORT
MONDAY MAY 24, 2004 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light nationally with 56 new fires reported. One new large fire was reported in the Southern California Area. Two large fires were contained, one each in the Southern California and Southwest Areas. Very high to extreme fire indices were reported in Arizona, New Mexico, Oklahoma, Texas and Utah.

SOUTHWEST AREA LARGE FIRES:

LOOKOUT, Cibola National Forest. This fire is 70 miles southeast of Albuquerque, NM in grass. A Type 2 Incident Management Team (Winchester) is assigned. Drought stressed fuels and high winds resulted in active surface fire, torching and uphill runs.

KP, Apache-Sitgreaves National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is 20 miles south of Alpine, AZ in brush and pine timber. Unstable atmospheric conditions resulted in significantly more active fire behavior yesterday. US Highway 191 will be closed to public access for approximately one or two days due to burnout operations and rolling debris.

PEPPIN, Lincoln National Forest. This fire is six miles north of Capitan, NM in timber. Hazardous terrain and heavy dead fuel loading have hampered suppression efforts. Active fire behavior with crowning and spotting was observed.

ROSE, Apache-Sitgreaves National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is 40 miles north of Clifton, AZ in chaparral. Minimal fire activity was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

SOUTHERN AREA LARGE FIRES:

BLOCKS H&J, Everglades National Park. This fire is 15 miles west of Homestead, FL in grass, brush and hardwood timber. Active fire behavior with occasional flare ups was observed. Personnel continue to implement Minimum Impact Suppression Tactics (MIST).

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
BLOCKS H&J	FL	EVP	1,450	85	5/31	118	1	6	2	0	120K

ROCKY MOUNTAIN AREA LARGE FIRES:

MONTEZUMA MESA, Southern Ute Agency, Bureau of Indian Affairs. This fire is 15 miles south of Pagosa Springs, CO in ponderosa pine and oakbrush. Isolated torching was observed. Suppression efforts were aided by decreased wind and cloud cover.

OUTLOOK:

Red Flag Warnings: Most of northern New Mexico for strong southwest winds and low humidity.

Fire Weather Watches: Northeast and east-central Arizona and most of southern New Mexico for strong southwest winds and low humidity.

Weather Discussion: Cool low pressure will lift away from the Great Basin and into the Dakotas today. As a result, showers and thunderstorms will decrease today in the Northwest and Idaho. However, showers will be on the increase in the Northern Rockies. South of the low, strong winds will continue to surface during the afternoon from Arizona eastward to west Texas. Wind gusts around 40 mph will not be uncommon. In addition, the Southern Area will remain dry with some afternoon relative humidity values dipping to critical levels in parts of Florida.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHWEST AREA Breezy to occasionally windy, with partly to mostly sunny skies.	60s and 70s mountains 80s and 90s lower elevations	10 to 25%	Southwest 10 to 25 mph with higher gusts.
SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog to the lower coastal slopes. Otherwise partly cloudy in the afternoon.	60 to 70 coastal areas 60 to 75 mountains 70 to 80 valleys 70 to 80 upper deserts 80 to 95 lower deserts	20 to 40% except 8 to 15% lower deserts	Southwest to northwest 10 to 20 mph with locally higher gusts.

HELICOPTER LANDING AREA SELECTION

Consider the following points when selecting a landing area for a helicopter:

- Locate a flat area that is of sufficient size for the helicopter you are expecting to land.
 - Type I -- Clear and level touchdown pad measuring 30 feet by 30 feet; safety circle measuring 110 feet in diameter.
 - Type II -- Clear and level touchdown pad measuring 20 feet by 20 feet; safety circle measuring 90 feet in diameter.
 - Type III -- Clear and level touchdown pad measuring 15 feet by 15 feet; safety circle measuring 75 feet in diameter.

- Choose an area clear of people, vehicles, and obstructions such as trees, poles, and especially overhead wires.

- The area must be free of stumps, brush, posts, large rocks or anything over 18 inches high.

- Consider the wind direction. Helicopters land and take off into the wind.

- Choose an approach free of obstructions. Any obstruction should be relayed to the helicopter crew during initial radio contact.

- Remove or secure any loose items in and around the landing area such as trash, blankets, hats, or equipment.

- Wet down the landing area if dusty conditions are present.
