

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, JULY 16, 2004 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was moderate in the Alaska Area and light elsewhere. Nationally, 272 fires were reported. Three new large fires were reported, one each in the Southern California, Northern California and Northwest Areas. Four large fires were contained, three in the Southern California Area and one in the Northern Rockies Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, New Mexico, Nevada, Oklahoma, Oregon, South Dakota, Texas and Utah.

ALASKA AREA LARGE FIRES:

BOUNDARY, Fairbanks Area Forestry, Alaska Division of Forestry. A Type 1 Incident Management Team (Hart) is assigned. This fire is 20 miles northeast of Fairbanks, AK in alpine tundra and black spruce. Fire behavior moderated due to a weak inversion and continuous smoke cover. Concerns remain for residences and subdivisions in Fairbanks Creek and Little Chena drainages.

CENTRAL COMPLEX, Upper Yukon Zone, Bureau of Land Management. A Type 2 Incident Management Team (Chrisman) is assigned. This complex, comprised of the Middle Birch Creek, Preacher Creek, Rock Creek, Crazy and Tokoma Bluffs fires, is 15 miles southwest of Circle, AK in timber. One quarter mile spotting was observed.

TAYLOR COMPLEX, Tok Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This complex, comprised of the Wall Street, Billy Creek, Gardiner Creek, Big Creek, Anomaly, Chicken and Porcupine fires, is 35 miles northwest of Tok, AK in black spruce and tundra. An inversion slowed fire activity, with occasional torching observed.

EAGLE COMPLEX, Upper Yukon Zone, Bureau of Land Management. A Fire Use Management Team (Cones) is assigned. This complex, consisting of the American Summit, Edwards Creek, King Creek, Kandik River, Indian Grave Creek, Deer Creek and seven additional fires, is located three miles northeast of Eagle, AK in tundra, black spruce and mixed hardwoods. An inversion, high humidity and scattered showers moderated fire behavior.

EVANSVILLE, Tanana Zone, Bureau of Land Management. This fire is one-half mile southeast of Bettles, AK in black spruce. Fire behavior was moderate to extreme.

WOLF CREEK, Upper Yukon Zone, Bureau of Land Management. This fire is 60 miles northeast of Fairbanks, AK in black spruce and hardwoods. Fire spread was minimal due to morning precipitation. Reduction in acreage is due to more accurate mapping.

LOWER MOUTH, Upper Yukon Zone, Bureau of Land Management. This fire is located 12 miles northwest of the village of Birch Creek, AK in white spruce, black spruce, birch and aspen. High winds continued to push the fire towards the village of Birch Creek.

SOLSTICE COMPLEX, Upper Yukon Zone, Bureau of Land Management. A Fire Use Management Team (Bird) is assigned. This incident is 57 miles northwest of Fort Yukon, AK in black spruce and tundra. The complex consists of the Pingo, Winter Trail, Sucker River, Black Currant Lake, Vundik Lake, Boulder Creek and Sheenjek fires. Fire behavior was minimal.

YUKON CROSSING COMPLEX, Upper Yukon Zone, Bureau of Land Management. This complex includes the previously reported Waldron Creek and Fort Hamlin Hills fires. This complex is ten miles southwest of Stevens Village, AK in spruce, dwarf birch and tundra. The fire made a major advance to the south.

CAMP CREEK, Delta Area Forestry, Alaska Division of Forestry. This fire is 23 miles northwest of Delta Junction, AK in tundra and spruce. Moderate temperatures and an inversion slowed fire growth.

WESTERN GREAT BASIN AREA LARGE FIRES:

WATERFALL, Humboldt-Toiyabe National Forest. A transfer of command from a Type 2 Incident Management Team (Scheuerman) to a Type 1 Incident Management Team (Martin) will occur today. This fire is 3 miles west of Carson City, NV in timber with litter understory and brush. Steep, inaccessible terrain is hampering containment efforts. Extreme fire behavior with running, torching and spotting was observed. Evacuations of subdivisions remain in effect.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
WATERFALL	NV	HTF	8,500	0	UNK	890	32	37	10	21	500K

SOUTHERN CALIFORNIA AREA LARGE FIRES:

PINE, Los Angeles County Fire Department. A unified command has been established between a Type 1 Incident Management Team (Gelobter) and the Los Angeles County Fire Department (Hokanson). This fire is 14 miles southeast of Lebec, CA in heavy brush. Active fire behavior with a significant run was reported. Mandatory evacuations are in effect for the Portal Ridge Road area. Voluntary evacuations are in effect for the Lake Hughes and Lake Elizabeth areas.

VERBENIA, Riverside Unit, California Department of Forestry and Fire Protection (CDF). A Type 2 Incident Management Team (McCormick) is assigned. This fire is 10 miles northwest of Palm Springs, CA in grass and chaparral. Minimal fire behavior was observed. Favorable weather conditions are assisting containment efforts.

MEADOW, Yosemite National Park. A Fire Use Management Team (Cook) will assume command at 1800 today. This lightning-caused Wildland Fire Use (WFU) incident, located seven miles southeast of Yosemite Village, CA in timber, is being managed to accomplish resource objectives. Torching and short-range spotting spotting were observed. Increase in acreage is due to better mapping.

KRN = Kern County Fire Department
 MVU = Monte Vista Unit

NORTHWEST AREA LARGE FIRES:

POT PEAK, Okanogan/Wenatchee National Forest. A Type 2 Washington State Interagency Incident Management Team (Johnson) is assigned. This fire is 15 miles northwest of Chelan, WA in timber. Minimal fire behavior was reported due to a strong inversion over the area yesterday morning.

DAHL PINE, Warm Springs Agency, Bureau of Indian Affairs. This fire is located 21 miles north of Warm Springs, OR in timber. Fire activity was minimal.

FREEZEOUT, Okanogan/Wenatchee National Forest. This fire is 65 miles northeast of Bellingham, WA in timber. No new information was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

EASTERN GREAT BASIN AREA LARGE FIRES:

DOLLAR, Boise National Forest. A Type 2 Incident Management Team (Suwyn) is assigned. This fire is 16 miles northeast of Cascade, ID in heavy dead and down fuels. The fire was active on the east side.

TRAIL CANYON, Moab Field Office, Bureau of Land Management. This fire is 40 miles north of Green River, UT in Douglas fir, pinyon pine, juniper and aspen. The fire has moved beyond critical natural barriers, and continues to roll down steep terrain with significant uphill runs.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
DOLLAR	ID	BOF	350	0	UNK	355	12	0	7	0	NR

SOUTHWEST AREA LARGE FIRES:

NUTTALL COMPLEX, Coronado National Forest. A Type 2 Incident Management Team (Winchester) is assigned. This complex, located 15 miles southwest of Safford, AZ in brush and heavy timber, consists of the Clark, Nuttall and Gibson fires. Backing downhill spread with occasional torching was observed.

WILLOW, Tonto National Forest. A Type 2 Incident Management Team (Philbin) is assigned. This fire is six miles southwest of Payson, AZ in timber, grass and chaparral. Fire behavior was minimal.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

EAS = Eastern Land Office, Montana Department of Natural Resources and Conservation

ROCKY MOUNTAIN AREA LARGE FIRES:

PYRAMID PEAK, Rawlins Field Office, Bureau of Land Management. This fire is 35 miles southwest of Casper, WY in timber. Creeping ground fire with some torching was reported.

OIL SPRINGS, White River Field Office, Bureau of Land Management. A Fire Use Management Team (Weldon) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is 27 miles south of Rangely, CO in pinyon pine, juniper, sagebrush and grass. Fire activity was minimal due to light precipitation and higher relative humidity.

OUTLOOK:

Weather Discussion: High pressure continues to circulate moisture into much of the West except for a drier flow over northern California, western Nevada and the Pacific Northwest. In Alaska, high pressure remains over the area with enough moisture for a chance of thunderstorms over the interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
ALASKA AREA Partly to mostly cloudy. Isolated thunderstorms or showers in the afternoon.	68 to 84.	28 to 40%.	West 10 mph.
SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog coastal areas. Otherwise, partly cloudy with scattered showers and thunderstorms mainly over the mountains and deserts of Southern California and over the Sierra.	75 to 85 coastal areas. 80 to 95 mountains. 90 to 105 valleys. 95 to 105 upper deserts. 95 to 105 lower deserts.	15 to 30% valleys 20 to 35% mountains. 15 to 30% deserts.	Southeast to southwest 10 to 20 mph with higher gusts.
WESTERN GREAT BASIN AREA Partly sunny in the northwest, partly to mostly cloudy elsewhere with isolated to scattered wet thunderstorms.	North Valleys: 85 to 100. South Valleys: 90 to 101. Mountains: 75 to 90.	West Valleys: 6 to 15%. East Valleys and Mountains: 15 to 32%.	Northwest: S at 10 to 20 mph. Elsewhere: S at 5 to 15 mph.
SOUTHWEST AREA Partly cloudy. Isolated to widely scattered thunderstorms	Upper 60s to 80s mountains and mostly 90s lower elevations, except 100 to 105 southern AZ deserts.	15 to 35%.	South to southwest 5 to 15 mph AZ and western NM, south 10 to 20 mph eastern NM and west TX.
NORTHWEST AREA Morning clouds west of the Cascades and mostly sunny east side. Slight risk of isolated thundershowers in extreme southeast Oregon.	Upper 60s and 70s western Washington ranging to the 80s southwest Oregon. Eastside: Mostly 85 to 95.	West of Cascade: 40 to 60% north and 25 to 35% interior SW Oregon: Quite dry. 10 to 20% eastern Washington and eastern Oregon except 5 to 10% southeast Oregon.	West winds becoming 6 to 12 mph in the afternoon on the east slopes of the Cascades. Lighter winds elsewhere.
ROCKY MOUNTAIN AREA Scattered showers and afternoon thunderstorms.	Highs in 80s, 60s in the mountains.	25 to 40%.	Variable at 5 to 15 mph.
NORTHERN ROCKIES AREA Partly cloudy with isolated thunderstorms.	West: 85 to 95. East: 80s. Higher terrain: Upper 70s to low 80s.	17 to 30%.	West: Slope/ valley 5 to 10 mph. East: East winds 5 to 15 mph.
NORTHERN CALIFORNIA AREA Slight chance of p.m. thunderstorms up to Tahoe area, otherwise fair inland and patchy fog at coast.	Upper 80s to near 100 inland and 60s to lower 70s coast.	7 to 17% driest inland areas, mainly in or near the NE California PSA.	Afternoon winds south to west southwest 5 to 13 mph with gusts 22 to 32.

INITIAL ATTACK FIRE SIZEUP/SAFETY

Having a good sizeup is important in order to give both the Incident Commander (IC) and fire management a good idea of what problems exist and what resources may be needed for effective firefighting.

● Use the following reporting factors for sizeup. Discuss others that may be used.

- Fire name and location
- Terrain (slope, aspect, elevation) and position of fire on the slope
- Size of fire
- Fuel type, anticipated control problems, and spread potential
- Values threatened
- Weather conditions (wind speed and direction)
- Fire behavior
- Resources on the fire and those needed
- Estimated containment and control times
- Cause (known, suspected, under investigation)

● After your initial sizeup of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.

- Have you sized up the fire and relayed the information to dispatch?
- Is the observed fire weather consistent with the forecast?
- Can you control the fire with the resources available (on the incident or soon to be on the incident) and under the expected conditions?
- Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas); and have you communicated this information to all personnel assigned to the incident, including new arrivals?
- Are lookouts in place or can you see all of the fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the standard fire orders being followed?
- Do you have a complete list of what resources have been ordered for the fire?
- Will you control the fire before the next operational period; and if you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency Fire Management Officer?
